Artichoke

French, Artichaut. German, Artichoke. Plant the seeds early in the spring one inch deep and three or four inches apart, in drills one foot apart. Hoe often and transplant in following spring to hills four feet apart, setting from one to three plants in a hill.

Artichoke Roots

LARGE GREEN GLOBE—The largest and best. Pkt., 5c; oz. 35c; ¼ lb. \$1.00; lb. \$3.50. JERUSALEM—Well known. Cut and plant same as potatoes. Best for stock. Pk. 50c; bu.

Asparagus

French, Asperge. German, Spargel. To grow asparagus plants from seed, sow in drills about one inch deep in rows 1 ft. apart. Keep the soil mellow and free from weeds during the summer, and in the fall or spring the plants may be set out in beds about 18 inches apart, in rows 4 ft. apart, with the crowns 4 inches below the surface. Before winter, cover the transplanted bed with four inches of manure. Sow a little salt on the surface in the spring; it will keep down the weeds.

PALMETTO—This variety is uniformly of large size and early; and while not so many may be cut at one time as from some others, which is expressing to the strength of the streng

this is overcome in the extra size to which it grows. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 70c. CONOVER'S COLOSSAL—Of large size and very productive. Pkt. 5c; oz. 10c; ¼ lb. 30e; lb.

COLUMBIAN MAMMOTH WHITE—A fine, large variety, which produces stalks very light in color, being almost white in some specimens. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. \$1.00.

Asparagus Roots

COLOSSAL—Two-years per 100, 50c; 1,000, \$4.50; one-year, per 100, 45c; 1,000, \$3.50.

PALMETTO—Two year old roots, per 100, 60c; 1,000, \$5.00. One year, per 100, 50c; 1,000, \$4.50.

COLUMBIAN MAMMOTH WHITE—Two years, per 100, 70c; per 1,000, \$5.00; one-year per 100, 50c; per 1,000, \$4.50.

Beans (Dwarf, Bush or Snap)

French, Haricot. German, Bohne.
Beans are tender and should not be planted until danger from frost is past and the ground becomes warm. Plant in drills three or four inches apart, or in hills one and one-half feet apart in the row, and rows three feet apart.

Green Podded Varieties

NEW GIANT GREEN POD STRINGLESS VALENTINE—This is a new cross bred variety and one possessing all the merits of the old Improved Valentine, which is one of its parents and having in addition the following points:

It is ready for market with a more prolific crop of pods a week earlier. The pods are one-third larger, averaging five to six inches in length.

They are always absolutely stringless, round, full and fleshy.

It is more prolific and surpasses others in crispness and flavor. Pkt. 5c; pt. 15c; qt.3ne; pk. \$2 00; bu. \$7.00.

PROLIFIC TREE-For field culture, height about 20 inches, branching in all directions, thereby not being so liable to rust as other varieties. Pkt. 5c; pt. 10c; qt. 20e; pk. \$1.00; bu

WHITE MARROW-Exclusively grown as a bean for winter use. Pkt. 5c; pt. 15e; qt. 25c; pk. \$1.25; bu. \$5.00.

New Stringless Green Pod. NEW STRINGLESS GREEN POD—This new bean is one of the best stringless green pod bush beans in cultivation. It is crisp, of tender flavor and prolific. The pods are ready for market a week earlier than the Valentine, which is known to be valuable for its earliness. Pkt. 5e; pt. 15c;

to be valuable for its earliness. Pkt. 5c; pt. 15c; qt. 36c; pk. \$2.0c; bk. \$7.0c. vALENTINE IMPROVED, RED, ROUND POD—Pods round, maturing in about 60 days; highly esteemed; remains longer in the green state than many other varieties, yet nearly the whole crop can be taken at one picking. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.70; bu \$6.00.

LONG YELLOW SIX WEEKS—One of the earliest; similar to Mohawk, except in color of seed, which is yellowish drab; pods tender. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.40; bu \$5.00.

REFUGE, OR ONE THOUSAND TO ONE—Pods, round, fine flavor; used extensively for canning. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.35; bu, \$4.50

Dreer's Bush Lima

Bush Lima Beans

DREER'S BUSH LIMA-Is the bush form of Dreer's Pole Lima. It is very early in maturing and productive. The beans are not quite as large as the Large Pole Lima, but grow closer in the pod and more of them. Pkt. 5c; pt. 15c; qt. 30c; pk. \$175; bu. \$700. BURPLE'S BUSH LIMA—Grows eighteen to

twenty inches high, of sturdy habit, erect and branching, forming a bush sometimes two feet in diameter, making it very productive. The beans are very large, being equal in size to any of the Pole Limas, also in quality. Pkt. 5c; pt. 15c; qt. 30c; pk. \$1.75 bu. \$7.00

HENDERSON'S BUSH LIMA-It grows in compact bush form eighteen inches high, and produces fine crops of Lima Beaus, which can be as easily gathered as the common garden bush beans. Pkt. 5c; pt. 15c; qt. 30c; pk. \$1.75 bu. \$7.00

Wax Podded Varieties

BLACK WAX-Early, stringless, pods round and waxy, yellow, solid and tender. Pkt. 5c; 20c; qt. 30c; pk. \$2.00; bu. \$7.50.

NEW PROLIFIC GERMAN WAX-An improved strain of Black Wax, but more prolific. Easily harvested; free from rust. Pkt. 5c; pt.

20c; qt. 30c; pk. \$2.00; bu. \$7.50. GOLDEN WAX—This is one of the best snap beans in cultivation. It is unsurpassed in tenderness and richness of flavor; moreover, it stands high in favor as a shell bean for winter use. Pkt. 5c; pt. 20c; qt. 30c; pk. \$2.00; bu. \$7.50.

Davis Kidney Wax.

DAVIS WAX-This is the most hardy and productive bush, wax-podded bean in cultivation.

All of the pods are very long, white, straight and handsome. The vine is rustless and very vigorous, bearing near the center many clusters, some of which extend above the foliage. When young the pods are very brittle, crisp and tender. The dry beans are kidney-shaped, clear, white, and excellent for baking.

ONE OF THE BEST FOR SHIPPING AS SNAP BEANS,

and of the greatest value for either the mar-ket or the home garden. The length, perfect shape and fine color of the pods, and the clear, white seed makes this

ONE OF THE BEST FOR CANNERS. It is just what they want, a long, straight, clear white pod, which does not discolor in canning. Pkt. 5c; pt. 20c; qt. 30c; pk. \$2.00; bu. \$7.50

ROUND POD KIDNEY WAX-A new sort and we think very desireable especially for the home garden. The vine is dwarf, spreading and very pro-productive. The exceedingly beautiful pods are round, long, slightly curved, very white and wax-like, stringless, cylindrical and of the best quality. They are uniformly perfect, an ill-shaped one being rarely seen. Seed long, cylindrical, nearly white, with a little dark marking about the eye. Pkt. 5c: Pt. 15c: Qt. 30c: Pk. \$2.00: Bu. \$7.50.

Pt. 15c: Qt. 30c: Pk. \$2.00: Bu. \$7.50.

WARDWELL'S DWARF KIDNEY WAX—
Vines of medium size, crect, hardy and productive. Pods long, broad, flat and of a delicate waxy yellow, brittle and entirely stringless.

Pkt. 5c: pt. 15c: qt. 30c; pk. \$2.00; bu. \$7.50.

KUST PROOF GOLDEN WAX—While grown side by side for several years with other wax beans, all of them more or less affected by rust, many of them completely ruined by it this bean

many of them completely rulned by it, this bean has remained entirely free from it. But not only is it RUST PROOF, but it is exceedingly CRISP AND TENDER, with no approach whatever to stringiness, and of a most delicious flavor. Pkt. 5e; pt. 15e; qt. 30e; pk. \$2.00; bu.

WHITE WAX-Except in the color of its seed this variety bears a strong resemblance to the black wax. Pods wax-like. Pkt. 5c; pt. 15c; qt.

30c; pk. \$2.00; bu. \$7.00.

JONES' STRINGLESS WHITE SEED, ROUND POD WAX. POSITIVELY FREE FROM RUST—This grand absolutely stringless bean, is the result of five years' systematic cross breeding between the Yosemite and a white seed cross from lyory Pod Wax. It will without doubt become one of the most popular of all our Wax varieties now grown, combining points never before obtained in a true stringless wax pod. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00 bu.

Pole or Running Beans

French, Haricots a rames. German, Stangenbohne.

They are more tender and require more care in culture than the bush beans and should be planted two weeks later. Plant in hills from three to four feet apart; plant five or six beans in a hill, leaving a space in the center for the pole.

LARGE WHITE LIMA—Pods broad and rough, Seeds large, broad and white. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.
DREER'S IMPROVED LIMA—Smaller seeds

than the preceding, but more hardy and more produceive. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50 bu. \$5.50. EARLY GOLDEN CLUSTER WAX POLF-

This variety takes the lead of all pole beans, in earliness, coming into use a week or ten days later than the Dwarf Golden Wax. It is crisp and fender. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00; bu. \$7.00.

GERMAN BLACK WAX POLE—One of the best varieties either for snap or shell beans in the green state. Pkt. 5c; pt. 20c; qt. 35c; pk.

in the green state. Fkt. 5c; pt. 20c; qt. 35c; pt. 252.00; bu. \$7.00.

EARLY DUTCH CASE KNIFE—One of the earliest of the pole varieties, is good green or dry; very productive. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.

RED SPECKLED CUT-SHORT OR CORN

HILL—An old variety, and yet one for which every one has a good word; vines medium, pods short, round and tender. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.

30c: pk. \$1.50; bu. \$5.50.

KENTUCKY WONDER — Vines vigorous, climbing well and very productive, bearing its pods in large clusters; pods green, very long, often reaching nine or ten inches. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.75; bu. \$7.00.

SCARLET RUNNER—An ornamental sort, used same as Morning Glories. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.10; bu. \$8.00.

RED GIANT WAX—Pkt. 5c; pt. 25c; qt. 45c; pk. \$2.25; bu. \$8.00.

pk. \$2.25; bu. \$8.00.

Beets

French, Betterave. German, Rothe Ruebe

-The name of this variety is misleading as it resembles the Egyptian only in its extreme earliness. It is larger, lighter colored and more nearly sprerical; one of the best for early planting out doors. It is a most excellent

sort, becoming fit for use sooner than any

Crosby's Egyptian other variety, but it is not as well suited for forcing in hotbeds or for trans planting as the Egyptian. Pkt. 5c; oz. 10c; 1/4, 1b, 25c; 1 lb. 75c.

ARLINGTON FAVORITE—A new dark-leaved early blood variety, originated at Arling-ton Mass., where it is grown extensively for the Boston market. It follows the Eclipse closely in maturing, but is of much darker color and superior in quality. Perfectly round in shape; it differs from all other dark blood sorts in that it has the sweetness of the Bassano, and yet a very dark deep blood color. Its small, upright growing tons. early maturing, and the splendld growing tops, early maturing, and the splendid shape and color of the roots, makes it popular with everyone who plants it. Pkt. 5c; oz. 10c; & 1b. 20c; lb. 60c.

EARLY EGYPTIAN—The well known early variety. Color extra dark, shape flat, quality excellent. Pkt. 50; oz. 10c; ¼ lb. 20c; lb. 50c.

COLUMBIA—This distinct new Beet is early, of finest quality and great uniformity, both in roots and meat, handsome foliage, being of turnip shape, with smooth, clear skin and deep blood red flesh. Pkt. 5c; oz. 10c; ¼ ib. 20c; lb.

EXTRA EARLY ECLIPSE-An excellent sort, about as early as the Egyptian, but we consider it better because it is larger and of much finer quality. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

EARLY BLOOD-RED TURNIP-The old stand-by. Pkt. 5c; oz. 10c, ¼ lb. 20c; lb. 50c.

MITCHELL'S PERFECTION—This variety is one of the earliest sorts known. It is of rich dark blood red color, small top, very smooth. Pkt. 5c; oz. 10c; 1/4 lb. 20c; lb. 60c.

EDMAND'S EARLY BLOOD TURNIP—The very best sort for general crop. In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 50c.

LONG SMOOTH BLOOD—The standard long sort. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

DEWING'S EARLY BLOOD TURNIPgood variety for main crop. Keeps well. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.
DETROIT DARK RED TURNIP—A grand

DETROIT DARK RED TURNIP—A grand beet for bunching for market; tops are exceptionally small and uniformly upright; roots are perfect turnip shape with small tap roots. The principal fault with most Turnip Beets is the occasional appearance of white rings, but by careful selection this has been overcome, and this will be found one of the deepest red Beets. Quality is the very best, sweet and tender. Gardeners can safely plant it largely. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

Mangel Wurzel

French, Betterave. German, Runkel Ruebe.

Mammoth Long Red Mangel Wurzel.

Sow in April and May in thoroughly ploughed, well manured soil, in dr:lls two inches deep about 18 inches apart. Thin out to 12 inches and keep the weeds down by frequent hoeing and cultivating.

> Prices on all kinds of Mangel Wurzel, 5c per oz.

MAMMOTH LONG RED-More generally grown than any other sort. Roots large, quality excellent. Oz. 5c; ¼ lb., lent. Oz. 50 10c; lb., 30c.

NORBITION RED GIANT-One of the finest qualities in cultivation; grows to an enormous size. Oz., 5c; ¼ lb., 10c; lb., 30c.

GOLDEN TANK-ARD-A very valuable variety, of fine form and bright yellow in color. Oz. 5c; 1/4 lb., 10c; lb., 30c.

MAMMOTH LONG YELLOW - Similar to Loug Red except in color. Oz, 5c; 16., 10c; 1b., 30c.

KINVER'S YEL-LOW GLOBE-It is of superb quality and an enormous cropper. Oz. 5c; 34 lb., 10c; lb., 30c.

RED GLOBE—The root is of large size and globular in form; very productive. Oz. 5c; ¼ lb. 10c; lb. 30c.

See pages 24, 25 and for Northern Grown Seed Potatoes

Sugar Beets

French, Sucore Betterave. German, Zucker Rueben.

Plant seeds close together in the drills; when the young plants are large enough to handle, thin same out to about six inches apart; in rich soil the beets should be closer together, and in poor soil further apart. Cultivate often and keep free from weeds by hand weeding or hoeing. Sow for sugar purposes 20 lbs., and for feeding purposes 10 lbs. to the acre.

KLEIN WANZLEBEN--This kind is cultivated on a larger scale than any other sugar beet. The root is conical, straight and even, quite large at the hand rapidly tapering. It is a heavier yielder than Vilmorin's Improved and contains from 14 to 15 per cent of sugar. Pkt. 5c; ¾ lb. 10c; lb. 30c.

VILMORIN'S 1MPROVED--Under average conditions it has yielded 14 tons of roots to the acres containing about 16 per cent of sugar. Pkt. 5c; 1/2 lb. 10c; lb. 30c.

FRENCH RED TOP SUGAR—The most generally grown sort in France, as it combines with heavy yield a good percentage of sugar. It has produced 30 tons of beets to the acre, containing about 10 to 13 per cent of sugar. Pkt. 5c; ¼ 1b. 10c; lb. 30c.

LANE'S IMPERIAL--The largest and most prolific of all sugar beets. This variety is most used for feeding purposes. Pkt 5c; 1 lb. 10c; lb. 30c,

Cabbage

French, Choux Pommes. German, Kopf Kohl.

To secure early cabbages, sow seed in fall in boxes and winter the young plants in cold frames, or it may be sown in February or March in hotbeds. The latter plan is generally adopted in this neighborhood. The February sown plants, when large enough, should be transplanted into cold frames, and as early as the ground is in fit condition they should be planted into the garden in rows about two feet and about eighteen inches in the row. The late varieties should be sown about the lst of May and set out in the garden in July. As these grow larger than the early varieties, they should be planted in rows about three feet apart and about two feet apart in the row.

EARLY SPRING CABBAGE--This now famous extra early cabbage has been grown by a number of the progressive cabbage growers of the country, and it has given entire satisfaction. It is of the type of the Early "Allhead," resembling it in the habit of growth, but is smaller and is as early as the Wakefield. The heads have few outside leaves and these are small and grow so close to the head that they can be planted very close together. It is round in shape, slightly flattened, very solid, even before the cabbages attain their mature size. On account of its shape, productiveness and solidity it will become one of the most profitable early sort. Market gardeners cannot afford to be without this, as it will be a good "seller." Pkt. 5c; oz. 30c; ½ lb. 80c; 1 lb. 82.30.

EARLY WINNINGSTADT -- One of the surest headers grown, cone shaped and remarkably hard and solid; desirable for both early and late; quality excellent. Pkt. 5c; oz. 20c; ½ lb. 50c; lb. \$1.50.

THE CHARLESTON WAKEFIELD - This variety is a selection of the best and largest

heads of the Early Jersey Wakefield, and we can offer it with confidence to those who desire a larger size than the above mentioned variety. It will average about 50 per cent larger in size than the old type of Wakefield, and is only about two or three days later. Pkt. 5c; oz. 25c; 4 lb. 75c; lb. \$2.00.

Early Jersey Wakefield.

EARLY JERSEY WAKEFIELD—No words of praise can be written about our Jersey Wakefield that would recommend this most desirable cabbage too highly. It is to-day more largely planted by market and private gardeners all over the United States than any other first early cabbage known. It gives every market gardener who plants it complete control of the early markets, and is everywhere pronounced by them the best and most profitable first early cabbage. It is ten days earlier than any other early cabbage. Price—Pkt. 5c; oz. 25c; 4 lb. 75c; lb. \$2.00.

NEW EXPRESS—Produces fair sized heads in eighty to eighty-five days from sowing of seed. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.00.

EARLY YORK DWARF—An early spring and summer variety; heads small; very tender Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$1.40.

EARLY YORK LARGE—Two weeks later than the Early York Dwarf, but larger; stands the heat well. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$1.40.

HENDERSON'S EARLY SUMMER—This variety is deservedly popular with market gardeners. It forms large, solid, round, compact heads of excellent quality. Pkt. 5c; oz. 30c; ¼-1b. 60c; lb. \$2.00.

BURPEE'S ALLHEAD—We quote the originator's description: "Earliest of all large cabbages, often coming in before the Early Summer. It is at least one-third larger than this popular variety, and therefore much more prottable to the market gardeners, who have in this variety a cabbage larger and at the same time earlier. Seed of the Allhead sown in July and plants set out about the middle of August will bring heads large and solid, which are sure to stand the winter well." Pkt. 5c; oz. 30c; ¼-1b. 60c; lb. \$2.00.

ALL SEASONS—This variety is certainly one of the very best for all the year around, forming a solid and compact head of very fine quality. Pkt. 5c; oz. 30c; ¼-1b. 60c; lb. \$2.00. HENDERSON'S SUCCESSION—One of the finest second early cabbages yet introduced. It is about one week later than the early summer, but is double the size and is so finely bred that, in a field of ten acres, every head was a perfect specimen fit for exhibition purposes. Pkt. 5c, oz. 25c, ½ 1b. 60c, lb. \$2.00.

EXCELSIOR FLAT DUTCH—A low-growing variety, heads large bluish green, round, solid, broad and flat on top, and often tinted with red and brown. Pkt. 5c, oz. 20c, ¼ lb, 50c, lb, \$1.50.

SUREHEAD—Very reliable cabbage, large, round, flattened heads of the Flat Dutch type. A good keeper and shipper and has become very popular. Pkt. 5c, oz. 20c, ½ 1b. 60c, lb. \$2.00.

PREMIUM LATE DRUMHEAD—We recommend this sort to market gardeners and growers for shipping purposes. In good, rich soil and with a favorable season, he heads will grow to an enormous size. Vory compact and solid, and of excellent flavor. Pkt. 5c; oz. 25c; 1/2 lb. 60c; lb. \$2.00.

THE N. S. CO.'S SEL. PREMIUM LATE FLA1 DUTCH—This we consider superior to any late cabbage in cultivation. It possesses all the good qualities of the Late Flat Dutch, and is a sure header. Our stock of this variety has been especially raised for us from carefully selected heads, and we think it superior to any other strain of this popular variety. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.00

St. Louis Late Market Cabbage.

ST. LOUIS LATE MARKET—It is a large, late strain of market gardener's cabbage. The heads are of large size, hard and firm, with but few outside leaves; stems short, foliage compact and of a beautiful green color. It is a very desirable variety for a late crop on account of its solidity and because it is an excellent winter keeper. It also stands a considerable time without bursting. In quality it is not quite equal to THE SUCCESSION, or BURPEE'S SUREHEAD, as a summer Cabbage, being slighty strong, but improves as the season advances, making it a winter Cabbage. The hard, thick, flat heads are remarkably uniform in color, as well as in shape and size. Per pkt. 5c; oz. 30c ½ 1b. 70c, ib. \$2.25.

HENDERSON'S AUTUMN KING--A strain of late Cabbage which is highly spoken of by all market, and family gardeners who have thus far tested it. The heads are of enormous size and very solid. It has few outer leaves and will produce a greater weight of crop from the same space of ground than any other late Cabbage. Pkt. 5c, oz. 25c, ½ 1b. 6Cc, lb. \$2.25.

THE LUPTON—This new winter cabbage was originated by Mr. J. M. Lupton, one of the best seed growers on Long Island. It is the result of an effort to combine in one variety the best qualities of second early and late sorts. It is earlier than Flat Dutch or Drumhead, and makes it therefore suitable for main crop. The heads are very large, solid and fine-grained, and are not likely to crack open. The stalk is rather short; color dark green. A very good keeper, Pkt. Sc; oz. 25c; ½ 1b. 60c; 1b. 1b. \$2.25.

and are not likely to crack open. The stalk is rather short; color dark green. A very good keeper, Pkt. 5c; oz. 25c; ¼ lb. 50c; lb. 1b. \$2.25.

DANISH BLL HEAD—One of the best varieties for gen_ral crop. It has been selected for more than fifty years by the Danish gradeners, who grow it almost exclusively for winter cabbage and annually export large quanities. The heads are not as large as Late Flat Dutch, but harder and more solid, fine-grained and good keepers. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

LUXEMBURG, OR HARD HEAD-The Chicago market gardeners have for several years grown this variety, which was brought there by a German gardener who knew no name for it. It proved so valuable that the seed has been sold frequently at \$1.00 per ounce, and sometimes higher. It makes a very hard head of good size and extraordinary weight, and is remarkable for its keeping qualities when buried over winter. It is an excellent sort for late spring sales, after the other sorts are gone, when it commands a high price owing to its fresh green color, size and quality. It is undoubtedly one of the most profitable kinds to grow, and every gardener should have it. Pkt. 5c, ½ oz. 15c, oz. 25c, ½ 1b. 60c, lb. \$2.25.

EARLY BLOOD, OR DARK RED ERFURT— Early, heads round and solid, fine color and excellent quality. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

MAMMOTH ROCK RED—This is by far the best, largest and surest heading red cabbage ever introduced. The plant is large with nurerous spreading leaves. The bead is large, round, very solid and deep red color. Pkt. 5c, oz. 25c, 1/4 lb., 60c, lb. \$2.25.

RED DUTCH, OR PICKLING—Medium size, very hard, oblong heads. Good for pickling. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

SAVOY CABBAGE.

French, Chau de Savoie. German, Wirsingkohl.

NETTED SAVOY—This is the finest of the Savoy class and a general favorite. Heads large, very solid and compact, of a yellowish-green color. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

AMERICAN LATE DRUMHEAD SAVOY—Heads large, round and compact. Excellent for winter use. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

CHICORY.

French, Chicoree. German, Cigorien.

LARGE ROOTED, OR COFFEE—Sown in drills, the roots become well developed. When they are dried, roasted or ground, they become the chicory of commerce, and are used in adulterating coffee. Pkt. 5c; oz. 10c; 1/4, 1b. 35c; lb. 31.00.

Cauliflower

French, Chou-fleur, German, Blumenkohl.

Sow in February or March in a hot-bed, transplanting the plants when large enough in another or the same frame, and gradually hardening them off, preparatory to planting them out as early as the ground is in fit condition. Any good garden solf, if thoroughly cultivated and made very rich by manuring, will suit. When heading tie the top leaves together to protect from exposure to the sun.

There is no vegetable where the quality of the seed has more to do with the success of the crop than the cauliflower. Our seed is most carefully grown and with the best care.

EXTRA EARLY SELECTED SNOWBALL CAULIFLOWER.

Our Strain of Extra Early Selected Snowball is exceedingly early and hardy and is one of the surest to make a solid, compact head. Pkt. 20c; ¼ oz. \$1.00; oz. \$3.00; ¼ lb. \$9.00.

BURPEE'S BEST EARLY—This grand variety has proved to be one of the very best early Cauliflowers in cultivation. Pkt. 20c; 1/4 oz. 50;

EXTRA EARLY SELECT DWARF ERFURT -This is the finest variety grown, very large Pkt. 20e; 4 oz. \$1.00 oz. \$3.00; 4 lb. \$9.00.

EARLY SNOWBALL—Fine heading variety, true heads, pure white, and sure headers. Pkt. 20c; ¼ oz, 60c; oz. \$2.00; 1/4 1b. \$7.00.

EARLY DWARF ERFURT—Very good, and a fine strain. Not so early as the Selected Erfurt. Pkt. 20c; ¼ oz. 60c; oz. \$2.00; bb. \$7.00. VEITCH'S AUTUMN GIANT—A distinct and valuable late variety. Pkt. 5c; ¼ oz. 20c; oz. 60c; L. bb. \$75.

1/4 1b. \$1.75.

EXTRA EARLY PARIS—Head rather large. Pkt. 5c; ¼ oz. 30c; oz. \$1.00; ¼ lb. \$2.59. LENORMAND'S SHORT STEMMED—A French variety. Pkt. 5c;; ¼ oz. 25c; oz. 90c; ¼

Chervil

1b. \$2.25.

French, Cerfeul. German, Gartenkerbel.

By many this is preferred to parsley for garnishing, and its aromatic leaves are much used for seasoning and in salads. Sow early in the spring, in rich, well prepared sand soil. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Cress

French, Cresson, German, Kresse.

Sow peppergrass early in the spring, in shallow drills, and every two or three weeks for a succession, cut often, as it will continue to grow. The Water Cress must be sown on the margin of a stream or running water, or in a moist location.

very moist location.
CURLED, OR PEPPER GRASS-Common and well known. Pkt. 5c; oz. 10c; ¼ lb. 15c; lb. 50c.
TRUE WATER CRESS—Leaves tender and highly flavored. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; lh.

Chives

German, Schnitt lauch.

Chives are perfectly hardy little perennial members of the onion tribe, and are grown ex-clusively for their tops, which are used wher-ever the flavor of onion is desired. Planted in small clumps in any common garden soi!, they will grow readily. Per bunch, 15c; two for 25c.

Corn Salad

French, Mache, German, Feldsalat oder Rabinschen.

Sow early in the fall or first of the spring, in shallow drills, about twelve inches apart. Cover lightly, and if very dry, occasionally water. To protect through the winter, cover with straw or light evergreen brush.

LARGE LEAVED—The best variety cultivated. Pkt. 5c; oz. 15c; ¼ lb. 25c; lb. 80c.

Celeriac

Turnip Rooted Celery.

A variety of celery having turnip shaped roots, which when cooked and sli ed in vinegar makes a most excellent salad.

LARGE, SMOOTH PRAGUE—This is the largest and best variety grewn, and grows to a large size. Pkt. 5c; oz. 25c; ¼ lb. 50c; lb. \$1.75. GIANT ERFURT, TURNIP ROOTED—A good variety for salads, soups, etc. Pkt. 5c; oz. 25c; ¼ lb. 50c; lb. \$1.75.

RUBICON HALF LONG—Since the introduc-tion of this valuable and distinct American car-ret a few years ago, it has rapidly grown in popularity, until now it is more largely grown than all other varieties of carrot combined. It is the best in shape, and its deep red orange colored flesd is the finest of all in quality. The strain was selected and perfected by a well known market gardener of Connecticut, under whose care the carrots attained such uniform shape that they were almost exact duplicates of each other. It is earlier than Danvers, about the same length, but heavier and thicker at the shoulders, making it more productive; the teaves are also shorter, fewer and finer. It is a wonderfully heavy cropper, producing thirty to forty tons to the acre under good field cultur. It grows without neck, the crown is holow, and it grows well under the ground, which prevents it from becoming sunburnt. Pkg. 5c; 02. 10c; ¼ lb. 25c; lb. 70c.

GUERANDE OR OXHEART—A variety with

short, thick roots, the diameter often exceeding the length. Color bright orange, sweet and fine grained, good for table or stock. Pkt. 5c; oz. 10c; 14 lb. 25c; lb. 70.

EARLY HALF LONG SCARLET STUMP-ROOTED-An excellent variety for market gardeners, color scarlet; good for shallow soil. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 70c.

DANVERS—There is no variety grown which will produce as much to the acre, with a minimum length of root, as this one. Under proper conditions of the soil and cultivation, it may reasonably be expected to produce, which it has dore, 25 to 30 tons per acre. It is of medium length and heavy at the neck, but pointed and quite smooth, color a rich orange. Pkt. 5c; oz. 10c 34 lb. 25c; lb. 75c.

CHANTENAY-One of the most perfect and uniform in shape, smooth and a heavy yielder. It is fine in texture and easily dug; the flesh is of a beautiful deep orange, solld, tender and of ex-cellent flavor. One of the very best for table use. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c.

IMPROVED LONG ORANGE-A well known standard sort, roots long, thickest near the crown tapering regularly to a point; color deep orange; suitable for the table and main field crop. Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 60c. FIARLY SCARLET HORN STUMP-ROOTED—

A fine variety of medium size; color deep scarlet; fine flavor. Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 70c.

Celery

Sow in April and May and rake seeds in lightly; water, and shade from strong sun. Prepare trenches from two to four feet apart, a foot wide and a foot deep; dig into the bottom plenty of well-rotted manure, and set the plants when they are three or four inches high, six to eight inches apart in each trench. Keep them shaded until started and gradually earth them up as they

WHITE PLUME-Unlike all other varieties this one does not require to be earthed up, but if only loosely tied, or a few handsful of earth brought closely around the base of the leaves to keep them close together, all the inner leaves or thin stalks will turn white and crisp. Pkt. 5c; os. 20c; 1/4 lb. 50c; lb. \$1.75.

GOLDEN SELF-BLANCHING CELERY-Like GOLDEN SELE-BLANCHING CELERY-Like the White Plume, this celery requires very little earthing up, and in many other respects it is similar to that favorite sort, differing, however, in color, which is yellowish, the heart being large and solid and of a beautiful golden hue. Pkt. 5c; oz. 25e; 14 lb. 75e; lb. \$2.50.

GIANT PASCAL-Grows about two feet high: the stalks are very broad, thick and erisp, and entirely stringless; the width and thickness of tae stalks are distinctive features of this variety. It bleaches with but slight "earthing up," and very quickly, usually in five or six days. Pkt. 5c; oz. 25e; ¼ lb. 50e; lb. \$1.75.

GOLDEN DWARF, OR GOLDEN HEART-The heart is very large, the stem waxy golden yellow, when fully blanched. These are also crisp and quite solid and of excellent flavor. Pkt. 5c; oz 25c; ¼ lb. 50c; lb. \$1.75.
CELERY FOR FLAVORING—Oz. 10c; ¾ lb.

20c; lb. 40c.

Cucumbers

French, Coucombre. German, Gurken. Plant in hills four feet apart, in well prepared warm, rich, loamy soil. Mix a shovelful of well rotted manure in each hill. The fruit should be picked when large enough, whether wanted or not.

CUMBERLAND—A new and distinct variety, said to have originated from crossing the Parisian Pickling and the Early White Spine. It certainly has the good qualities of each of these sorts. The fruits are large, symmetrical, dark green, covered with innumerable small, white spines, and are of prime quality for slicing. The vine is vigorous, wouderfully prolific, and continues in bearing much longer than most sorts. Pkt. 5c; oz. 3uc; ¼-1b. 5bc; lb. \$1.55.

EARLY FRAME, OR SHORT GREEN—One of the standard pickling kind, shape uniform, short and somewhat thick. Pkt. 5c; oz. 10c; 1b. 30c; 1b. 31.00.

Chicago Pickling Cucumber.

CHICAGO PICKLING—The variety used almost exclusively by the Chicago pickle factories. The best for market, also for home use. Pkt. 5c; oz. 10c; ¾ 1b. 30c; 1b. \$1.00.

GREEN PROLIFIC—Enormously productive, crisp and tender. One of the finest for pickles. Pkt. 5c; oz. 10c; ¼ 1b. 30c; 1b. \$1 00.

EARLY RUSSIAN—The earliest of all varieties; makes a fine pickle; can be used for slicing in the early summer. Pkt. 5c; oz. 13c; 1/3b. 30c; 1b. \$1,00.

EARLY CLUSTER—A good pickling variety. It grows in clusters. Fruit very uniform and choice. Pkt. 5c; oz. 20c; 1/4 lb. 60c; lb. \$1.75.

IMPROVED EXTRA EARLY WHITE SPINE—This is a favorite variety, producing fruit from six to eight inches in length and two to three inches in diameter, of a handsome deep green; flesh crisp and of fine flavor. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. \$1.00.

BOSTON PICKLING—One of the most prolific of the pickling sorts. We recommend it highly for the home garden. Pkt. 5c; oz. 10c; ½ lb. 80c; lb. 81.60.

EXTRA LONG WHITE SPINE—A large variety of White Spine, largely used for forcing by market gardners. Pkt. 5c; oz. 10cc; 1/41b. 30c; 1b, \$1.00.

ARLINGTÓN WHITE SPINE—The fruits are of a dark color and pointed. It is a favorite sort with pickle manufacturers, giving a very small proportion of malformed Pkt. 5c; oz. 10c; ½ lb. 30c; lb. \$1.00.

PEERLESS WHITE SPINE—One of the finest strains of White Spine. Fruit of large size, straight, productive: skin deep green, holding color until maturity. Pkt. 5c; oz. 10c; 4lb. 30c; lb, \$1.00.

WHITE WONDER—This cucumber grows about eight inches long and two inches thick. Color, ivory white. The flesh is very solid and of very fine flavor. It remains in good condition for a long time. Pkt. 5c; oz. 52; 1/41b, 50c lb, \$1.50.

EVERGREEN WHITE SPINE—The most popular of all the White Spine varieties. Of beautiful shape and color. It remains in the green state longer than any other variety. Pkt. 5c; oz. 10c; ¼ 1b. 3uc; 1b. \$ 60.

GIANT PERA-An exceedingly large growing sort, of excellent quality for slicing. Shape long, thick and smooth having no spines. Pkt. 5c; oz. 10c; ½ 1b. 80c; 1b. 81.00

COOL AND CRISP—The skin is very dark green, almost black, and covered with knobs, upon which the spines set, which gives the pickle a very attractive appearance. They are very early and prolific. As a cucumber for slicing it is splendid. Pkt. 5c; 02. 40c, 141b. 80c

EX. LONG GREEN GIANT—Fruits of this variety are long, 14 to 18 inches, cylindrical in shape, crisp and firm and are fit for the table almost as early as the shorter sorts; are almost solid meat, being nearly seedless. Pkt. 5c; oz. 10c, oz 30c; 1b. ...0

JAPANESE CLIMBING—This variety can be grown on poles or treilises, having the climbing habit more than any other variety. Fruit of medium size, well formed, of a dark green color and of exquisite flavor. Pkt. 5c; oz. 10c; 14lb. 30c; 10. \$1,00.

SNAKE OR SERPENT-Valuable as a curiosity. Good for display at fairs. For eating, the quality is not up to the standard. Pkt. 5c; oz. 25c; ¼lb, 80c.

SMALL GHERKIN (Burr Cucumber)—Is esteemed highly for bottling. It is small in size, in shape like a chestnut burr. Quality fine. Pkt. 5c; oz. 20c; ¼lb. 70c; lb. \$2.00.

IMPROVED LONG GREEN -- Produced by selections from the Long Green Vines. Vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts; fruit about 12 inches long, firm and crisp. The young fruit makes excellent pickles, and when ripe is best for sweet pickles. We offer a carefully selected strain, uniformly long and of good form, with the large warts and spines well distributed over the surface instead of being clustered at one end as in inferior stock. Pkt. 5c; oz. 10c; 1-15. 30c; 15. 30.

Improved Long Green

Corn (Sweet or Sugar)

French, Mais. German, Welschkorn.

Plant in hills three feet apart and leave four plants to the hill. Plant at intervals of ten days from early spring to middle of summer.

EARLY CORY (RED COB)—One of the earliest varieties of Sweet Corn known, with fair-sized ears. Excellent for market and has attained wide popularity. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3 00.

EXTRA EARLY ADAMS—The hardiest and earliest variety for table use, but not a sweet com Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

FIRST OF ALL—This new Sweet Corn is the earliest of all. It is a week earlier than the cory and of superior quality. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

CROSBY'S EARLY—Early and a great favor-ite in the market. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY MINNESOTA—An extra early variety. Very productive and of excellent quality. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY-The kernels are very large, of pearly whiteness and delicious flavor. It is quite as early as the Minnesota and the ears are much larger. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu: \$3.00.

PERRY'S HYBRID—A very fine early variety, as early as the foregoing. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

HICKOX IMPROVED SWEET—Of medium earliness and is valuable alike for the market, family garden or for canning. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c bu, \$3.00.

STABLER'S EXTRA EARLY—A large early sort, coming into use about the same time as Marblehead. It is a good market variety; very sweet. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3 00.

COUNTRY GENTLEMAN—This is the variety par excellence for quality. It is medium early, rows zig-zag, grains long, flavor beyond description. Excellent for canning. Pkt. 5c; pt. 20c; qt. 25c; pk. 90c; bu. \$3.00,

EARLY WHITE CORY—A selection of the Cory. Of the same character in all respects, except that it has a white cob and kernels. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

MAMMOTH WHITE CORY—An improvement on the White Cory. The ears are twelve rowed and nearly twice as large as the White Cory and covered with very large white grains of good quality. It is extra early. No market gardener should be without it. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

NEW EARLY EVERGREEN SWEET CORN NEW EARLY EVERGREEN SWEET CORN

One of the very best sugar corns in existence,
possessing every good quality of Stowell's Evergreen and resembling it in every respect, except
that the stalk is about one foot shorter and
that it will mature in 80 days, or fully 10 days
earlier. The ears are like Stowell's, very large,
with about eighteen rows of very large grains,
which are of the finest quality. Pkt. 5c; pt. 15c;
qt. 25c; pk. 90c; bu. \$3.00.

STOWELL'S EVERGREEN—This variety is more largely planted than any other, being the general favorite with canners and market gardeners for late use. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c;

MAMMOTH LATE—This produces the largest ears of any Sweet Corn, a single ear sometimes weighing as much as two or three pounds. It ripens a little later than the Evergreen. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

Early Ford Hook.

PEEP O' DAY

The two points of this remarkable corn to which we wish to call most particular attention are its extraordinary earliness and unparalleled sweet-ness; surpassing in these particulars any other known variety, early or late.

The early varieties of sweet corn do not as a rule yield as heavily as the late sorts, but Peep O' Day not only surpasses in this particular all other early varieties, but all late varieties as well; in fact our crops of Peep O' Day have given us for the past year almost double the yield per acre of any other variety we have grown, early or late.

Incredible as this may seem, it is readily accounted for by the fact that the stalks bear from two to five ears each and the growth being dwarf—about 4 feet, admits of very close planting.

Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY FORD HOOK

This is the largest-eared extrs early dwarf-growing true sweet corn, - the ears averaging six to seven inches in length. It is two to three days earlier than the Cory, and has both grains and cob of pure white coloring The ears are eight-rowed, with quite small cob and deep grains.

While similar in growth, it is greatly superior to the Cory in sweetness and HAVOT.

Pkt, 5c; pt. 15c; qt. 25c; pk. 90c; bu.\$3,00

Dandelion

French, Disse-en-lit. German, Loewenzahn. LARGE LEAVED-Leaves are fully double the size of the common Dandelion. It is a great advance over the old variety. Pkt. 5c; oz. 25c; 1/4lb. 60c; lb. \$2.00.

Egg Plant

German, Eirpflanze, Sow in hot beds French, Aubergine.

sow in not beus very early in the spring, and trans-plant to two or three feet apart, in very rich warm ground. Hoe often and hill up gradually until they blossom.

IMPROVED NEW YORK PURPLE - The best variety in cultivation, being early, a sure cropper and of fine quality. The fruit is large, oval, very deep purple. Pkt. 5c; oz. 40c; ½ lb. \$1.00; 1b. \$3.25.

N. Y. Improved Egg Plant

EARLY LONG PURPLE—Earliest and most productive. Pkt. 5c; oz. 20c; 41b. 60c; lb. \$2.00. BLACK PEKIN—The fruit is jet black, round in form, very solid. Pkt. 5c; oz. 30c; 41b. 75c; lb. \$2.00.

Endive

French, Chicoree. German, Endivien. Sow in August in shallow drills, twelve to fif-teen inches apart, and thin to one foot in drills. When fully grown tie over the outer leaves of a few plants every week or ten days to blanch.

WHITE CURLED—Self-blanching. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25. GREEN CURLED—Leaves curled, dark green.

Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

FRENCH CURLED MOSS — Handsomely curled. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Courds

French, Gourde. German, Zier Kuerbis. THE DIPPER GOURD—This variety is useful for many household purposes. When grown on the ground the stems will be curved, while if raised as a climbing vine on a trellis the weight of the blossom end will cause the stem to grow straight. Pkt. 5c; oz. 25c; 1/4 lb. 40c; lb. \$1.00. JAPANESE NEST-EGG GOURD—These ex-

actly resemble in color, shape and size the eggs of hens, do not crack and are uninjured by cold or wet. They make the very best nest-eggs. Pkt. 5c; oz. 15c; 1/4 lb. 40c; lb. 11.00.

Horse Radish

The best horseradish is produced from small The best horseradish is produced from small pieces of root. These are to be set small end down, so that the top will be two inches below the surface. It is hardy and may be left in the ground until spring before digging. We frequently receive orders for the seed of this vegetable, but we can supply the roots only. Doz. 20c; 100, 75c; 1,000, \$5.00.

Kale or Borecole

French, Chou Vert. German, Blaetter-Kohl. The Kales make excellent greens for winter and spring use. Sow the seed about the end of spring, and then transplant and cultivate like cabbage.

Dwarf Green Curled Kale, DWARF GREEN CURLED-A sort of especial excellence, being a very fine curled varicty

cial excellence, being a very fine curled variety of yellowish-green color, growing very close to the ground. Pkt. 5c; oz. 15c; ¼1b. 25c; lb. 80c.

GREEN CURLED SCOTCH—Grows about 18 inches in height and spreads. The leaves are bright green, beautifully curled. Pkt. 5c; oz. 15c; ¼lb. 25c; lb. 80c.

BRÖWN GERMAN CURLED—Similar to Scotch, except the color, which is of a dull purple; most esteemed by the Germans. Pkt. 5c; oz. 15c; ¼lb. 25c; lb. 75c.

Kohl Rabi

French, Chou-rave. German, Kohl-Rabi.

Early White Vienna Kohl Rabi.

Cultivation same as directed for Cabbage, taking care to set the plants no deeper than they stood in the seed bed, and in hoeing not to heap much earth about them.

EAR LIEST WHITE VIENNA--The earliest and best for forcing. Pkt. 5c; oz.20c; %1b.60c; lb. \$2.00.

EARLIEST PURPLE VIENNA—Differs from the Early White Vienna only in color, which is bluish purple. Pkt. 5c; oz. 20c; 3(lb. 60c; lb \$2.00.

GIANT GREEN—A good variety for summer and fall use Grows larger than the Vienna. Pkt 5c; oz. 20c; 11b 60c; 1b. \$2.00.

Leek

Sow early in spring. When about 6 inches high transplant into rows about 10 inches apart each way and as deep as possible to perfect the blanching process. The richer the soil the finer the leeks will grow.

MUSSELBURG-Pkt. 5c; oz. 15c; 1/4 lb. 40c; lb. \$1.00.

LARGE AMERICAN FLAG-A favorite mar-ket variety, Pkt. 6c; oz. 10c; 1/1b. 40c; lb. \$1.00.

LETTUCE

French, Laitue, German, Salat.

For an early crop sow under glass in February and transplant on a well prepared bed, in some sheltered corner, in April. I'or successive crops, sow in beds of well pulverized soil in March, and at intervals of about a fortnight until the end of May.

Black Seeded Simpson Lettuce.

BLACK SEEDED SIMPSON—The standard sort for early spring planting and for growing mader glass. Pkt. 5c; oz. 10c; 1/4 lb. 35c; lb., \$1.00.

ST. LOUIS MARKET—This is one of the very best market sorts. Medium size, light green color. Very slow to run to seed; solid heading sort. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

LARGE WHITE SUMMER CABBAGE—A good summer variety Heads of good size, close and well formed. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1b. 90c

ALL THE YEAR ROUND—A hardy, compact growing variety with small, close heads of a dark green color. Pkt. 5c; oz. 10c; 1/41b, 30c; 1b, 90c.

GOLDEN BALL—A fine variety with very solid heads, of superb quality and great beauty. It is quite as early as the White Tennis Ball, has larger heads and is unsurpassed for table use. Pkt. 5c; oz. 10c; 1/4 lb. 30c: 1b. 90c.

Hanson Lettuce

HANSON—A very fine heading variety of large size. The heads are very solid, sweet, tender and crisp throughout and entirely free from any bitter taste. Pkt. 5c; oz. 10c; ¼ lb. 80c; lb. 80c;

BLONDE BLOCK MEAD—A very handsome lettuce, forming large, solid heads of rich golden yellow, of splendid quality and an excellent keeper. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. 90c.

GRAND RAPIDS FORCING—In the vicinity of Grand Rapids, Mich., this is the only variety they plant for forcing. It is an excellent sort. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

EARLY CURLED SIMPSON—This variety does not head, but forms a compact, close mass of leaves. Pkt. 5c; oz. 10c; 1/4lb. 30c; lb. 90c.

GREEN FRINGED—This variety is beautifully cut and fringed and furnishes an abundance of tender leaves. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

PRIZE HEAD-It forms a large, close head, very crisp, tender and of excellent flavor. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

TILTON'S WHITE STAR—Of the black seeded Simpson type, but grows larger and more rapidly, has a broader, thicker, darker colored-leaf, less frilled at the edge, forms a larger, more distinct and solid central cluster of leaves, Bianches perfectly and is of excellent quality. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. 90c.

SILVER BALL-Produces a beautiful head, firm, solid and compact, with handsomely curied leaves. It is of attractive silver-white color, very rich, buttery and of most delicious flavor. pkt., 5c; oz. 10c; 1/4 lb. 30c; lb. 90c.

BIG BOSTON—This variety resembles the well known Boston Market, but produces heads about double the size and matures a week later. A valuable sort for open ground or forcing. Pkt. 5c; oz. 10c; 10b. 30c; lb. 30c; lb. 90c.

DENVER MARKET (SEED WHITE)—A variety of the same general character of growth as the Tilton's White Star, this being noticeable for its savoved and crimped leaf. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. 90c.

BOSTON CURLED—A handsome variety, much used for garnishing. Early and of good quality. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

EARLY WHITE SELF-FOLDING (SEED WHITE)—A distinct Cos lettuce which does not need tying up. The leaves are yellowish-white in color, long, narrow, upright, and folding into a solid head like that of an Early York Cabbage and very crisp and tender. This is a truly self-blanching lettuce of superior flavor. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

THE TRIANON COS, OR CELERY LETTUCE—This new variety from France is by far the best Cos lettuce we have ever grown, and we recommend it. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

See Pages 38, 39, 40, 41, for TESTED SEED CORN

Melons -- Musk

French, Melon. German, Zucker Melone.

This melon grows best in light soil. Piant in hills about six feet apart, mixing in each hill about a shovelful of well rotted manure. Sow about a dozen seeds in every hill, early in May, and when well started thin out to three or four of the strongest plants.

PRINCESS—It is quite large, dark green skin, heavily netted, small seed cavity; flesh thick of a rich orange color, very sweet, watery and of a most delicious flavor—in short, about perfection. Not a good shipper, but sells well in any home market Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.03.

EXTRA EARLY GRAND RAPIDS—A new extra early, yellow-fleshed sort, of handsome shape. Profattable to the gardener on account of its size, attractive appearance and extreme earliness. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

TIP-TOP — A new yellow-fleshed melon of very distinct appearance. Unequalled for uniform good quality. Every fruit produced, whether large or small, is a good one. It will please all those who use it. Pkt. 5c; oz. 15c; ½ lb. 35c; lb. \$1.00.

EXTRA EARLY CITRON—This excellent sort of melon does not differ from the Hackensack except that it is a little smaller. While small it is very deep fleshed. Dark green color. Pkt. 5e; oz. 15c; 16. 35c; 1b. \$1.00.

MELROSE—This new melon is very hardy, strong and vigorous. The vines remain green longer than any other. It is very early in season and of extra choice quality. Pkt. 5c; oz. 15c; 1/2 lb. 40c; lb. \$1.00.

OSAGE—This is one of the finest all around meluns in existence. Skin dark green, almost black, Very slightly netted. Flesh rich salmon. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. 81.25.

JERSEY BELLE-Extra quality. Beautiful deep green flesh. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.00.

MELON PEACH-Pkt. 5c; oz. 15c; 1/2 lb. 40c; lb. \$1.25.

BAY VIEW—A very prolific and finely flavored and green-fleshed meion. Pkt. 5c; oz. 15c; 16. 40c; 1b. 81.25.

NETTED GEM — A very early variety of small size. It is globe-shaped, green-fleshed and of delicious flavor. Pkt. 5c; oz. 15c; 1 lb. 35c; lb. 31.00.

EMERALD GEM—A choice melon for home use. Size medium, of fine appearance. Flesh juicy, delicious and rich salmon. Pkt. 5c; oz. 10c; ¼ lb. 50c; lb. \$1.40,

CHICAGO MARKET—A standard, green-fleshed nut melon. The favorite of the Chicago market. Pkt. 5c; oz. 15c; ½ lb. 35c; lb \$1.00.

LONG YELLOW CANTALOUPE— A very large variety, ribbed and netted, Salmon fleshed. Pkt. 5c; oz. 15c; ¼ 1b. 35c; 1b. \$1.00.

MONTREAU MARKET—One of the largest melons we know of. Flesh green, thick and of very fine flavor. Pkt. 5c; oz. 15c; ¼ lb. 45c; lb. \$1.50.

PAUL ROSE MUSKMELON.

#NEW MUSKMELON — The "Paul Rose" — This new melon is the result of careful cross-breeding of the Osage and Netted Gem, and for a number of seasons past has held the leading place in the Chicago markets. It combines the size of the Osage, shape and shipping qualities of the Netted Gem with the rich orange color and fine quality of our Emerald Gem. These melons are shipped to the ricles in objury and so carefully have they been bred for even size that 16 melons exactly fill one of these baskets in two layers of 8 melons each, making a most attractive and easily handled package.

The fruits are nearly round or slightly oval, slightly ribbed and heavily netted of light green or faint golden hue when fully ripe. The flesh is thick, of rich, deep orange color, ripening close down to the rind, with small seed cavity. While the flesh has the deep coloring and superior flavor of the Emerald Gem, it is much firmer (resembling the Netted Gem in this respect), making it an excellent shipping variety. The highest praise we give the "Paul Rose" melon is to state that it is an excellent shipping variety, and in quality ranks higher than all other varieties.

Pkt. 5e; oz. 15e; 16 lb. 35e; lb. \$1.00.

Rock Ford Cantaloupe.

ROCKY FORD CANTALOUPE takes its name from the little town of Rocky Ford, Colorado, which has become as famous for its melons as Baltimore for its ovsters.

The reason for the wide-spread popularity of these melons is two-fold. First, its superb table qualities. being firm, sweet and remarkably solid. Second, its wonderful shipping qualities, which enables it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juicy. It is very early and wenderfully productive. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

LARGE HACKENSACK-Large, round, flat-tened, green flesh, Pkt. 5c; oz. 15c; 1/2 lb. 35c; lb.

EXTRA EARLY HACKENSACK—Ten days earlier than the foregoing. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

LONG ISLAND BEAUTY—A splendid new variety of the Hackensack type, of superior quality, with green fiesh and densely netted. In shape resembling Hackensack, slightly more ribbed and a decidedly more attractive melon. It is claimed to be the earliest in cultivation. I'st. 5c; oz. 15c; ½ lb. 30c; lb. \$1.00.

ACME, OR BALTIMORE—Oblong, pointed light green flesh. Pkt. 5c; oz. 15c; ¼ lb. 20c; lb. \$1.00.

BANANA — Grows eighteen to twenty-four, luches long; a curiosity. Pkt. 5e; oz. 150: ¾ lb \$00; lb. \$1.00.

PROLIFIC NUTMEG—Round, heavily netted, thick green flesh. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

MILLER'S CREAM-Flesh of rich salmon, thick and sweet. Pkt. 5c; oz. 15c; ¼-lb. 40c; lb. \$1.25.

GREEN-FLESHED OSAGE—Pea-green flesh, of delicious flavor. Pkt. 5c; oz. 15c; 14-lb. 40c; lb. \$1.25.

THE BANQUET-Densely netted, globular, dark rich salmon flesh. Pkt. 5c; oz. 15c; 14-ib.

Melons-Water

German, Wasser-Melon. French, Melon d'eau.

I lant in hills eight to ten feet apart each way with a shoveiful of well-rotted manure mixed with the soll in each hill. Put six or eight seeds in each hill and finally leave, when danger from insects is past, but three strong plants. Hoe often. If extra large fruit is desired have but two or three melons to the

KLECKLY SWEETS — The finest melon yet introduced for home growing and table use. The vines are strong, vigorous, and the fruits grow uniformly to large size. 18 to 20 inches long and 12 inches in diamlarge size. 18 to 20 inches long and 12 inches in diameter. The skin is a rich, dark green; flesh bright scarlet, ripening close to the rind which is but half an inch thick, so that shipping it long distances is not practicable. The secus are white, lying close to the Skin and leaving a very large, solid heart. Crisp, sugary, melting and entirely free from stringiness. The handsome appearance, uniform growth and lustions. Westness make there of the finest malons in luscious sweetness make it one of the finest melons in cultivation. Our seed was saved from carefully selected melons and is strictly pure and true. Pkt. 5c; oz. 10e; 1 lb, 25e; lb. 85c.

Cole's Early Water Melon.

COLE'S EARLY—Very hardy, a sure cropper and extremely delicate in texture of flesh, which is of a dark red color. The rind is thin and the quality of the flesh is sustained clear to the rind. It is, however, extremely brittle, hence not desirable for shipping purposes. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

CUBAN QUEEN-The largest and one of the best grown, often reaching lifty and sometimes seventy pounds. An excellent keeper. Skin beautifully striped, light and dark green. The fless is red, solid, delicate in flavor and very sweet. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

NEW TRIUMPH WATERMELON—This new melon has created quite a furore among Southern shippers on account of the very high prices reclized by the few who have grown them. Triumph is a cross between the Duke Jones and Koll's Gem, having the handsome dark green color of the former and the fine shipping qualities of the latter, but infinitely superior in flavor and grows much larger than either. Mr. D. H. Gilbert, a large Florida grower, writes he gathered from half an acre 523 melons, weighing over 43 lbs, each, with no small melons on the vines. The Monticello Constitution publishes the weight of four prize Triumph melons grown in Georgia at 90 lbs. 95½ lbs., 91¾ lbs and 80 lbs., respectively. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

FLORIDA FAVORITE—An oblong melon of ane flavor. Pkt. 5c; oz. 10c; 44-lb, 25c; lb, 80c.

PRIDE OF GEORGIA-Round in shape, skin striped. Pkt. 5c; oz. 10c; 4-ib, 25c; lb. 80c.

VICK'S EARLY-Extra early, oblong, skin varies in color. Pkt. 5c; oz. 10c; ¼ 1b. 20c; 1b. 60c.

PHINNEY'S EARLY-Very early; flesh bright red, sweet, tender and well flavored. Reliable for market gardeners. Pkt. bc; oz. 10c; 4-10. 20c; 1b. 6uc.

ICE CREAM, OR PEERLESS-True white sected, oblong, luscious. Pkt. 5c; oz. 10c; 1/4-lb. 20c; 60c.

"KOLB'S GEM-The great market melon. Carries well. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 60c.

FORDHOOK EARLY—Has proved to be the largest early variety on the list and we verily believe it to be the carliest of all. From seeds planted May 10th ripe meions were produced the last of July. The rind is tough, making it valuable for shipping. Color uniform medium green. Seeds white. Flesh bright red and very sweet. Pkt. 5c; oz. 10c; 1/4-lb. 25c; lb. 80c.

M'IVER'S WONDERFUL SUGAR-The sweet-3. IVER'S WONDERFUL SUGAR—The sweetest melon grown. Without a single exception this is the sweetest watermelon of all. It is striply superb. The melons grow oblong, resembling limitlesnake in shape, attain a great weight and are of very handsome appearance. Never crack or lose their fine flavor in the wettest season, Pkt. 5c; oz. 10c; ¼ 1b. 20c; 1b. 60c.

THE JONES-A great favorite in the South, rich flavor. Pkt. 5c; oz. 10c; 4-lb. 25c; lb. 80c.

COLORADO PRESERVING—The best for citron preserves. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 80c. Rt.D SEED CITRON—Old standard variety, especially used for preserving. Flesh white and solid seeds red. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb.

JUMBO—The shape is round, color green with faint lighter stripes, deep red meat, surpassing all other varieties as much in flavor as in size. Pkt. 5c; oz. 10c; 1/4 lb. 20c; lb. 60c.

New Sweet Heart Water Melon.

NEW SWEET HEART—A magnificent new shipping melon, of uniformly large size and fine quality. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, very heavy, uniformly motifed light and very light green. Rin.! thin but firm, flesh bright red, firm, solid, but very tender, melting and sweet. Pkt. 5c; oz. 10c; ¼ 1b. 20c; 1b, 60c.

KENTUCKY WONDER - A popular market melon in the west. Pkt. 5c; oz. 10c; 12 lb. 20c;

1b, 60c.

GEORGIA RATTLESNAKE—A large, oblong teelon. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c. BLACK SPANISH—Earliest round, skin dark green, fiesh red, rich, sugary flavor. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 60c. MAMMOTH IRON CLAD—A standard variety. Grows very large. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 10c.

b., 100.

DIXIE—In this we have a new watermelon of excellent merits and we can recommend it to our customers as the best shipping melon grown, being even larger, earlier and far more productive than Kolb's Gem, which has heretofore been considereed the best melon for shipping. Pkt, 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

Mushroom Spawn

French, Mousseron. German, Champiguon.

French, Mousseron. German, Champignon.

Mushrooms may be grown in any dark room or cellar where the temperature can be kept at from 50 to 60 degrees Fahrenheit.

Procure soil from an old pasture and thoroughly mix it with fresh horse manure. Dig a bed a foot in depth, and lay in successive layers of soil and spawn until the bed is filled. In about ten days cover all with a light layer of loam and manure, pressing armly. Within six weeks the mushrooms will appear, and grow rapidly and continually for a month or over.

ENGLISH—This variety comes in bricks, ib 25c.

FRENCH—This variety is put up in 2-pound boxes and produces a smaller mushroom than the English. Fer 1b. 40c.

Mustard

French, Moutard. German, Senf.

YELLOW OR WHITE LONDON—Best for salad. Pkt. 5c; oz., 10c; ½-1b. 15c; lb. 85c.

BROWN OR 3LACK—More pungent than the white. Pkt. oz. 10c; ½-1b. 15c; lb. 85c.

CHINESE CURLED, OR GIANT—Leave twice the size of the white. Pkt. 5c; oz. 10c; ½-1b. 20c; lb. 50c.

GOLDEN—A new very superior sort. Pkt. 8c oz. 10c; ½-1b. 20c; lb. 50c.

Okra or Gumbo

French, Gumbo. German, Ocher.

Sow about the middle of spring in drills, thin the plants to a foot or more apart. Highly esteemed and cultivated for its green seed pods, which are used in soups or stewed and served

HRC Asparagus,
LONG GREEN, OR LONG WHITE—Long
ribbed pods. Pkt. 5c; oz. 10c: ¼-lb. 20c; lb. 50c.
IMPROVED DWARF GREEN—Early and
very productive. Smooth pods. Pkt. 5c; oz. 10c:
¼-lb. 20c; lb. 50c.

Onion Sets

PRICES SUBJECT TO MARKET FLUCTUA-

WHITE BOTTOM SETS-Pt. 15e; qt. 25e; pk. 90c; bush. \$3,00.

RED BOTTOM SETS-Pt, 15c; qt, 25c; pk, 75c; bush. \$2.50.

YELLOW BOTTOM SETS-Pt. 15c: qt. 25c, pk. 75c; bush, \$2.50.

RED TOP SETS-Pt. 15c; qt. 25c; pk. \$1.25: bush. \$3,50.

WHITE MULTIPLIER—Enormously productive. Qt. 25c; pk. \$1.35; bush. \$5.00. POTATO ONION—Should be planted in March or April. Pt. 15c; qt. 25c; pk. 75c; bush. \$2.50. EVERGREEN TOP. OR WINTER ONION—They are planted in September. Prices upon applications.

GARLIC—Plant in April or May, one isch deep, in drills 14 inches apart, and from 5 to inches apart in rows. 1 lb. 20c; 10 lbs. \$1.50.

French, Ognon. German, Zwiebeln.

We make a specialty of onion seed, and handle it extensively. We grow a large portion of our seeds ourselves, and have them grown by experienced growers under our supervision. We are one of the largest growers of Onion Sets in the West, and all Onion Seed unsold at end of season is sown for sets, thus enabling us to offer customers nothing but fresh seed every year. Our seed is grown from choice selected buibs, and can be relied on. Will make special prices to gardeners or others using large quantities of seed.

bubs, and can be relied on. Will make special prices to gardeners or others using large quantities of seed.

The ground for Onions should be well prepared by digging in pleuty of well-rotted manure. The seed may be sown from the first of April to the middle of May. Sow in drills one inch deep and twelve inches apart. When the onions are up, thin them out to a distance of three inches apart.

LARGE RED WETHERSFIELD—This is a standard variety and the favorite onion in the West, where immense crops are grown for shipment. Large sized, skin deep purplish red, form round, semewhat flattened. Flesh purplish white, moderately fine grained and stronger flavor than any of the other kinds. Very productive, the best keeper, and one of the most popular for general cultivation. It is more inclined to form large necks if planted on suitable soil than the Danvers, but is the best variety of any on poor or dry soils. Fkt. 5c; oz. 15c; ½ lb. 25c; lb. 90c; 5 lbs. \$4.25.

LANVERS YELLOW GLOBE—Distinct in form, heing nearly globular, of a beautiful golden yellow Mild flavor and good keeper. Pkt., 5c; oz., 15c; ½ lb. 25c; lb. 90c; 5 lbs. \$4.25.

SOUTHPORT LARGE RED GLOBE—True globe shaped, enormous yielder. Grows to a large size, of mild flavor, and a good keeper. Pkt. 5c; oz. 15c; ½-lb. 35c; lb. 95c; lb. \$1.25.

LARGE WHITE GLOBE—This is one of the finest onions in cultivation, both in appearance and good. Pkt. 5c; oz. 15c; ½-lb. 35c; lb. 91c. 25c; lb. 9

grained, and of excellent flavor, and commands a higher price in the market than any other white onlon grown. Its skin is pure white, and its keeping qualities particularly good. Pkt. 5c; oz. 20c; ¼-lb. 50c; lb. \$1.60.

HHILADELPHIA SILVERSKIN—This is practically the same variety as the White Portugal, but having been grown for many years in the vicinity of Philadelphia especially for White Seis, is now particularly desirable for that purpose. Pkt. 5c; oz. 20c; ¼-lb. 50c; lb. \$1.60.

PARIS WHITE PICKLING, OR SMALL SILVERSKIN—For pickling. This is of small size, silvery white, and used almost entirely for pickling on account of its small size. Pkt. 5c; oz. 30c; ¼-lb. 65c; lb. \$2.00.

EXTRA EARLY WHITE PEARL—Originally this was an early Italian variety (Sliver Waite Inc.) but it may now be classed under the

THE N. S. CO.'S PICKLING—For early bunching, pickling or sets, the finest strain offered. This may seem a broad statement, but for these purposes we have never sold or seen its equal. Pkt. 5c; oz. 20c; 4-1b, 50c; lb. \$1.60.
WHITE QUEEN—A very early varivty, white, small and fine flavor. Pkt. 5c; oz. 20c; 4-lb. 50c; lb. \$1.60.

EXTRA EARLY RED FLAT—A medium-sized flat variety, producing abundantly and coming into use about two weeks earlier than Red Wethersfield. Pkt. 5c; oz. 15c; 14-lb. 30c; lb. cae-5 lbs. 34.25.

Beware of Low Grade Seed Insist Upon Having Our High Grade

ONIONS-Continued.

PRIZE TAKER-This is one of the best of the hage foreign varieties. When started early under grass, and transplanted into open ground, they bottom fairly well, are nearly free from stiff necks, and when offered for sale always attract marked attention. This variety is witness under special culture sometimes weighing ave pounds. We offer this season American grown seed. Pkt. 5c; oz. 15c; ¼-1b. 40c; 1b, \$1.20.

DANVERS YELLOW FLAT—This nne variety is a thick flat, heavy, straw colored onion, mild flavored and yields abundantly, ripens early and keeps equal to the best. Pkt. 5c; oz. 15c; ¼-1b. 30c; 1b. 90c; 5 lbs. \$4.25.

MAMMOTH SILVER KING—The largest On-

MAMMOTH SILVER KING—The largest Onlon in cultivation. Has been grown extensively in the past few years in all sections of the country, especially-in the West, and has given universal satisfaction. Pkt. 5c; oz. 20c; 4-lb. 50c;

lb. \$1.60.

versal satisfaction. Pkt. bc; 0z. 20c; 4-10. 50c; lb. \$1.50.

(LOBE RED WETHERSFIELD—This is really a Red Globe Onion of the finest and most select type and we believe it to be superior to any stock in existence. It is called Globe Red Wethersfield in order to distinguish it from all other stocks of Red Globe Onions, from which it differs, not only in purity of stock and perfection of shape, but in carliness, productiveness and beauty of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. We have been led to pay special attention to this onion. Pkt. 5c; oz. 20c; 4-1b. 40c; lb. \$1.20

AUSTRALIAN BROWN—This new onion is of neat, round shape, medium size, with skin of a deep amber brown, distinct from all other onions, extremely hard and firm, of fine flavor and will keep almost indefinitely. Australian Brown is the only onion Australian growers will plant. We offer choice Australian growers will plant. We offer choice Australian growers will plant. We offer choice Australian growers seed from the original importation. Pkt. 5c; oz. 15c; 4-lb, 30c; lb. \$1.00.

Pepper

French, Piment. German, Pfeffer.
Sow early in hot bed, or in open ground about
the middle of spring. Transplant when three
inches high, to one foot apart, in drills twenty
inches apart, and earth up a little in hoeing,
which can be continued until the plants are

RUBY KING—The peppers of the Ruby King attain a very large size. Ordinarily they grow four and one-half to six inches long, by three and one-half to four inches thick. When ripe they are of a beautiful bright ruby-red color, and are always remarkely mild and pleasant to the taste. Pkt. 5c; oz. 20c; %-lb. 70c; lb. \$2.00.

CHERRY RED—Red. round, very hot and a reat bearer. Pkt. 5c; oz. 20c; 4-lb. 70c; lb. great 70c; \$2.00.

CHILI-In growth like the Cayenne, but smaller and later. Used for pepper sauce. Pkt. 5c; oz. 20c; ¼-1b. 70c; lb. \$2.00.

oz. 20c; ¼-1b. 70c; 1b. \$2.00.

LARGE BELL OR BULL NOSE—A very large sort of square form, tapering to a point. Mild, thick and hard. Suitable for filling with cabbage, etc., and for mixed pickles. Pkt. 5c; oz. oz. 28c; ¼-1b. 70c; 1b. \$2.00.

SWEET MOUNTAIN—Similar to the Bell, but larger. Much used for stuffling pickles. Pkt. 5c; oz. oz. 20c; ¼-1b. 70c; 1b. \$2.00.

LONG RED CAYENNE—Long, red, hot and pungent. Dwarf growth. Pkt. 5c; oz. 20c; ¼-1b.

Long Parenin.

Parsnips

German, Pastinake. French, Panais.

Sow as early in the spring as the weather will permit, in drills 15 inches apart and half an inch deep, in rich, wellmanured ground, welldug. Cultivate similar to carrots and this out to six inches apart in the rows.

GUERNSEY, OR HALF LONG — As name indi-cates, not as long as the Hollow Crown. Quality very sweet and delicate. Pkt. 5c; oz. 10c; ¼-lb. 20c; 1b., 40c.

HOLLOW CROWN, OR ARGE SUGAR - The LARGE SUGAR - The Roots long vation. smooth, sugary and of excellent flavor. Pkt. 5c; ox. 10c; flavor. Pkt. 5c; 44-lb. 20c; lb. 40c.

Parsley

Frech, Persil. German, Petersilie. Parsley thrives best in a rich soil. The seeds germinate very slowly, three to four weeks generally elapsing before it makes its appearance. Sow early in the spring, half an inch deep, previously soaking the seeds for a few hours in tepid water.

PLAIN-This is the hardiest variety. Pkt. 5c; oz. 10c; 1 lb. 20; lb. 50c.

CHAMPION MOSS CURLED - A compact growing, finely curled variety of a bright-sightly yellowish green color. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

DOUBLE CURLED-A dwarf, beautifully curled sort, Pkt. 5c; oz 10c; 1/4 lb. 20c; 1b. 50c.

HAMBURG, OR TURNIP ROOTED --Fleshy rooted. The roots are used for flavor-ng soups. Pkt. 5c; oz. 10c; 1/2 lb. 20c; 1 lb. 45c.

Ruby King Pepper.

PEAS

French, Pois. German. Erbsen.

The planting of an early crop of Garden Peas should be made in the spring, as soon as the ground can be worked, in a warm, dry situation, and covered about three inches. They are usually planted in double rows three to four feet apert, and, those requiring it, bushed when about six inches high. The large and later sorts do better at a greater distance apart, leaving a broad space for planting low growing vegetables between bles between.

All marked thus () indicate wrinkled sorts.

the GRADUS—A new early and hardy wrinkled variety of the highest type of perfection grows 2½ feet high, is a vigorous grower; light green color; pods and grain very large, closely resembling Telephone. The results with this new pea, for the last four seasons, were an utter surprise in finding a green wrinkled variety with a pod so large as the Gradus produces, to mature only three days after Extra early varieties, hence we claim it to be the earliest wrinkled pea known. The large pods produce from 6 to 9 peas of enormous size, which, when cooked, retain their beautiful soft green, and are sweet, rich and mellow.

In the liew Gradus Pea the grent problem of combining fine quality and productiveness with earliness in pea culture seems to have been solved, and it behooves every progressive gardener to give it a trial. Per pkt. 5c; pt. 25c; qt.

Extra Early Tall Varieties

4) SURPRISE—This new extra early wrinkled pea is certain to become very popular. The vine is no tailer than those of the best strains of First and Best and is as early, continuing longer in condition for use. The pods are like those of the Alpha and the peas are exceedingly tender, sweet and good havored. It is unsurpassed in quality pkt. 5c; pt. 15c; qt. 25c; pk. \$1.50; bu. \$5.50.

NEBRASKA LIGHTNING PEA - No extra early pea has ever given the universal satisfac-tion among market gardeners that this one has The pools are very large and well filled with round peas of fine flavor. Market gardeners and others can make no mistake in using this variety for their entire first early crop. Height 2½ feet, Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.50.

DANDY—The finest early, the greatest yielder, the most delightfully flavored pea on earth. This grand variety is without doubt the earliest (ready to use 42 days after planting) and most productive variety in existence, entirely free frem runners. They ripen up so uniformly as not to require oven two pickings to clean up the entire crop. We highly recommend this new pea to market gardeners, truckers and private gardeners. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.0.

THE NEBRASKA SEED CO.'S FIRST AND BEST—Vines small, bearing three to seven straight, handsome pods, each containing six to eight medium sized round peas of good quality. Stock we offer is especially grown for us. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu \$4.50.

ALASKA-This pen has become a standard variety. The vines are very dwarf. Peas green and smooth. Height 2 feet. Pkt. 5c; pt. 15c; qt. 25c; pk., \$1.50; bu., \$5.50.

PHILADELPHIA EXTRA EARLY—Peassmooth and of excellent quality. A deservedly popular market sort. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu \$4.50.

Extra Early Dwarf Varieties

TOM THUMB-Remarkably dwarf and early; of excellent quality and yields abundantly. Height 10 inches. Pkt. 5c; pt. 15c; qt. 80c; pk. \$1.50; bu, \$5.50.

- () M'LEAN'S LITTLE GEM—A dwarf, prolific, green wrinkled marrow, habit similar to the Tom Thumb. It has all the sugary flavor of the late wrinkled peas. Height 1 foot. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.60; bu. \$6.00.
- f) CARTER'S PREMIUM GEM-A valuable extra early dwarf, wrinkled pea, robust in growth, with long pods. Height 1 foot. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.00; bu. \$6.00.
- O NOTT'S EXCELSIOR-Pods are square and chunky, always containing from five to seven large pens, packed so closely together in the pods that the pens are always more square than round. It grows to a uniform height, and is at all times very tender and of fine flavor. Height 1½ feet. Pkt. 5c; pt. 15c; qt. 20c; pk \$2.00; bu. \$7.00.
- () AMERICAN WONDER-Of fine quality and flavor, and wonderfully productive. Its great distinctive feature, however, is its compact and dwarf growth. Height ¾ feet. Pkt. 5c; pt. 15c; qt. 30c; pk. \$2.00; bu. \$7.00.

Second Early Varieties

() McLEAN'S ADVANCER-A green wrinkled variety with long pods, which are abundantly produced and well filed to the end. Height 2% feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.20; bu.

PRIDE OF THE MARKET-Vines stiff with large, dark green leaves, bearing at the top, generally in pairs, a fair crop of very large, dark green pods well filled with large peas of good flavor. Height, 2 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

() ELISS EVERBEARING—The vines are very prolitic. As many as one hundred pods have been counted on a single vine. Pkt. 5c; pt. 15c;

pectification of a single vine. Pkt. oc; pt. 10c; qt. 15c; pk. \$1.25; bu. \$4.25.

() BLISS' ABUNDANCE—Remarkably productive and of excellent quality. Height 2 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.20; bu. \$1.25.

() THE N. S. CO.'S FAVORITE PEA—The seeds.

are white wrinkled, of vigorous growth, branching habit, profine, pods large sized, which grow in pairs well filled with large peas of fine quality. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

() SHROL'SHIRE HERO—A robust grower, producing its large pods in abundance. Pods are larger and better filled than Stratagem. Height 2½ feet. Pkt 5c; pt. 15c; qt. 25c; pk. \$1.80; bu. 2½ feet.

0 HEROINE—Is a green wrinkled pen, and comes in between Advancer and Champion of England, and bears a profusion of large, long singhtly curved pointed pods, containing from nice to ten large peas of linest quantity. An immense cropper, yields double the quantity ordinary varieties do. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

Late or Main Crop Varieties

LONG ISLAND MARROWFAT-Used profitably by market gardeners in New Jersey in pince of the old White Marrowiats; being productive, more snowy in the basket and far/better in havor, the pods having somewhat the appearance of treepnones, but are earther by four or five days, being ready to pick for market in sixty days after germination. Pkt. oc; pt. loc; qt. 29c; pk. \$1.20; Du. 04.20

\$1.20; Du. \$4.25

O IMTROVED STRATAGEM — Green, square, withkied, vigorous, branching habit, kemarkably luxuriant forage, leaves unusually luxuriant forage, leaves for six of enormous size. Height 2 feet. Pkt. 5e; Dt. \$5.50.

O TELEPHONE—Vines very strong. It branches considerably, the branches bearing from three to nive pous. The pods average six to seven large wrinkled peas of the first quality. Height \$3\frac{1}{2}\$ feet. Pkt. 5e; pt. \$1.50; bu. \$5.50.

\$5.50.

() CHAMPION OF ENGLAND—Universally admitted one of the best peas grown. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.10; bu. \$4.00. MARKOWFAT, LAKGE WHITE—One of the oldest varieties in cultivation, and a favorite market sort. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.10; bu. \$3.40.

LARGE BLACK EYED MARROWFAT—An excellent variety. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.00; bu. \$3.20.

(SHARPE'S OUEEN—Main crop. Height 2)

(SHARPE'S QUEEN-Main crop. Height 2% feet, large, green, wrinkled; without an equal for immense size of pod, productiveness and the flavor.

equal for immense size of pod, productiveness and time havor.

Alost stocks of the large podded semi-dwarf English varieties of peas have been wanting in uniformity and evenness of type as to disgust American planters, but by constant effort we have developed a stock of this, the best variety of that class, which comes true, and we do not hesitate to pronounce it one of the best of the large podded sorts.

All the good qualities of the old Stratagem are highly developed in this new and grand pea,

and it is vastly superior to the stocks now generally sold as Stratagem.

For general consumption it is one of the most profitable varieties that can be grown, being of sturdy branching habit. The pods are very large, slightly curved and contain from tea to thirteen fine large peas, which are of a deep, green color, and most delicious flavor. Pkt. Sci. t. 15c; qt. 25c; pk. \$1.60; bu. \$5.50.

Sharpe's Queen

Edible Pod Varieties

LWARF GRAY SUGAR-Edible pods. Height 2 feet. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00; bu. 3 feet Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.20; bu. \$3.5c; pk. 52.00; pk. 52.00; bu. \$3.5c; pk. 52.00; pk. 52.00; bu. \$3.5c; pk. 52.00; pk. 52.00; bu. \$3.5c; pk. 52.00; bu. \$3.5c;

Pumpkin

French, Potirou. German, Kuerbis.

These are easily grown and profitable for stock feeding. At time of corn planting scatter a few seeds in every fourth or fifth hill, or for a large crop sow in May, in good warm soil in hills eight to ten feet each way, four plants to a hill.

Large Cheese Pumpkin.

LARGE CHEESE—Cheese shaped; in flavor like Crookneck squash, yellow fleshed, fine grained and very productive. Superior to most field varieties. Pkt. 5c; oz. 10c; 4-lb. 20: lb. 50c.

CONNECTICUT FIELD—A large, yellow variety; hard shell. An excellent variety for field culture. Pkt. 5c; oz. 10c; ¼-lb. 15c; lb. 40c.

JAPANESE PIE—This remarkable variety comes from Japan, and makes a valuable addition to our ple and cooking pumpkins. The flesh is very thick and nearly solid. Pkt. 5c; oz. 10c; ¼-1b. 25c; lb. 80c.

CUSHAW, CROOK NECK — Solid flesh, fine and sweet, keeps well. Pkt. 5c; oz. 10c; 1/4-lb. 25c; lb. 80c.

BURPEE'S QUAKER PIE—A distinct and valuable variety. Pkt. 5c; oz. 10c; ¼-1b. 15c; lb 50c.

TENNESSEE SWEET POTATO—Grows to a medium size, pear shaped, and a little ribbed. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c.

SUGAR—This variety is smaller than the Large Field, but of finer grain, sweeter and very prolific. Pkt. 5c; oz. 10c; 14-lb. 20c: lb. 50c.

JONATHAN — This new pumpkin is one of the best varieties grown. It is very sweet and fine for pies. Pkt. 5c; oz. 10c; 14-lb. 25c; lb. 80c.

MAMMOTH KING—The largest variety ever introduced. An enormous yielder, having produced over 100 tons per acre. The flesh is very thick, bright orange color and of fine quality, and in flavor equals squash. Pkt. 5c; oz. 15c; 4-lb. 40c; b. \$1.25.

Radishes

French, Radis. German, Radieschen.

For a successive supply sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot bed in February, care being taken to give plenty of ventilation, otherwise they will run to leaves.

WHITE STRASSBURG—Very large, haif long sort, of unexcelled flavor. It is a rapid grower, sometimes producing a crop in six weeks. Pkt. 5e; oz. 10c; ¼-lb. 20c; lb. 55c.

YELLOW SUMMER TURNIP—Grows to a large size. Excellent to stand the heat and drouth of the summer. Pkt. 5c; oz. 10c; 14-lb. 20c; lb. 55c.

EXTRA EARLY SCARLET TURNIP—Small round red radishes. Pkt. 5c; oz. 10c; ¼-ib. 20c; lb. 55c.

CHINESE ROSE, OR SCARLET CHINA—An excellent winter radish. Pkt. 5c; oz. 10c; 1/4-lb. 20c; lb. 55c.

CALIFORNIA MAMMOTH WHITE WINTER

Of immense size, long. Pkt. 5c; oz. 10c; ¼-lb.
20c; lb. 55c.

ROUND BLACK SPANISH—The favorite winter radish of Germany. Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 55c.

LONG BLACK AND LONG WHITE SPANISH WINTER-Each, Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 55c.

GOLDEN GLOBE—A favorite summer radish. 5c; oz. 10c; ¼-lb. 20c; lb. 55c.

EARLY DEEP SCARLET TURNIP—A small round, red turnip-shaped radish, with a small top and of very quick growth. Mild and crisp when young. Pkt. 5c; oz. 10c; ½-1b. 20c; lb. 55c.

EARLY SCARLET GLOBE—One of the quickest growing and handsomest extra early radishes in cultivation. It is crisp and tender, while its perfect globe shape leaves nothing to be desired. Pkt. 5c; oz. 10c; ¼-1b. 20c; lb. 55c.

SCARLET, OLIVE-SHAPED — Quite early Olive shaped, Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 55c;

EARLY WHITE OLIVE-SHAPED—White skin and crisp, white flesh. Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 65c.

Rosy Gem.

ROSY GEM-Fine for forcing or open culture. a perfect globe in shape. Deep scarlet on top, and fine grained, rarely becoming hollow or blinding into white at the bottom. Very tender pithy. Pkt. 5c; oz. 10c; 4-lb. 20c lb. 55c.

FRENCH BREAKFAST-Olive-shaped, red, white tipped. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 55c.

EARLY HALF-LONG DEEP SCARLET-One of the handsomest and best of all extra early radishes. The root is somewhat longer than the of a rich, deep scarlet color. Pkt. 5c; oz. 10c; 1/4-1b. 20c; ib. 55 c.

EARLY SCARLET TURNIP, WHITE TIPPED -Very early; color bright searlet, tipped with white, an excellent market variety, fine for forcewhite, an excellent market variety, one for long. Their shape is perfectly globular with rich deep scarlet top, blending into pure white at the bottom. Tender, crisp and delicious.

Pkt. 5c; oz. 10c; ¼-1b. 20c; lb. 55c. CHARTIER, OR LONG ROSE, WHITE TIP-PED-A very distinct variety, being dark red at the top, and merging into pure white at the buse. It stands well and will grow to a large size before it is unfit for the table. Pkt. 5c; oz. 10c; ¼-1b. 20c; lb. 55c.

LONG SCARLET SHORT TOP—Standard sort grown for private gardens and for market. Pkt. 5c; oz. 10c; ¼-1b, 20c; 1b, 55c.
EARLY LONG WHITE VIENNA, OR LADY FINGER—This is unquestionably the finest long white radish in cultivation. Pkt. 5c; oz. 10c; ¼-1b, 20c; 1b, 55c.

4.-1b. 20c; 1b. 55c.

LONG, BRIGHTEST SCARLET, WHITE TIPPED—This is a new variety, resembling the Early Long Scarlet in shape and size, and is very early, being ready for use twenty-five days after sowing. It is very handsome, being of the brightest scarlet, (Ipped with white. Pkt. 5c; oz. 10c; 4.-lb. 20c; 1b. 55c.

1111LADELPHIA WHITE "BOX"—Its points of superiority are its remarkably short top, rapid growth, perfect turning shapes, extending quality.

growth, perfect turnip shape, extra fibe quality, and showing no disposition whatever to become 1 lithy with age. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb.

EARLY WHITE TURNIP-Both skin and flesh are white and crisp. Pkt. 5c; oz. 10c; 1/4-lb. 20c; 1b. 55c.

GIANT WHITE STUTTGART—An immense white radish. I'kt. 5c; oz. 10c; ¼-lb. 25c; lb. 70c.

Salsify or Oyster Plant

French, Salsiffs. German, Bocksbart.

Sow early in the spring in drills 14 inches apart. Cultivate same as carrots or parships. Gather what may be wanted for the winter, and let the balance stand in the ground for the rext spring's use. the rext spring's use.

LONG WHITE—The standard variety. Pkt. 5c;
oz. 15c; 4-lb. 49c; lb. \$1.25.

MAMMOTH SANDWICH ISLAND — A new

and large growing variety of great value to the market gardener. 2kt. 5c; oz. 15c; 4-lb. 40c; lb.

SUORZONERA, OR BLACK OYSTER PLANT -- Ituot black before cooking. Pkt. 5c; ox. 15c; 14-lb. 40c; lb. \$1.25.

Squash

French, Courge. German, Kuchen Kuerbis.

Plant in bills, in well prepared ground, mixing two of three shovelsful of well-rotted manure in each hill. Light soils are best suited for their growth. Plant six to eight seeds in each hill and thin out to three or four after they have made partial growth. Plant bush varieties from three to four feet apart each way, and the trailing sorts six to eight.

Regular Hubbard Squash.

HUBBARD—The leading squash for fall and winter use; good in any climate; hard skinned; a splendid keeper; fiesh, dark yellow, fine grained, very dry, sweet and rich. Pkt. 5c; oz. 10c. 14-15. 35c; lb. \$1.00.

MAMMOTH WHITE BUSII—The best strain of white scalloped squash in existence. It grows to a large size, and for quality it is simply delicious. Pkt. 5c; oz. 10c; ½-1b. 25c; lb. 75c.

GOLDEN HUBBARD—A sport from that old standard of excellence, the Hubbard: it is a perfect type of its parent, except in color, which is a bright, deep orange-yellow, exceedingly showy and attractive. Flesh is deep golden yellow color, much richer than the Hubbard, fine grained, cooks very dry, and of excellent flavor. Its keeping qualities are fully equal to, while in productiveness it excels the old variety. Its superior keeping qualities, combined with its sweet, rich flavor, attractive color and shape, are bound to make it a popular fall and winter variety. Pkt. 5c; oz. 10e; ¾-lb. 35c; lb. \$1.00.

CHICAGO WARTED HUBBARD—Our select strain of the ever popular old Hubbard Squash is most excellent, but the Chicago growers seem to have produced "An Ideal Hubbard," "A Hubbard Squash, large, blackish-green, hard as wood, with warty knots all over it, satisfies even the inexperienced observer that it is the best of its class, rich in quality, a keeper and thickfleshed, such as will sell on sight." Pkt. 5c; os. 10c; 3/-1b, 35c; lb. \$1.00.

MARBLEHEAD—A fine late variety, resembling the Hubbard, only that the fiesh is a little lighter than that variety. Pkt. 5c; oz. 15c; 4-lb. 40c; 1ь. \$1 00.

BUTMAN-A variety in size and productiveness resembling the Hubbard. Flesh fine grained, lemon-colored, and of excellent flavor. Pkt. 5c; oz. 10c; ¼-1b. 30; 1b. \$1.00.

(Squash continued on next page.)

Squash-Continued

FORDHOOK SQUASH—It is described as being of medium size, bright yellow outside and seed cavity small. The vine is a rapid grower, and the squashes mature earlier than other winter varieties, and it is also very productive. The quality is the best. Pkt. 5c; oz 15c; ¼-lb, 40c; lb, \$1.25.

MAMMOTH CHILI—A very large growing squash, often attaining the enormous weight of 250 pounds. Excellent for culinary purposes, and especially desirable for stock. Pkt. 5c; oz. 15c; ¼-1b. 50c; lb. \$1.70.

LONG ISLAND WHITE BUSH—A selection of the old White Bush Scallop, and a vast improvement, having less prominent ridges and usually contains nearly twice as much weight as the old sort. In addition to this it is of ther quality and very profile. Pkt. 5c; oz. 15c; ¼-1b. 25c; lb. 80c.

ESSEX HYBRID-A good squash for fall and wilter use. Pkt. 5c; oz. 15c; 4-lb. 40c; lb. \$1.20.

MAMMOTH SUMMER CROOKNECK-This strain is a great improvement on the old variety of Crookneck. It is larger and better in every way. Pkt. 5c; oz. 10c 4-1b. 25c; lb. 80c.

ARRLY WHITE BUSH, SCALLOPED — The White Patty Pan Squash. Pkt. 5c; oz. 10c; 4-1b.

25c; lb. 80c.

25c; lb. 80c.

EARLY YELLOW RUSH, SCALLOPED—Differs from the foregoing in its deep orange color.

Fkt. 5c; oz. 10c; ¼-1b, 25c; lb. 80c.

EARLY SUMMER CROOKNECK—The popular small crooknecked. Pkt. 5c; oz. 10c; ¼-1b; 25c; lb. 80c.

BOSTON MARROW—A bright orange squash, for sufunn 1850. Pkt. 5c; oz. 10c; ½-1b; 20c. lb. 30c. lb. 30c. lb.

r rutumr use. Pkt. 5c; oz. 10c; 14-lb. 30c; lb. \$1.00.

Spinach

French, Epinard. German, Spinat.

Th's is one of the most important of our mar-The is one of the most important of our market garden crop, and one that requires very little care. For summer use sow at intervals of two or three weeks from April to August, and for early spring crop sow in September, covering it in exposed places with straw to protect it from severe frost.

LONG STANDING—The leaves are thick, desky and crimpled, equal to the Bloomsdale Curled Savoy-Leaved, and standing at least two weeks longer than any other variety without running to seed. Pkt. 5c; oz. 10c; ¼-ib, 15c; ib. 25c.

running to seed. Pkt. 5c; 02.

25c.

RLOOMSDALE CURLED, SAVOY-LEAVED—
The leaves are krinkled like Savoy Cabbage, from whence the name; it is a very valuable variety, particularly for market gardeners. Pkt. 5c; 02.

10c; ¼-1b. 15c; lb. 25c.

1RiCKLY, OR FALL—Stands winter well, of less bulk than the round leaf. Pkt. 5c; 02. 10c; ¼-1b. 15c; lb. 30c.

KOUND, THICK-LEAVED—Excellent market sort: equally good for spring and fall sowing: leaves large and thick and fleshy, in general use for early spring planting; also for fall sowing. Pkt. 5c; 02. 10c; ¼-1b. 15c; lb. 25c.

BROAD-LEAVED FLANDERS—This is an excellent and productive variety, very hardy, received and producting long thick leaves, ten

BROAD-LEAVED FLANDERS—This is an excellent and productive variety, very hardy, robust grower, producing long thick leaves, ten inches long and eight inches wide at the base, and may be sown nearly all the year around. Pkt. 5c; oz. 10c; 4/-1b, 15c; lb. 25c.

LONG STANDING PRICKLY—The largest, thickest leaved and best keeping Spinach we have ever seen. Very hardy; equally desirable for summer or winter planting. Pkt. 5c; oz. 10c; 4/-1b, 15c; lb, 25c

Rhubarb

French, Rhubarbe, German, Rhabarber,

. Sow in April. in drills one foot sport, thinning out to about the same distance sport in the rows when a few inches high. Transplant into deep rick soil in fall or the following spring, about three feet sport each way.

VICTORIA-Very large, later than Linnaeus, Pkt. 5c; oz. 20c; ½-lb. 60c; lb. \$1.50. MONARCH-The largest and most vigorous and productive variety known. Pkt. 5c; oz. 20c;

4.-ib. (90c; ib. \$1.50. RHUBARB ROOTS—(Choice Selected) — Anyof the above named varieties with three or four eyes. Each, 10c; doz. \$1.00; 100, \$6.50.

Tomato

French, Tomate. German, Liebesapfel.

Sow early in March, in hot-beds or seed-boxes, and when plants have four leaves transplant to four or five inches apart; give pienty of air and endeavor to secure a vigorous and healthy growth. When all danger of frost is past, transplant to open ground, four to give feet apart each way.

Livingston's Globe Tomato.

We quote the or ginator's statement: We started with an elongated (from stem to blossom end) fruit, one as far removed from the flat shape as possible. We did not, however, lose sight, for a moment, of any of the other good points which have entered into the make-up of all of our other varieties. Now we have in the 'Livingston's Globe' an extra good all round sort of distinct globe shape, with quite a large per-centage of elongated fruits. It is a very beautiful va-riety, and, on account of its shape, one that permits of a greater average number of slices to be taken from each fruit.

In time of ripening we class it among the first earlies, being among the first to rip n fruit both in our greenhouses as well as our field trials, along with many other varieties. The fruits are of large size, and a good merketable size is retained throughout the and a good in the table size is retailed throughout the season; always smooth, of firm flesh and has few seeds; ripens evenly; color, a fire glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. An exceedingly productive variety, having plants with many short joints at which large clusters containing three to seven fruits are always invasibly formed on the it can be truth. are almost invariably formed, so that it can be truthfully stated the plants are literally loaded with fruit. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect. In quality there is nothing more to be desired, being mild ant and of delicate flavor; unsurpassed for slicing or to eat from the hand. Sold in pkts. only: pkt. 20c; 3 pkts. 50c; 7 pkts. \$1.00.

EXTRA EARLY ADVANCE—Is one utilest... With favorable weather the this tomate earliest.". will ripen in ninety days after sowing the seed. Pkt. 5c; oz. 35c; ¼-lb. 60c; lb. 1.75.

CRIMSON CUSHION-Fruit very large, round and regular, bright searlet color, flesh solid and best quality, cells small and few in number. The plants are very productive. The fruit is of fine form and a realiance, and will stand shipment well. Pkt. 5c; oz. 45c; 4-ib, 90c; ib.

White's Excelsior Tomato

WHITE'S EXCELSIOR-

The vines are of a dark green, grow rapidly and to a great size, bear a heavier crop than any other purple variety and continue bearing until killed by the frost. The fruit is a beautiful glossy, dark purplish red, very large, set in great clusters and retain their size until the last end of the season. The seed cavity in the fruit is so small that they are nearly solid, and unlike other purple varieties. Pkt. 5c; oz. 30c; 4-lb. 50c; lb. \$1.80.

BUCKEYE STATE—Color "Deep Glossy Purple"—In Buckeye State we have the largest fruited variety of any of the smooth round tomatoes, averaging fully one-half larger than Livingston's Beauty. It is an immense cropper, bearing its fruit in large clusters, often six to eight in a cluster. Color about the same as Beauty, but deeper shade, very showy and striking when displayed for sale. Remarkably solld and meaty. Pkt. 5c; oz. 25c; ¼-lb. 70c; lb. \$2,20.

THE MIKADO, OR TURNER'S HYBRID-A new variety of very large size and superior quality. Color, purplish red, perfectly solid, produced in immense clusters. Pkt. 5c; oz. 35c; 4-1b. 70c: 1b. \$2.50.

THE GREAT B. B. (BRINTON'S BEST)—
They attract great attention
owing to their beautiful deep red color, uniformly
even, large size and perfect, smooth shape. The
quality and solidity are unequaled. Pkt. 5c; oz.
30c; ¼-1b. 60c; lb. \$1.80.

NEW IMPERIAL—This fine new tomato is not as early as the Early Ruby, but the fruits are of large size and thicker through. It is quite smeoth and fine in form, of a bright red color, but changing to pinkish purple, like Acme when fully ripe. Pkt. 5c; oz. 25c; ¼-lb. 50c; lb. \$1.75.

EARLY RUBY—The great value of this variety lies in the fact that it is by far the earliest of all the large-sized tomatoes which combine good form, rich crimson color and solidity. Pkt. 5c. oz. 30c; ¼-lb. 60c; 1 lb. \$1.80.

ATLANTIC PRIZE-We have no hesitation in offering this as the best and earliest of the extra early sorts, and invaluable to those to whom earliness is the first consideration. Pkt. 5c; oz. 25c; 1/4-1b. 60c; lb. \$1.80.

ACME-The well known standard bright pl tomato. Pkt. 5c; oz. 30c; 4-lb. 60c; lb. \$1.75.

BEAUTY-Large, solid, smooth tomatoes; purplish pink. Pkt. 5c; oz. 25c; 4-lb. 60c; lb. \$1.75;

DWARF CHAMPION—A very distinct variety of tree-like, upright growth. The plant grows jointed stems. It can be planted as close as three feet. The Dwarf Champion will bear very heavy manuring, the strength increasing the abundance and size of fruit, instead of producing superabundant vines. Pkt. 5c; os. 40c; 4-lb. 95c;

DWARF STONE is fully double the size of Dwarf Champion, and yet equally as early. It is fully as prolific and consequently vastly more productive. This is another splendid new variety. In habit of vine it resembles Dwarf Champion, but is of stronger growth and more erect. The fruit resembles Livingston's Stone in color, shape, and what is more remarkable, it is almost the same in size.

We consider this one of the best productions, one

We consider this one of the best productions, one that will meet with general favor, especially with a class of growers whose gardening is limited to a few acres, and where economy in saving land must be taken into account.

The shape of the fruit is perfect, with a good skin, which is free from cracks about the stem end. It is very sold, ripens evenly, and is of most excellent quality. Pkt. 5c; oz. 40c; 1/2 lb. 90c; lb. \$2.75.

HENDERSON'S PONDEROSA, OR NO. 400—
This grand variety is a monster of the tomato family, the tomatoes often weighing two or three pounds each; of a rich, bright crimson color and all solid meat; exceptionally free from seeds. Extremely delicious in flavor, whether used raw or cooked; a single tomato is enough for a meal. Very desirable for family and market purposes. Pkt. 5c; oz. 45c; 4/1b. \$1.00; lb. \$3.25.

THE NEW STONE—Ripens for main crop, is very large and of bright scarlet color. Pkt. 5c; oz. 30c; 14-lb. 60c; lb. \$1.80.

FARAGON-The well known standard bright red tomato. Pkt. 5c; oz. 25c; ¼-lb. 60c; lb. \$1.75.

LIVINGSTON'S PERFECTION—In our opinion this is identical with Paragon. Pkt. 5c; oz. 25c; 1/4-1b. 60c; 1b. \$1.75. LIVINGSTON'S

LIVINGSTON'S FAVORITE - Bright red, smooth tomatoes of good size. Pkt. 5c; oz. 25c. 1/4-1b, 60c; 1b. \$1.75.

TROPHY—Very large, solid and generally smooth. Pkt. 5c; oz. 25c; 1/4-lb. 60c; lb. \$1.75. GOLDEN QUEEN—This is the only first-class large, pure, yellow tomatoe. Pkt. 5c; oz. 40c; 4-lb. 95c; lb. \$3.20.

RED CHERRY-Fruit about an inch in diameter: in bunches, used in pickles. Pkt. 5c; oz. 45c; ¼-lb. 85c; lb. \$2.50.

YELLOW CHERRY-Similar to Red Cherry in form and habit, differing only in color, Pkt. 5c; oz. 45c; ¼-lb. 85c; lb. \$2.50.

PEAR-SHAPED YELLOW-Fruit pear-shaped and yellow used for pickling. Pkt. 5c; oz. 45c 44-lb. 85c; lb. \$2.50.

YELLOW PLUM—Bright yellow in color, round and regular in shape, useful for preserves. Pkt. 5c; oz. 45c: ¼-ib. 85c; lb. \$2.50.

STRAWBERRY, OR WINTER CHERRY—The fruit has a pleasant strawberry-like flavor, estcemed by many for preserving. Pkt. 5c; os. 50c; ¼-lb. 85c; lb. \$2.50.

TOBACCO SEED

French, Tabac. German, Taback.

Now soon as danger of frost is over. When plants are about six inches high, transplant interows six feet apart each way and cultivate thoroughly with plough and hoe.

HAVANA—Commands a high price for cigar tock. Pkt. 5c; oz. 20c; ¼-lb. 65c; lb. \$2.25. MISSOURI BROAD LEAF—A well known tondard sort. Pkt. 5c; oz. 20c; ¼-lb. 60c; lb.

CONNECTICUT SEED LEAF-This is a staple variety. Pkt. 5e; os. 20e; 4-lb. 60e; lb. \$2.00.

Turnip

French, Navet. German, Weisse Rueben.

Light, well manured soil is best suited for turnips. Sow the earliest varieties in April, in drills about fifteen inches apart, and thin out to from 6 to 9 inches in the rows. For a succession sow at intervals until the end of August.

1. EXTRA EARLY WHITE MILAN-Extra early turnip in which the extreme earliness, small top and tap root of the Purple Top Milan is united with clear white skin and flesh. Pkt. 5e; oz. 10e; 1/4-lb 30e; lb. 75c.

2. GOLDEN BALL (ROBERTSON)-A rapid grower; globe shaped, and of a beautiful color and a good keeper. Pkt. 5c; oz. 10c; 1/4-lb. 20c;

R. LARGE WHITE GLOBE—One of the most productive. In rich soil the roots will frequently grow to 12 pounds in weight. Globesheped, skin white and smooth. Pkt. 5c; 03. 10c; 1. 10c; 1.

5. PURPLE, OR RED TOP STRAP LEAF—Flat; fine flavor and one of the most popular varieties grown, and when sown late it is one of our best varieties, being an excellent keeper. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 50c.
6. PURPLE TOP WHITE GLOBE—A hand-some looking bulb and is rapidly taking the lead of all other varieties of early turnips for market garden purposes. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 50c.

EXTRA EARLY PURPLE TOP MILAN—Fully a week earlier that the Munich, which has heretofore been considered the very earliest. It is of medium size and flat-shaped, pure white flesh, of excellent flavor, very small top and a good keeper. Pkt. 5c; oz. 10c; ½-lb. 30c; lb. 75c. EARLY PURPLE TOP MUNICH—A German variety; very handsome, very early, with a bright purplish-red top and fine mouse-tailed root. Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 60c.

Purple Top Strap-Leaf Flat Turnip.

Ruta Baga

(Swedish or Russian Turnip)

(Swedish or Russian Turnip)

French, Navet. German, Kohl Rueben.
The roots may be preserved in a pit or cellar during the winter, and are excellent for table use. Sow from the tenth of June to the middle of July in drills two feet apart and thin out to eight inches.

4. IMPROVED AMERICAN PURPLE TOP—A most excellent sort for either table or stock, Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 50c.
SKIRVING'S PURPLE TOP—A good variety oz. 10c; ¼-lb. 20c; lb. 50c.
LAING'S IMPROVED—An early variety. Bulb handsome and of fine quality. Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 50c.
CARTER'S IMPERIAL HARDY SWEDE—Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 50c.
SHAMROCK—A very fine purple top variety. Bulb large and handsome, with small top and few leaves. A good keeper. Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 50c.

Seed Sweet Potatoes

Early Yellow Jersey Sweet Potatoes.

We make a specialty of having our seed sweet potatoes grown in New Jersey, where they have unequalled facilities for handling and storing. New Jersey grown sweet potatoes are everywhere acknowledged to be the best in quality, being much dryer and sweeter than those grown in the South and West, while their keeping and shipping qualities are away ahead. We pack for shipment in boxes and barrels, with greatest care; but as they are very susceptible to climatic changes, we cannot hold ourselves responsible

for their condition after long journeys of several hundred miles, and wish it distinctly understood that customers take all risk after we deliver in good condition to the express or railroad com-pany here. We do not ship until about planting time unless especially ordered to do so.

THE FOLLOWING PRICES are about what will rule, we think, but as there is liable to be a shortage of good seed at planting time the prices here quoted are SUBJECT TO MARKET

NEW EARLY GOLDEN—Light, golden yellow skin, yellow flesh of excellent quality. Tubers of medium size, very prolific. Lb. 10c; pk. 50c; bu, \$1.25; bbl. \$3.25.

YELLOW NANSEMOND—Yellow skin and flesh. Very large growing variety, second early. Lb. 10c; pk. 40c; bu. \$1.25; bbl. \$2.50.

EARLY YELLOW JERSEY-Yellow skin, yellow fiesh. Very early and prolific. Of fine quality and flavor. Lb. 10c; pk. 40c; bu. \$1.25; bbl. \$2.50.

RED JERSEY-Red skin, yellow flesh. Very early and prolific. Of fine flavor. Lb. 10c; pk. 40c; bu \$1.25; bbl. \$3.25.
SWEET POTATO PLANTS-Above varieties, 50c

per 100; \$2.50 per 1,000.

All Prices on Potatoes Subject to Market Changes. For large quantities, please send for special prices.

NORTHERN GROWN SEED POTATOES

No Potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDJM FROM DISEASE, or PRODUCING and LONG KEEPING OUALITIES

Our seed potatoes have been carefully and especially grown for seed. We are pleased to say that the quality of our stock is as fine and pure as was ever grown.

Advantages of Changing Seed

There is no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as the potato. They seem to take on new life and to prosper wonderfully, provided the change is to a well selected stock, and the further north it is grown, the better. Our best custom is will not plant their own raising of seed at all, but buy of us every year. They can grow nearly double the crop on the same land that they can from their own raising, and the tubers are smoother, handsomer and better quality and more saleable on the markets. A good change of seed always pars.

Out of hundreds of varieties, grown by us and others, we are offering our patrons a collection of Choice Seed Potatoes, selected on their merits for quality and productiveness which cannot be equalled. With the endless which cannot be equalled. With the endless variety of potatoes listed, we realize the difficulty to make a selection from the majority of catalogues which would meet the requirements. Especially when so much similarity ex-lets in a large number of kinds. Our collection embraces the distinct and leading up-to-date sorts, and we are confident every one desiring the moneymakers will realize the great results which may be obtained by planting these sorts. Terms—Cash with order. Express or Freight charges to be paid by purchaser, (FRICES SUBJECT TO MARKET FLUCTUA-TIONS.

We cannot guarantee delivery in good order, will ship in good condition, but will not hold ourselves responsible against loss either by heat or When wanted in large quantities, write for special prices.

EARLY OHIO-Early Oblo is the most popular early obtato in this country. We have more calls for it than for any other variety. Every potato grower knows what it is, and knows just about what it will do in his locality. It is the about what it will do in his locality. It is the standard extra early the country over, and other varieties are measured by it. We will venture to say that not one farmer in ten, the country over who thinks he has Early Ohlo has pure stock. Most of them do not know that they are mixed. But Early Ohlo is an old variety and has become frightfully mixed throughout the United States. Parmers and market gardeners better sell off their own Ohlos and get some of our nurs in their own Ohios and get some of our pure im-

proved, grown from Red River Valley seed.

We consider our stock of Ohios to be the earlest, purest and altogether the handsomest stock est, purest and altogether the handsomest stock of Early Ohlo potatoes to be found anywhere. On these points we challenge comparison with stock frem any other source. We do not admit that its equal exists among Early Ohlo potatoes. They are grown under conditions that make them cost more than common stock. They are selected with the utmost care and the result is grand, such as to delight everyone who knows and appreciates a good potato. Every one of them is a "picture" of what an Early Ohlo potato ahould be. 1 lb, 10c; pk, 35c; bu, \$1,20; 5 bu, \$5.08. exhibit a seedling of the Early Ohlo, which it closely resembles in every way. The pointoes grow so rapidly that under favorable circumstances in six weeks they are as large as hen's eggs, and therefore fit for family use in six weeks from the time of planting. Lb. 10c; pk. 35c; bu. 81.20; 5 bu. 35.0.

RED BLISS TRIUMPH—This new early potato is now attracting wide attention. This variety is also known by the names of Improved Remanda and Stray Beauty. It combines the wonderful productiveness of the old Peerless with all the good qualities of the Early Rose, is much

more productive and matures its crop at least a week in givence of the Early Rose. Tubers are of medium size, round and uniform in shape, with but a very few small ones; eves slightly depressed; color a beautiful light red. Its great beauty, preductiveness and fine quality make it one of the best extra early red market varieties.

They are not only the earliest potatoes, but the heaviest yielders and the best cookers of all the extra early varieties, and although they grow very rapidly, they are never hollow. For these reasons they bring the highest price of any potatoes, ranging from one and one-half times to four times the value of the ordinary prime eating petato. The Triumph has been grown quite extensively in Wisconsin and Minnesota for five years, and the price of them is as high as it was the first year. The Triumph has come to say and will undoubtedly bring more money than any other potato for years to come. Even though the seed does cost more, they are the most profitable potatoes to buy for raising seed potatoes to sell

We have never advocated the planting of any but popular and well known varieties of potatoes, because such are wanted and sell readily, when unknown and new varieties are hard to place; but the Red Bliss Triumph have won their way, and we recommend them as the best early potato in the world, and the most profitable to the grower. Price: Lb. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.00.

CMAHA EARLY ROSE—Now we offer you a new Early Rose named after our own beautiful town. It is earlier and the tubers larger than the old and popular Early Rose, and under ordinary field culture will yield 250 to 300 bushels to the acre. We know you will be more than satisfied if you give this fine new sort a trial, as it is the standard early potato; rosy blush skin, white fieth; early, productive, and of excellent flavor; a fine keeper. Lb. 10c; pk.35c; bu.\$1.20; 5 bu.\$3.00

EXTRA EARLY BOVEE—The Introducers Statement—"When we introduced Extra Early Bovee potatoes, our own tests and the opinions of others led us to claim a good deal for it, and our confidence has not been misplaced. Not only is it the earliest, but it takes a leading place among the heavy cropping varieties, an unusual thing among first earlies. It is even earlier than Early Ohio, and compares favorably with Triumph. The Bovee, in all competitive trials, has outyleided all the early potatoes, and in many of the tests conducted by Experiment Stations and private growers is has outyleided even the late varieties. The vine is dwarf and stocky, enabling 4t to be planted six inches closer than nearly all other varieties, which results in a much

larger return per acre, and is a feature of the utmost value where land is valuable. The tubers grow remarkably close, all bunched together in the hill close up to the vine. (See cut.) They size up to a marketable size more evenly than any potato we ever saw; none too large or too small; practically the whole crop being merchantable and the quality perfect. The potato is very smeoth, plakish cast, very few eyes, which set very shallow. Wehave only one warning—it is apt to prove disappointing on poor soil or with poor cultivation, as it sets so freely the tubers are apt to be small. But on good potato ground, well fertilized and cultivated, no other early potato today compares with it. Price: Lb. 10c; pk. 35.8 bu. \$1.20; \$ bu. \$5.00.

BURPEE'S EXTRA EARLY-One of the earliest varieties; it has proved to be ten days to two weeks earlier than Early Rose. Beauty of Hebron, Early Puritan, etc.; fully one week carlier than the ordinary Early Ohio and nearly twice as productive. Lb. 10c; pk. 85c; bu. \$1.25: 5 bu. \$5.00.

IMPROVED THOROUGHBRED

IMPROVED THOROUGHBRED—If fine table and long keeping qualities, combined with great productiveness ever warranted the introduction of a potato, we are justified in sending out the Thoroughbred, believing it will find favor with all who grow it, and that it will take care of itself in the battle for popular favor.

The Thoroughbred is a second early and main crop potato; is productive to an extraordinary degree. The tubers are bunched closely in growing, which materially lessens the labor of harvesting. The potato itself is of the size and shape

best liked in the leading markets. Eyes are few and nearly flush with the surface. In quality nothing can surpass it. In fact, in this particular we know of no sort that equals it. Its snowy whiteness when cooked, together with its dry and floury nature, has made it a favorite on every table where it has been tried. The testimonials that have been received from purchasers of this variety in previous seasons show that it succeeds over a wide range of territory and under most varied conditions. Lib. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.00. bu. \$5.00.

When wanted in large quantities, write for

Special Prices

All Prices are Subject to Change.

RURAL NEW YORKER NO. 2—Well known now the country over, and very largely planted for a profitable main crop. Rurals are now quoted in all the leading markets of the country along with Burbanks and other standard sorts, and usually they are quoted higher than Burbanks. They are certainly more profitable to raise.

When Rural No. 2 first made its appearance as sent out in 1889 by the Rural New Yorker, it introduced an entirely distinct class of potatoes,

unknown up to that time. The class is characterized by a long, rather spindling vine, with dark-colorel stalks, dark green leaves and purple blossoms: tubers nearly round, flattened, with very smooth, pure white skin, uniform in size, quite numerous in the hill, always very attractive in

our stock of Rural New Yorker this year is a spiendid one, and our prices are certainly very reasonable. Lb. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.06.

CLOVER AND GRASS SEEDS

Prices subject to fluctuations. If wanted by Mail, add for postage 8c a pound extra

Market prices on application

We pay particular attention to this department of our business. These seeds are selected with special reference to their quality. Purchasers may rely upon our best endeavors to furnish Grass and Field Seeds fresh, pure and free from noxious and foreign seeds—all recleaned by the best machinery to make them choice.

On account of the early publication of this Catalogue we cannot guarantee the following prices on Clover, Grass and Field Seeds. These are market articles, and prices are subject to variation, but purchasers may depend on having them at the prices rdling from store that date, and of the best quality, and that we will always send as much seed as the money received will pay for. Market prices of the day or special prices on large lots cheerfully given on application. Express or freight charges always to be paid by the purchaser, except when sufficient money is sent to prepay charges. Two bushel bags 20 cents each extra.

RED CLOVER-This species is regarded by far the most important of the whole genus for the practical purpose of agriculture, being valuable not only as a forage plant, but also for It has its fertilizing properties on the soil. very long and powerful tap-roots, and when these roots decay they add largely to that black mass of matter called the soil. As a forage plan, it makes an excellent quality of hay, and can be cut at least twice a year. Sow about twelve or fifteen pounds to the acre. 60 !bs per bushel. Lb. 20c; bu. \$7.50-\$8.00-\$9.00.

MAMMOTH OR SAPLING CLOVER-Compared with common Red Clover, its flower, foliage and stems are of a darker color, and its seed is the product of the flower of the first crop, while the seed of the common Red Clover is the product of the flowers of the second crop, and different in some other characteristics of It is valuable when sown little importance. with other grasses for mixed hay, as it ripens later than the common Red Clover, and about the time that Timothy, Orchard and other grasses ripen, thereby making the hay a much better quality. Being a very rank grower, it is coming into very general use for soiling purposes. Sow twelve to fifteen pounds to the acre. Weight, 60 lbs. per bushel. Lb. 20c; bu. \$8.00 -\$8.50-\$9.00.

ALSYKE, OR SWEDISH CLOVER-This clover comes from the little province of Alaska, in It is one of the hardiest varieties known, being perennial and absolutely refuses to winter kill; it is alike capable of resisting the extremes of drouth or wet. It is a great favorite with all who have tried it. Produces annually a great quantity of herbage of excellent quality. Sow in spring or fall about eight or ten pounds per acre. Weight, 60 pounds per bushel. Lb, 20c; bu. \$8.00-\$8.50-\$9.00.

WHITE DUTCH CLOVER-An excellent pasture clover, forming in conjunction with the Kentucky Blue Grass, the finest and most nutritions food for sheep and cows. Sow five or six pounds to the acre. Weight, 60 pounds per bushel. Lb. 30c; bu. \$10.00-\$11.00-\$12.00.

ESPERSETTE, OR SANFOIN (HEDYSARUM ONOBRICHIS)-This is a leguminous plant with many stems from two to four feet long, tapering, smooth, leaves in pairs of pointed, oblong leaflets, slightly hairy on the under side, flower stalks higher than the leaves, ending in a spike of crimson or variegated flowers, succeeded by flat, hard pods, toothed on the edges and prickly on the sides, root perennial, Flowers in July. Espersette hardy and woody. Flowers in July. Espersette is considered an indispensable forage plant, improving the quality of milk when fed to milch cows. It is especially adapted to dry soils, sands, gravel and barren regions, with rainfall scurce and irrigation unobtainable. To produce a good stand sow forty to fifty pounds per acre. Weight, 24 pounds per bushel. Lb. 15c; bu. \$2.50.

CRIMSON TREFOIL CLOVER-This is annual variety, in common use in Italy and the south of France for feeding green. It is also grown largely and successfully in Virginia, where it is called "German Clover," and we think it would do well here in our Western States. It is from two to three weeks earlier than Red Clover, and for this reason very desirable. The yield in fodder is immense, and, after cutting, it at once commences growing again, and continues until severe, cold, freezing weather. It grows about one foot high; the roots are nearly black; leaves long; blossoms long, pointed and of a very deep red or carmine color. Makes good hay. Sow in the fall, fifteen pounds of seed per acre. Weight, 60 pounds per bushel. Lb. 15c; bu. \$5.50.

WHITE BOKHARA CLOVER-This is a tall, shrubbery-like plant, growing to the height of four to six feet, with branches whose extremities bear numerous small white flowers of great fragrance. It should be sown in spring, in drills twelve to sixteen inches apart. Ten pounds will sow one acre. Weight, 60 pounds per bushel. Lh. 25c; bn. \$9.00.

ALFALFA OR LUCERNE

The Grandest Hay and Forage Plant Ever Introduced

Alfalfa

ALFALFA-This is the best forage plant that can be grown. It will produce more forage per acre, either green or dry, than any other known clover or grass, and is being more extensively panted every season. The reasons why it is meeting with such universal favor are many, but can be summed up as follows:

It successfully resists the flercest drouth. In

the driest weather when every blade of grass withers for want of moisture, alfalfa stands up as fresh and green as in the spring.

It is proof against our severest winters. Excessive rains and snows, the long continued freering weather of winter does not affect it in the least. If the soil is well drained it will succeed, and for many years continue to flourish and produce wonderful crops of the richest

It is adapted to dry and sandy soils where other plants fail to grow, as well as those that are deep and rich. Its roots often measuring 20 to 30 feet in length, force their way down deep line the subsoil in search of moisture, and plant food that cannot be reached by any other plant.

plant.

It is "perpetual life." A successful stand will last from ten to forty years. constantly yielding heavy crops which may be first cut in May. a second crop in July, a third crop in August, and with a good curing season, a fourth crop can sometimes be harvested, yielding two to three tens of the most nutritious hay at each cut-

All in all, it is the grandest forage plant on earth, and cannot be too highly recommended.

The yield of seed this year has been very small; and the quality of the seed in general is very poor. We are pleased to state that we began early buying the best grades obtainable and now have a fine lot of seed on hand. Alfalfa is the cheapest forage crop that can be sown. Invariably, the first season the returns are double the cost of seeding.

Sow early, from 20 to 30 pounds of seed to the Some seedsmen recommend at the rate of 10 to 12 pounds of seed per acre. This is a fatal error, and has been the primary cause of several failures in obtaining a good stand. It must be seeded heavily in order to get a good stand and have a fine quality of hay.

Cut when in full bloom, rake into winrows and let dry until the leaves, if roughly handled, are inclined to fall off, then lay in piles, one forkful

in each pile to cure. Weight 60 pounds per bushe \$2.25; bu. \$8.50; second grade \$7.50. per bushel.

DOUBLE YOUR CROP-But do not spend a lot of money for unnecessary fertilizers. Science has discovered a nitrogen-gathering bacteria that fertilizes the soil. How? By drawing free nitrogen out of the air and depositing it as plant food in the soil. Science has also discovered how to produce and use this harmless germ to make crops grow where they never grew before. NITKO-CULTURE does it. Did your alfalfa or clover fail to catch? Did it winter kill? Did it turn yellow and die? Did it winter kill? Did it turn yellow and die?
Then use Nitro-Culture. Simply inoculate the seeds before sowing, with a solution containing the germs. You'll get a full catch and largely increased crop. \$2.00 worth will materially increase. your yield per acre. Results guaranteed.

Nitro-Culture catalogue free. See page 38.

TIMOTHY (PHLEUM PRATENSE)—This is decidedly the best grass for hay, making a large return on strong, rich clay, of medium state of moisture. Sow twelve to fitteen pounds per acre. Weight, 45 pounds per bushel. Lb. 10e; bu. \$1 50; 5 bu. \$7.00.

TALL MEADOW OAT GRASS (AVENA ELATIOR)—This produces an abundant supply of foliage, and is valuable for pasturage on account of its early and luxuriant growth. Sow three bushels to the acre. Weight, 14 pounds per bushel. Lb. 25c; bu. \$2.50. Weight, 14 pounds

ENGLISH PERENNIAL RYE GRASS (LOLI-UM PERENNE TENUE)—A highly esteemed grass in Europe, either for lawn or pasture, On good soil it yields a large return of valuable forage. For pasture sow about two bushels to the acre, and for lawns, about three bushels. Weight, 20 pounds to the bushel. Lb. 15c; ba.

(SORGHUM GRASS PENSE)-This is a species of the Sorghum family. It is an excellent grass for grazing, and contains a large percentage of succharine matter. Sow about one busilet to the acre. Weight, 25 pounds per bushel. Lb. 15c; bu. \$3.00.

Dwarf Essex Rape and Speltz. See page 33

Turkestan Alfalfa or Lucerne

Medicago Sativa Var. Turkestanica

Perfectly Hardy. Withstands Drouth, Heat and Cold. Yields the Heaviert and Richest Crops of Fudder. The Best Clover for Permanent Hay and Pasture.

The importance of forage crops has occupied our attention many years, and we are constantly on the alert for new varieties. Turkestan Alfalfa we believe to be the most important introduction in late years. Its value can hardly be estimated, but without doubt it will add millions of dollars to the annual hay crop of the United States,

The seed was first secured from Russian Turkestan by Prof. N. E. Hanson, while engaged as agricultural explorer for the Department of Agriculture, Washington. In 1895 and 1889, 1,101 packages of the seed were distributed by the Secretary of Agriculture throughout the United States, and upon careful investigation it has proved vastly superior to the common Alfalfa, inasmuch as it withstands extreme drought and cold much better.

Value as a Fodder Plant on Dry Arid Soils-The climate of Turkestan is not unlike that of our interior States, being far removed from the ocean and surrounded by wide expanses of dry land, The summers are very hot and long, and in many places the evaporation exceeds the quantry of moisture that has fallen during the year. The inhabitants are mainly employed raising cattle, and here it is this Alfalfa grows and flourishes. We have every reason to believe it will prove equally as valuable in this country.

Withstands Extreme Cold Without Injury.— At the Experiment Station, Brookings, S. D. with a minimum temperature last winter of 40 degrees below zero with the ground bare, common Alfalfa was killed, while Turkestan came through unharmed. At the Wyoming Experiment Station the Turkestan Alfalfa was exposed to a minumum temperature of 45 degrees below zero without harm.

Good Crops on Alkali Soils.-The introduction of Turkestan Alfalfa permits of a great ex-tension of the area heretofore devoted to the cultivation of Alfalfa, and this, too, in sections where climatic conditions have almost prohibited the growing of leguminous forage crops. Not only does it endure extreme drought and cold, but excellent crops of it have been raised on strongly alkaline soils.

The plants grow strong, more leafy with slender and less woody stems than the common thereby making a finer and more ous hay. For its cultivation follow the nutritious hay. general directions given for common Alfalfa. The seed we offer is imported direct from Tur-

Turkestan Alfalfa

Lb. 25c; pk. \$2.50; bu. \$9.00. kestan, Lb. 25c; grade \$3.00 bushel.

Trans-Mississippi Lawn Mixture

All the lawns at the Exposition were sown with The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture, identically the same as we offer te our customers, any one of whom can with oldinary care, equal and even surpass the realits obtained at the Exposition, if the simple directions be followed which are printed on every packet of our Trans-Mississippi Lawn Mixture. The grass seeds we use in The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture were exhibited by us at the Exposition and received a Gold Medal award along with the rest of our

That The Nebraska Seed Co.'s Trans-alississippi Lawa Mixture is the finest mixture ever offered, the immense quantities we sold the Exposition As-sociation is a very good proof. It is the best

seed for our American climate, and is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvery lawn is constantly maintained. The green, velvery lawn is constantly maintained. The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture is the result of several years' careful experimenting, and as we now offer it, the Lawa Mixture is unequaled. It may not also be generally become that it is relatively separating the characteristics. known that it is, relatively speaking, the cheapest seed offered.

est seed offered.

The quantity required for making new lawns is four bushels per acre, or for renovating old lawns, one to two bushels. For a plot 15x20, or 350 square feet, one quant is required for new, or one plut for renovation. Price, 25c per quart, \$1.00 per peck; \$1.35 per ½-bu.; \$2.00 per bu. (If wanted by mail, add at the rate of 7c per quart for postage.

For Northern Grown Seed Potatoes, See Pages 24, 25 and 26

Bromus Inermis.

BROMUS INERMIS

Drouth Defying Frost Resisting

Yields enormous crops of splendid hay and affords early and abundant pasturage. Our best grade of this magnificent grass is unequalled for purity and high germination, and less seed of it is required to the acre than any other grade.

> From Good Seed, Good Crops Grow.

Bromus Inermis. The Coming Grass for the West and Arid Lands

Bromus Inermis.

HUNGARIAN, OR AWNLESS BROME—GRASS (Bromus Inermis)—Is the best all around pasture grass that has ever been introduced. It is a native of Hungary, but it seems to be adapted to the prairies of the West, the cold regions of the North, and the hot plains of the South better than any other grass.

It is a strong-growing perennial grass with smooth, leafy stems, which grow from one to four feet high. It forms a tough sod, soon crowding out other common forage plants. It is very hardy. The underground stems, (root stalks) grow more rapidly in light, sandy loam, but they penetrate with apparent ease the stiffest clay, and in all cases form a dense, tough sod.

For several years past we have lost no opportunity, either through our catalogue or by personal correspondence, to urge its value on those who have not yet used it and whose attention has not been particularly drawn to its great and upquestionable meetics. unquestionable merits.

we believe that the introduction of Bromus Inermis has added \$5 to the value of every acre of land in the West, especially in the Dakotas, Montana, Washington, Nebraska, Kansas, Idaho, and other states having within their boundaries large areas of land which will not under ordinary circumstances yield a crop of grass. Its introduction has added millions of dollars to the productive capacity of these states, thus increasing the value of every acre within the state.

Bromus Inermis comes to us from Russia. On

value of every acre within the state.

Bromus Inermis comes to us from Russia. On the great prairies of that country this marvelous grass thrives luxuriantly. It stands year after year, yields enormous crops of excellent hay, and furnishes, both early and late, rich and abundant pasture. It is an inestimable boon to countries where clover does not thrive and where timothy and other grasses, either tame or wild, yield a light and decreasing crop of hay.

It is a thoroughly established success in the West. It is a "cosmopolitan" grass, adapting itself to almost every condition of soil or climate and to any use to which grass may be put, equaling in quality and rivalling in yield almost every other grass, registing extremes of temperature,

whether of heat or cold, profitable to sow anywhere, but most valuable for its wonderful power to grow under dry conditions. Its supreme adaptation for the semi-arid belt that lies west from the Rocky Mountains and extends northward from Okiahoma to the Alaskan boundaries, renders it a vertible Godsend to the people of that region.

a vertible Godsend to the people of that region. The worth of this grass to all parts where clover is not as yet a decided success, is beyond all estimate. Those owning lands in the West should not neglect any longer establishing this important grass on their farms. Get a start, even though you can this year seed only a small area. You can raise your own seed for further requirements, and there will be such a demand for this seed for years to come that this alone would make one of the most profitable crops possible to grow.

ble to grow.

Bromus Inermis is not an experiment; it is a proven success, and it is to be hoped that this year every one who can possibly do so and who cannot if he tries?-will get a start with the grass.

SOWING—Bromus Inermis may be sown at any time of year when the ground is bare, but the preferred season for sowing in the West is in the early spring, with or without a nurse crop, but is better sown alone. The seed is large and light and it has been generally supposed that it could only be sown by hand, but the special "Thompson Wheelbarrow Seeder" handles this and other grass seeds perfectly and rapidly and we have arranged seeds perfectly and rapidly, and we have arranged to make special prices on this seeder to those who purchase their seed from us. Sow 28 lbs. per acre. Weight, 14 pounds per bushel. Lb., 20e; bu., \$1.50; 5 bu. \$6.75.

> See Page 33 for Dwarf Essex Rape and Spetts

Don't Overlook Turkestan Alfalfa, Page 29 KENTUCKY BLUE GRASS (POA PRATENSIS)

-This is the best pasturage for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle, retaining its qualities to a late period in the winter. Weight, 14 pounds to the bushel. Fancy cleaned seed, lb. 15c; bu. \$1.00.

EED TOP (AGROSTIS VULGARIS)—A valuable grass. If sown on meist, rich soil, it will grow two feet, and on poor, sandy soil, about haif that height. Sow fifteen to twenty pounds per acre. Weight, 14 pounds per bushel. In chaff. lb. 10c; bu. \$1.00. Free from chaff, lb. 15c; bu. \$1.50.

ITALIAN RYE GRASS-In nutritive earliness and quickness of growth after it has been mown, it far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years, it is of no use in permanent pastures. The soils best adapted to Italian Rye Grass seem to be those that are moist, fertile and tenacious, or of a nacdium consistency, and on such soils it is said to be one of the best grasses known to cut green, affording repeated luxuriant and nutritive crops. Sow thirty to forty pounds to the acre. Weight, 25 pounds per bushel. Lb. 15c; bu. \$2.00.

The Nebraska Seed Co.'s Golf Link Mixture

There is no use to which a lawn is put that is so exacting as that used for Pleasure Grounds, Golf Links, etc. No other turf is required to stand such wear and rough usage; hence the necessity of sowing such grasses as will produce a thick and healthy growth, and withstand the constant tramping of many feet. We have devoted much time to experimenting, in order to produce the correct mixtures, such as will quickly produce a rich green turf. For sowing the seed follow same directions as for Trans-Mississippi Lawn Mixture. Price per pound, 25c; 5 lbs. \$1.00; ½-bu. \$1.25; bu. \$2.25.

Meadow Fescue

Orchard Grass

English Rye Grass

MEADOW FESCUE, OR ENGLISH BLUE GRASS-Grows two or three feet high, but never in large tufts like Orchard Grass. of the earliest, most nutritious and productive It is especially suitable for permanent pasture; thrives well in all soils, but to ent pasture; thrives well in all soils, but to best advantage on moist lands. Makes good hay and cattle thrive well on it, whether dry or in a green state. It succeeds well even in poor soil, and, as its roots penetrate the earth twelve to fifteen inches, it is not affected except by exceedingly dry weather, and is as valuable a fertilizer as Red Clover. It is one of the hardlest grasses after a good stand is secured; it will stand more freezing than any other variety. It yields an abundant crop of seed, about eight to ten bushels per acre, which can be threshed by any threshing machine. Notwithstanding its acknowledged merits, this grass has been sown only to a limited extent in this country. It is deserving of much more attention than it has heretofore received from our western farmers. Sow about twelve to eighteen pounds per acre in spring or fall. Weight, 24 lbs. per bushel. Lb. 15c; bu.

ORCHARD GRASS—No farm should be without a small field of Orchard Grass, as in many respects it is superior to all other grasses, stands the drouth, grows well in the shade, does well in wet and poor ground, and is splendid to prevent worn-out fields from washing. This grass furnishes excellent pasturage three weeks before any other and after close grazing, ten days' rest any other and after close grazing, ten days' rest is sufficient to produce another growth. Cows fed on this will produce more and richer milk than on Blue Grass. It makes a very heavy sod, and when well set remains for many years. It is especially adapted for winter grazing, as it remains green all the season. Sow twenty-five to thirty pounds to the acre. Weight, 14 pounds per bashel. Lb. 25c; bu. \$2,00.

FLAX SEED

It will pay farmers to buy their flax seed and quit the process of raising it under contract for the mills. It is a quick crop to grow and always finds sale at a fair price.

RUSSIAN FLAX-A great improvement over the common American flax. Seed double the size. Yields 12 to 14 bushels per acre. Lb. 10c; pk. 50c; bu. \$1.60.

BROOM CORN

WILSON'S IMPROVED TENNESSEE EVER-LAST-ING-This Broom Corn grows about 8 to 10 feet high, stands up well and is entirely free from croked brush. The fibre is long and fine and will always command the highest price; b 1(c; 1k, 6(c; bu, \$1.25)

MISSOURI EVERGREEN -- Is a favorite of Kansas, Nebraska and Missouri. Lb. 10c; pk. 60c; bu. \$1.25.

PEANUTS

Peanuts can be cultivated as early as potatoes. They yield largely and are a paying crop. Plant d in April, they ripen in August. Lb, 15c; 10 lbs, \$1.25.

BUCKWHEAT

Buckwheat should be sown about the middle of June, broadcast, at the rate of from one to three pecks per acre.

NEW JAPANESE BUCKWHEAT-We advise all who are growers of Buckwheat to give this new and distinct variety a trial in preference to any other variety, whether it be for milling or for the apiary or aviary. Lb. 10c; pk. 50c; bu. \$1.50; 5 bu. \$7.00.

SILVER HULLED-A greatly improved variety. is in bloom longer, matures it; crop socrer and yields twice as much as the ordinary sort. Lb. 10c; pk. 50c bu \$1 50; 5 bu. \$7.00.

COMMON-The old, well known sort. Lb. 10c. pk. 45c; bu \$1.45; 5 bu, \$7.00.

MIL ET

EARLY FORTUNE MILLET-A most promising new variety, of which astonishing yields are re-

ported. It is very early, and it is claimed to be rust proof, and that chinch bugs will not eat the plant The seed is very beautiful and distinguished in appear-Price Fancy Recleaned Early Fortune Millet, lb 10c; peck, 40c; per bu \$1.75.

MANITOBA, OR HOG MILLET.-This has come to be one of the most valuable crops that the farmer can raise, the seed being the richest and most valuable hog food that can be produced, while the hay is very valuable for stock. A very much prized peculiarity of the New Manitoba is that the seed ripens while the hav is yet green, when if cut promptly can be threshed for seed, while the hav makes excellent fodder after being threshed. Lb. 10e; pk. 40c; bu. \$1.25.

GERMAN OR GOLDEN MILLET.-Grows three to five feet high, heads closely condensed, spikes very numerous, seed round, golden yellow, in rough sheaths Sow thirty to fifty lbs per acre. Weight 50 lbs per bu. Lb. 10c; pk. 35c; bu. \$1.00.

COMMON MILLET (PANICUM MILLIACEUM) -Very early; grows two or three feet high; foliage broad. Sow in drills broadcast from May 1 to June 20 if for seed, or until the last of July for hay. For grain sow in drills; use 30 to 50 lbs, per acre. If for hay, sow broadcast 50 lbs. Weight 50 lbs. per bushel. Lb. 13c; pk. 30c; bu. 90c.

HUNGARIAN GRASS-PANICUM GERMANICUM A valuable forage plant, withstands drouth, yields well on light soil. Sow broadcast at the rate of thirtyfour to forty-eight pounds to the acre and cultivate the same as Millet. Weight 48 pounds per bu. Lb. 10c; pk. 35c; bu. \$1 00.

THE NEW SIBERIAN—The most wonderfully productive and satisfactory forage plant, possessing in a superior degree all the essential merits of any of the superior degree all the essential merits of any of the foldersorise exceeding them by far — besides many other points of excellence that distinguishes it and renders it a most valuable addition to the list of forages and the claims are well founded which destines it to take front rank, if not lead of all the rest. It is said to have come from Russia, which would, of course, give it vigor and hardiness not possessed these originating in a warm climate. Lb. 10c; pk. 30c; bu. 90c.

JAPANESE MILLET.

All things considered we call this the most valuable thing in our whole list of forage plants. It has been sold under different names, as "Billion Dollar Grass," "Steel Trust Millet," etc., but they are all one and the same thing. We recommend it for the

following reasons: First. It n akes more hay than German Millet or any other.

Although it grows so large, sometimes Second.

second. Although it grows so large, sometimes seven or eight feet high, the hay is of most excellent quality, superior to corn fodder.

Third. It is adapted to all sections and a great success wherever tried. It does well on low ground. Fourth. Two crops a season may be cut from it, or, if left to ripen, it will yield almost as many

bushers of seed per-acre as oats. Fifth. It requires less seed per sore than any other millet, 20 to: 0 lbs. being sufficient.

Six'h. It makes fine silage, especially if mixed with Soia Beans or Sand Vetch.

Seventh. It is highly endorsed, and recommended by the U.S. Department of Agriculture, by all Experimental Stations and by seedsmen generally.

Be sure to order of us, as we are headquarters our prices it is even cheaper than German Millet, as it requires only half as many pounds to seed an acre. Therefore, the expense cannot stand in the acre. Therefore, the expense cannot stand in the way of trying it this year. Do not be afraid of it becaus it is now. Treat it just exactly as you would German Millet, only sow it a little earlier for st results. The latter part of May is about We know it will please you. 1 lb. 10c; pk. the best results. 50; bu, \$1.50.

> TURKESTAN ALFALFA. See Page 29.

RAPE=TRUE DWARF ESSEX

One Acre of Rape will Pasture 20 Sheep for Two Months

DWARF ESSEX RAPE—Is an annual, bearing a close resemblance in leaf and stalk to the Ruta Baga, but both leaves and stalks are more numerous in the Rape plant, and of a taller habit of growth. It is a pasture plant which may be eaten by any kind of live stock, but it is pre-eminently fitted to furnish pasture for sheep and swine. A good crop will furnish at least twelve tons of green food per acre and its nutritive value is nearly twice that of clover. One acre of well grown Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market. Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slotigh lands are excellent. This plant may be grown successfully in the following ways, viz.: First—In the early spring to provide pasture for sheep and, swine. Second—in June or July on well prepared land to provide pasture for sheep. Third—Along with grain, using two ibs. of seed per acre to provide pasture for sheep, and to get a "catch" of clover. Fifth—Along with corn drilled in broadcast to provide pasture for sheep, and to get a "catch" of clover. Fifth—Along with rorn drilled in broadcast to provide pasture for sheep. Sixth—In corn, sowing the seed with the last cultivation giver to the corn. Seventh—Along with rye sown in August in sheep pastures. When the Rape is sown broadcast, 5 lbs. of seed per acre will suffice When sown in rows, say 30 inches apart, and cultivated, from one to two lbs, will be enough. It is now being grown in the United States from the Atlantic to the Paclific ocean. The day is not far distant when it will be grown extensively as a pasture for swine. Billions of sheep and lambs will be fattened on it in the United States. A director of one of the Agricultural Experiment Stations says: "We had one-half an acre of Rape this year, which gave an actual yield of 9% tons, or at the rate of 19% tons per acre."

Reware of the kind of Rape seed you sow. There is only one sort of any value in this country for s

Fisrex Rape seed every year from Essex County, England, and know it to be genuine, and of the very best quality, which alone is a sufficient guarantee, worth much more than the price of the seed. This is the article to sow this year, as the seed. seed. This is the article to sow this year, as the price is lower in proportion than on any other fueder crops. Price, lb. 15c; 10 lbs. at 12c per per lb; 25 lbs. at 10c per lb; 50 lbs. at 8c per lb; 100 lbs. at 6c per lb.; 500 lbs. at 5c per lb.

Speltz

A wonderful new grain that is now attracting great attention. It is neither barley nor onts, but somewhere between the two, atthough it resembles wheat and when ground into flour is somewhat like rye flour. Thus it is a kind of combination grain. We believe it will prove of much value. For centuries past it has been grown in a limited way in Eastern Russia, its value not being known to the agriculturalists of the civilized world. An emigrant from there brought some to this country and has been growing it. A prosperous American farmer who lives near him secured sufficient seed from him to sow five neres and was surprised at the large to sow five acres and was surprised at the large crop. It yields more than barley or oats. He says that under the same circumstances it will produce double as much as barley. He has been feeding the grain quite extensively and it is one of feeding the grain quite extensively and it is one of the best horse feeds known. The chaff adheres to the grain when threshed. It has given splendid satisfaction to all who have tried it. Will grow anywhere and will produce Immense crops on poor soil; the dry weather appears to have no effect on it, and it can be raised and threshed, like any other grain. Can be cut while green and used for fodder. If cured for hay it makes a better quality of hay than millet and outvicids it three-fold. Botanically it is known as Trificum Spelta, and is supposed to be the grain grownin Egypt in the time of Moses. Price lb. 10c; ½ bu, 40c; bu, \$1.25; 5 bu, \$5.75.

> Bromus Inermis, Drouth-Pefeing, Frest-Resisting. See Page 30.

OATS-Improved Prize Cluster

THE EARLIEST OF ALL OATS To maintain high-grade oats it is necessary to have a change the earliest Of All Oats-to maintain high-grade oats it is necessary to have a change of seed every few years so as to keep up our standard of excellence, for oats grown on the same soil year after year gradually become light and chaffy. We have for the past five years been working up a stock of Prize Cluster Oats from the parent stock, of which the director of the Iowa Experimental Station spoke so highly. In his report he places Prize Cluster at the head of the list of all varieties tested, both for bulk of crop and weight per bushel. It is a white variety, with very large heads and heavy, plump grain, straw of medium growth, and entirely rust-proof. In our selected Prize Cluster Oats we claim to have one of the best, heaviest and thinnest shelled oats in cultivation. Pk. 40c; bu. \$1.50; 2½ bu. \$3.00; 5 bu. \$5.75.

LINCOLN—After ten years' trial, has proved itself the most popular of any oats yet introduced. We call attention to the following special points of excellence. 1st—It is very productive, having in all instances yielded more to the acre than any other sort grown in the same locality, in one case having yielded 174 bushels from a single bushel of seed. 2nd—It is very early. 3rd—It has thus far proved itself rust-proof. 4th—It stands up better than any other sort. 5th—It is best for feeding on account of its thin hull, heavy ear and soft nib. 6th—It is best for oatmeal or grinding for the same reasons: Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.50. 5 bu. \$4.50.

CANADA RED BEAUTY OATS.

Canada Red Beauty Oats mark such a distinct advance over all other varieties, especially in point of productiveness and strength of straw, as to set them apart and above all other oats. They are in a class of their own, and in the particulars above mentioned are not approached by any other oat.

They are preferred by those who have had ex-

reperience with them, principally on account of their superior yielding qualities, but besides being fully equal, if not better than white oats in point of feeding qualities.

Lb. 10c; pk. 35c; bu. \$1 00; 5 bu \$4.25.

PROBSTEIER OATS—This new and wonderful variety originated from Germany a few years ago. One of the most prosperous farmers of this state was fortunate enough to secure a fer pounds of this wonderful oats, which he carefully planted and cared for. He was convinced that the oat would do well in this country and put the same to all sorts of tests, and it has proved to be the best oat for this part of the country. Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.25.

KHERSON OATS-Brought to America in 1900 by the University of Nebraska from the province of Kherson, Russia, with the idea of procuring an oat that would be hardy, a good yielder, and yet extra early. Small lots were sent out to farmers all over Nebraska, and the tests have proven that the oats far exceeded their highest expectation as to earliness, amount of yield, and ability to withstand our

heavy winds and not lodge.

We have secured our stock seed from a grower in we have secured our stock seed from a grower in Douglas county who received his start from one of these small lots furnished him four years ago by the Experiment Station. The Kherson Oats when ripe are a beautiful yellow in color, have fine, large sprangled or full heads which frequently contain more than 100 seeds. The stalk is stiff and does not lodge or rust. It has broad leaves, many of which are three-quarters of an inch wide; they extend to the roots and are so pliable that they stay on even through threshing. Unlike most heavy yielders these oats have a large grain with a very thin hull. Under favorable conditions they have yielded as high as 95 bushels to the acre in Nebraska. At the University Experimental Farm they made 74 bushel to the acre. Lb. 10c; pk. 85c; bu. \$1.00; 5 bu. \$4.25.

Seed Barley

MANSHURY—Is one of the very best sixrowed barleys grown, with kernels plumper and
faller than the best Scotch Barley, while for
malting it is the very best known. It is early
in ripening, which helps it to fill well, thus it
is slwars plump. Lb. 10c; pk. 40c; bu. \$1.25.

BLACK BARLEY—Weighing sixty-two pounds
to the measured bushel. Wonderfully productive,
and of great value for feeding and fattening cattize and hogs. It is exceedingly prolific, having
yielded 180 bushels of shelled barley from two
bushels of seed sown. Lb. 10c; pk. 50c; bu. \$1.50.

White Hull-less Barley.

WHITE HULL-LESS BARLEY-A novelty in

WHITE HULL-LESS BARLEY—A novelty in barley. Plump, heavy kernels, which, when thieshed, are hull-less, like wheat kernels. Early, prolline, well filled heads.

Mr. D. C. Carpenter says: "I have grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow early and you can cut two crops from the same sowing. As fattening food for hogs it has no equal. It makes sweeter meat by far than corn. I fatted 20 hogs for one butcher, and made a gain of 106 pounds to the kog in five weeks. I find the best way to feed it is to grind it and feed dry, with clear-colo water in another trough for them to drink out of. I have sown it as late as the 18th of June and made a good grain crop. It stools wonderfully." We have a fine stock of this barley of our own growing. With us it grew strong and thrifty, was yery early, stood up perfectly, and yleided as much or more than any other barley of the common bearded kinds around us. The field when headed out was a beautiful sight. This barley is very heavy and the kernels look like very large and plump wheat kernels. We recommend it as a novelty well worth trying. Sow only 1½ bu. per acre. Price: Pk. 50e; bu. (48 lbs.) \$1.50; 5 bu. at \$1.35 per bu.

Beardless Barley

NEW BEARDLESS BARLEY—All barley growers have experienced the annoyance occasioned by the chaing and sticking of the beards while threshing. This nulsthreshing. This nuis-ance has been overcome in the New Beardless Barley which is entirely free from beards. This barley is six-rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth wheat. with the exception of a small duck bill on the point of each grain. This comes off readily in threshing, leaving the threshed grain looking like any other white barley. Lb., 10c; pk., 50c; bu., \$1.50.

See Pages 24, 25 and 26 for Northern Grown Seed **Potatoes**

Winter and Spring Rye

RYE, WINTER—Our stock is No. 1 Grade—Price. Lb. 10c; pk. 35c; bu. \$1.00.

'RYB, SPRING—This grain is often planted by farmers especially for the paper makers, who prefer it to any other.—'Lb. 10c; pk. 50c; ba. \$1.75; 5 bn. \$8.00.

Winter Wheat

We have growing now the following varieties: Red Turkey, Fulcaster, Highgrade, Nigger, New Monarch, Golden Cross, Red Clawson, Jones Wis-ter Fife and others. Will be pleased to quote prices next fall in time for sowing.

Spring Wheat

VELVET CHAFF BLUE STEM—This is a remarkable semi-hard Spring Wheat, yielding extremely well in soft wheat states. No soft wheat will give better satisfaction than Velvet Chaff Riue Stem. Lb. 10c; pk. 45c; bu. \$1.25.

MACARONI SPRING WHEAT—New variety for the semi-arid district. "The thorough establishment of this new Wheat Industry will be the greatest benefit to agriculture in the semi-arid plains. A million or more acres can thus be given to profitable wheat raising which, on account of drouth heretofore have been entirely idle or less profitably employed. In a few years time the result ought to be the addition of thirty to fifty million bushels to the annual wheat production of the great plains alone."

In he West, especially the semi-arid sections, the conditions are ideal for producing this wheat. Ib. 196; pk. 50; bu. \$1.75; 5 bu. \$3.06.

Immense Crops Without Fertilizers

A new, sure and easy way has recently been discovered to make worn-out or poor land enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Heretofore fertilizers have been needed to put nitrogen into the soil. Nitrogen is very necessary—is the most expensive part of fertilizers. The new way is

easier, surer, cheaper-it is to let nitrogen-gathering

germs feed the plants.

The soil is full of air. Air is four-fifths free nitrogen. Think what limitless plant food, in the form of free nitrogen, the air contains. Right here the new discovery comes in. Plants can't extract nitrogen from the air, but there are germs that can. These germs have been discovered and are now being used for that

purpose.

These germs when put into the soil fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making many farmers rich. The germs do the work, the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other crops where they never would grow before.

The new way saves the cost of fertilizers and is very easy to use. The germs come ready for use, in a form called Nitro-Culture. Nitro-Culture is p t up in small, dry packages you can put in your vest pocket. Simply add it to water and sprinkle the water over the seeds before planting. The germs remain on every seed—live with it—increase about it—feed the roots when they start and keep on feeding them. They also enrich the foil by storing nitrogen in it, so that the second year's crop, whatever it may be, is increased from two to ten times.

Adjoining cut shows specimen plants characteristic of uninoculated and inoculated field of Alfalfa, on farm near Bynum, Harford county, Maryland. The uninoculated plants turning yellow though sown on ground richer and better than the inoculated field. Gain from inoculation with Nitro-Culture nearly 560 per cent. by

weight.

PRICE LIST

Nitro-Culture, sufficient to inoculate the following seeds per acre mailed to any address in the United States or Canada at the following prices:

Alfalfa per	acre.	\$2.00
		2,00
Crimson Clover	11 .	2.00
		2.00
Cow Peas	14	2.00
Garden Peas	acre.	1.00
Sweet Peas	44	1.00
Wax Beans per	acre.	2.00
Roy Reans	16	2.00
String Beans	140 , 1	2.00
Veteh	**	2.00
Velvet Beans	147 F.	2.00
Peanuts	16	2 00
Horse Beans	441 . "	2.00
Lima Beans	4 6	2.00

To the left are roots of Soy Beans, showing the nodules which collect the free nitrogen from the air and deposit tin the soil, thus making barren land productive, and after the first crop is harvested the ground is left richer and better for the next year's crop.

Non-Saccharine Sorghum

JERUSALEM CORN-Introduced from Palestine by a missionary. One of the surest of all forage plants for dry countries and seasons. Grows three to four feet high produces many large heads well filled with a valuable grain for stock and chicken feed. Lb. 10c; 10 lbs. 60c; 100 lbs.

RED KAFFIR CORN—This grows taller than the white; the stalks are slenderer, but more juley and very leafy. The heads are long, slender, compact and grow erect; they measure from one to two feet. The seed is red, smaller than that of the white; and rather hard and brittle. It does well on poor land and yleids well. It ripens a little earlier than the white variety, and yields much heavier. It is highly recommended by the Kausas Agricultural College at Manhattan. Lb. 100; 100 lbs. \$2.00.

WHITE KAFFIR CORN—It grows from four to five feet high, making a straight, upright growth. It has a stalky stem, with enormous wide leaves. The stalks keep green and are brittle and juley, not hardening like other varietites of sorghum, making excellent fodder, either green or dried, which is highly relished by cattle, horses and sheep. The seed heads form at the top of each stalk, and as soon as these show the grain well, the joints next below the top send up shoots which yield the second seed heads. For the grain sow in rows three feet apart, three to five pounds of seed to the acre. For fodder sow one-half to one bushel, either broadcast or in drilis. Lb. 10c; 100 lbs. \$2.00.

DHOURA, OR EGYPTIAN RICE CORN—A wonderful fodder plant. If sown in spring while the ground is moist it will mature without a drop of rain. It is much sweeter than corn stalks, and eattle, horses and hoge can't it ravenously. Lb. 10c: 10 lbs. 60c; 100 lbs. \$4.00.

Four Great Croppers Bromus Inermis, Speltz, Dwarf Essex Rape, Turkestan Alfalfa.

Cane or Sorghum

Sorghum (or sugar cane) has attracted general attention. In the West, its great merit is not at ah appreciated, and we wish to call the attention of farmers everywhere to the great value of Sorghum as a pasture and fodder crop, and to the particular advantage to be gained by growing it. Sorghum may be made to furnish the principal provender for cattle and horses from August until the following spring. As a summer pasture for sheep, a wide field is likely to be opened up by it. As a soiling food for swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of corn. It grows right along through the severest and most prolonged drouths, so that a good yield may be expected from suitable soils in any seasons after the plants have secured a good start. the plants have secured a good start.

EARLY AMBER CANE—This popular and well known variety is the earliest. Lb. 10c; pk. 40c; 1 bu. \$1.00 5 bu. \$450.

EARLY ORANGE CANE—A well known variety, well adapted for the south, Lb. 10c; pk. 40c; 1 bu. \$1.00; 5 bu. \$4.50.

SUGAR CANE FOR FODDER-Lb. 10c; pk. 40c; 1 bu, \$1,00; 5 bu. \$4.50,

Soja Beans.

SOJA BEANS—The plants grow erect, averaging four and one-half feet in height. The stalk is strong and woody, and has numerous branches covered with heavy foliage. The branches and upper part of the main stem are thickly studded with clusters of pods—from two to five pods in a cluster, each pod containing two beans. Can be cut for hay or used for grazing purposes. The beans should be sown a half bushel per acre broadcast, or planted in drills three and one-half feet apart, and one and one-half feet between the plants, dropping two or three to each hill, which will require one gallon per acre. This variety of bean is sold largely as German Coffeeberries at a fancy price. 1b. 10c; 4-ba. 60c; bu \$2.08.

TESTED SEED CORN

It costs less than 15c an Acre to use our Carefully Selected and Tested Seed Corn

Is it wise to risk doubtful Corn when Good Corn is so Cheap ?

The varieties of field corn we offer are the best now in use. They were grown especially for seed purposes, and well matured, cured, carefully seed purposes, and well matured, cured, carefully sorted by our seed corn experts, and shelled with great care. The value of the corn crop of Nebiaska alone would be increased two million dollars by an average increase of one buskel perfect, and it has been demonstrated that the crop can be fully doubled by planting some of our improved varieties. We are in the center of the best corn growing country of the world, where the soil and climate are peculiarly adapted to its culture, and now we can say without fear of contradiction,

that for the season of 1905 we have the best supply of seed corn ever offered by any seed firm in

The necessity of planting the very best varieties is plain, and it will not pay you to experiment with the many sorts we have tried and found worthless, nor to purchase from unscrupulous dealers.

All of our seed corn is very carefully tested, and none are sent out that we are not certain will grow under proper conditions. We will mail samples for testing to prospective customers. If a large quantity is wanted ark for special prices.

Buy early—You will not regret doing so

GOLDEN ROW

OUR GOLDEN ROW—Has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been anxiously inquiring for a large-eared, yet early Dent Corn, and to supply their wants we have for years been studying it up, and, until we got up this corn, were not fully satisfied. Many sorts have been tried and found wanting. In the Golden Row our customers will find a high-bred corn, of beautiful color, and one which will please them. W. claim this corn has the largest number of rows on cob, and the deepest, longest grains of any corn ever originated, making the intest appear rows on cob, and the deepest, longest grains vany corn ever originated, making the fluest appearing shelled corn we ever saw, being a cast of golden yellow, and such corn as brings the highest price in the market; the ears well filled to the externation of the cob with 10 to 14 regular rows. The treme tip of the cob with 10 to 14 regular rows. The cobs are unusually small for so large an ear, while the grains are of such remarkable size that when the ear is broken in half the grains will frequently equal in length the diameter of the cob. The richness of color and fine quality of the grains make Don't everlook Turkestan Alfalfa on page 29.

it superior for grinding into meal. With us it requires 100 to 110 days to mature the crop, but the ears ripen well. The grain is easily shelled, though firmly attached to the cob. The stalks take firm hold on the ground, are strong and vigorous in growth, with abundant leafage, and vigorous in growth, with abundant leafage, and attain a height of from ten to twelve feet in rich soil. It will out-yield any corn in this section. We cannot too highly recommend this corn to our customers. We have grown thousands of bushels of other large varieties, and the Golden Rovy is from one week to one month earlier, growing side by side and planted the same week. Price: Lb. 5c; pk. 35c; bu, \$1.00; 5 bu, \$4.50. KED COB ENSILAGE CORN—This variety has been grown in the large dairy regions of Nebraska the last four years, so immensely as to almost exclude all other ensilage corns. Lb. 5c: pk. 40c; bu, \$1.00; 5 bu, \$4.50.

LARGE WHITE FLINT, OR EARLY SANFORD—POP CORN—Queen's Golden—Lb. 10c. White Rice—Lb. 4c. White Pearl—Lb. 4c.

See page 50 for Two-Rew Corn Cultivators.

IOWA SILVER MINE—Stalks grow to a height of seven or eight feet and sets the ears about three and one-half to four feet from the ground, just the right height for easy picking. One peculiarity we noticed in going over the field was that there were no barren stalks, every one had an ear, many stalks had two good enry, and the originator says that that has been characteristic every year that he has grown it. It has not a large growth of fodder, having been bred essentially for grain, though it has plenty of bledes to support the growth, and it is as well rooted as any corn grown. The type is very even, so unusually so that in selecting the heads for exhibition, they can be taken just as they come in the field, with very few exceptions. Ears measuring from ten to twelve inches in length and weighing one and one-half pounds are not uncommon. The cars are very uniform in size and shape, with sixteen to twenty straight rows (usually eighteen rows) of deep, pure white kernels, set on a small cob; and the ears are well filled out over the tin. It is early, matured last fernels, set on a small cob; and the ears are well filled out over the tip. It is early, matured last year in less than ninety-five days, and has never

been caught by frost. The cob dries out rapidity so that it is ready for mar. earlier than any white field corn in existence, fully two weeks earlier than Champion White Pearl. The originacarrier tunn Champion White Pearl. The origina-tor claims that it is the only strictly pure white corn now on the market. In its yield it will surpass all other varieties of any color. Seventy lbs, of the corn in the ear will make sixty-two pounds shelled. It is adapted to a wider range of soil and climate than any corn ever offered. From Mirnesot to Floride, from Massachusetts Cold Mirnesota to Florida, from Massachusetts to Cali-fomia. It will yield a paying crop where other varieties are grown at a loss. This grand corn was originated as follows:

In selecting over some unnamed white corn, one of the best seed corn experts in America found one ear which was of ideal shape, size and color. He planted it carefully in an isolated spot, and from the crop selected only one car for planting the next season. He continued his careful selection of only the one best ear out of crops for five years, until the type was fully fixed. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

Legal Tender. For description see next page.

LEGAL TENDER—With the exception of Nebraska Gold Mine, we consider the Legal Tender the best variety of yellow Dent corn for lowa, Ilinois, Nebraska and the South. It is the result of about ten years selection by a seed corn specialist, and has taken first premium at many state and county fairs. The corn is very productive, of uniform pure yellow color, ear very large and long and a deep grain on a small cob, while the stalk does not grow too large. The introducer soys. "Our ideal ear is an ear two-thirds as large around as it is long, containing sixteen to twenty rows, and small shank. The kernels are deep, the cob is small at the butt and the ear holds its bigness toward the point until near tapering off. It should be capped over and the kernels should hold their bigness toward the point and the butt run out straight and not crinkle." It matures in atout 115 days, but we do not recomment it for the extreme northern portion of this state. Lb. 5c; pk, 35c bu, \$1.00; 5 bu, \$4.50.

EXTRA EARLY DAKOTA DENT — Dakota Dent Corn is the result of a careful selection of the Pride of the North. It can be planted up to the middle of June, and still make ripe corn by the middle of September. Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

NEBRASKA GOLD MINE—Is very early, ripening only a few days later than the Pride of the North. Ears are of good size and symmetrical. Color, a bright golden yellow, grain very deep, cob small. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50

THE IMPROVED NINETY DAYS' LEAMING—A yellow Dent variety, very small, red cob, with a deep long grain of rich golden color, matures a crop in ninety days, and will if planted by first of June, under ordinary culture, grow, ripen and be fit to husk and crib by September 1. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

MAMMOTH CUBAN (DENT)—It is a wonderful cropper, as many as five cars having been produced on one stalk. Very early and a remarkably quick grower. It matures in eighty-five days here in Nebraska. Ears average eight inches long and husk very easily. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

GOLDEN BEAUTY—This variety is the handsomest of all Yellow Corn. The ears are of perfect shape, with from ten to fourteen straight rows of brightest golden-yellow grains of remarkable size, and filled out completely to the extreme end of the cob. The richness of color and fine quality of grain, make it very superior for grinding into meal. The grains are not of a hard, filnty type, neither are they so soft as to be greatly shriveled as in the Golden Dent. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu, \$4.50.

NEBRASKA WHITE PRIZE—Has been awarded the first premium at the Nebraska State Fair for the past twelve years. It is an extra early pure white variety of the Dent family, very productive and exceedingly heavy, maturing in 85 to 90 days from the time of planting. It is very even in hybridization and maturity, giving a good grade of corn and the highest price to be realized for it. Very prolific, and has vielded 100 bushels of shelled corn per acre. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

GODDARD'S KING OF THE EARLIEST—The great hog and cattle feeding corn. This is the earliest yellow Dent corn in cultivation. Stalks grow six to seven feet high, ears seven to nine inches long, very deep, soft grain, small red cob. It ripens in eighty days from planting, being a week or ten days earlier than the "Pride of the North," and "Yellow Canada Flint." This corn will mature in any part of the country where it is possible to grow flint varieties, and is a valuable variety for the extreme north and

for Nebraska and Kansas. It is especially desirable as it reaches maturity before the hot. blighting winds set in.

Goddard's King of the Larliest.

GOLDEN WEST The Best Yellow Dent Corn Ever Offered

Golden West is one of the most vigorous growing varieties that we know of. The stalk is of medium height, not as tall as Legal Tender, but very much thicker at the ground, short jointed and has broad leaves which help to mature the large crop of corn which it produces. It is the deepest rooted corn that we know of

and therefore not easily injured by hard wind storms nor are the roots so near the surface as to be broken off and the vitality of the plant sapped and weakened in cultivating the crop. The ears have usually eighteen to twenty rows a little larger size than Legal Tender in an ordinary season. It is the most attractive

appearing golden yellow corn that we know of, just as the Silver Mine is the most attractive and best white corn. There are many ears which measure eleven inches in length and which measure eleven inches in length and weigh one and one-half pounds containing 1200 to 1500 grains to the ear. The kernels are of such shape that they wedge in tightly and make a solid ear, not only at the cap but also down near the point or germ end (see cut of ear, section). This is a characteristic which is overlooked by many corn breeders, thus causing ears of ordinary varieties, which appear solid, to be of light weight. The germ contains more nutriment than any other part of the kernel and it should be plump and well filled out to insure good feeding value as well as vigorous insure good feeding value as well as vigorous plant growth.

The ear is solid, nearly uniform in size throughout its entire length, but gradually tapering off to a blunt oval tip. The ear shank is of medium length, strong but not large; cob comparatively small and of such nature that it dries out rapidly thus insuring a well matured crop, even during unfavorable seasons. It matures in about 100 days, thus making it a safe corn to plant and we claim that it will yield a larger crop than any other yellow corn in ex-

istence.

The breeder of this corn has been working on essential principles for many years, and instead of simply crossing two good varieties, he has made his cross from several varieties and selected so as to combine the best characteristics of each with an ideal in his mind which he was working towards. Instead of having simply surface roots like other northern varieties, he has bred to obtain a deep rooted sort which would obtain its nutriment from the sub-soil as well as having plenty of surface roots. In this way he has secured a better leaf structure for the plant which enables it to stand long seasons of drouth, hot weather and structure with his first cross to obtain plants with unusual heavy leafage and tain plants with unusual nearly leading and roofs, he has been enabled to build this new variety on a foundation of perfect health and vigor. It is sure to become the leading corn for this latitude and will rapidly win the confidence of all corn growers. Thousands of fidence of all corn growers. Thousands of farmers will make money by buying our Seed Corn 1 lb. 10c; pk. 60c; bu. \$2.00; 5 bu. \$9.00.

Cow Peas--The Great Soil Improver

Makes poor land rich. Makes good land more productive. Also makes a splendid and nutritious green forage or hay crop, enriching the soil even where the crop is cut off.

Special Notice: The prices on cow peas are in an unsettied condition at this time (January 1), and we request that when you are ready to purchase, write us for special prices.

ready to purchase, write us for special prices.

COW PEAS are not exactly a Pea, but more properly belongs to the Bean family. It is a valuable fodder and fertilizing crop, and can be grown as a second crop after wheat in the north. The pods may be harvested for grain and the plants plowed under to fertilize the soil. The seed or grain is used for cattle feed.

BLACK COW PEAS—This variety, while a little later than Whippoorwill, produces more growth of foliage and is consequently better for cutting and as a soil improver. It makes large yield of peas and is very popular in the lattitude of Kentucky. Lb. 10c; pk. 50c; bu. \$1.50.

WHIPPOORWILL—A favorite early bunch-growing variety, has brown speckled seed.

This variety is a prime favorite in the North and West on account of its early maturity and habit of growth. Lb. 10c; pk. 50c; bu. \$1.50.

CLAY—This makes an enormous and remarkable growth of viacs, but requires the fall growing sea-

son to make its crop. In yield and growth of vines it surpasses any of the varieties of Cow Peas, and it yields very largely of the shelled peas. This variety should be planted in May in order to come to full maturity. Lb. 10c; pk. 50c; bu. \$1.50.

Peas and Oats for Fodder

They make a fodder and hay which in every case doubles the production of milk when fed to cows. The Canada Field Pea, which we sell at \$1.60 per bushel, is the best for this purpose. They should be sown in April, two bushels of Peas and two bushels of Onts to the acre. The Peas should be sown first and played under about Peas should be sown first and plowed under about four Inches deep; the oats then sowed and har-rowed in. They will be ready for cutting about July 1, when the oats are in milk and the pods formed on the Peas formed on the Peas.
FIELD PEAS-White Canada Fleld-Lb. 10e; pk. 50c; bu. \$1.60; 5 bu. \$7.50.
GREEN FIELD-Lb. 10e; pk. 50e; bu. \$1.60; \$

General List of Flower Seeds

SELECTED CHOICE VARIETIES

We do not grow Flower Seeds curselves, but import them direct from England, Germany and France, where they are grown by Flower Seed Specialists. Our list is comprised of the most popular varieties, and greatest care has been taken to have the same fresh, of strong growing vitality and true to name.

The following prices are per packet. Order by number only

Annuals, Biennials and Perennials

ALYSSUM-ROCK MADWORT.

Pretty, useful little plants for beds, edging

or rook work.

1. ALYSSUM SWEET -Very fragrant, white. Good for edging. Hardy annual.5c. 2. LITTLE GEM-

2. Lilling the Flowers fragrant; very dwarf compact habit; suitable for borders or pots. Pkt. 5c.

ASTERS.

No family of plants bear such distinct as S marks of progress the Aster, and none are more eagerly sought. An almost endless variety, always reliable, it

Aiyssum

is not strange that they should become a neces-

ASTER VICTORIA -Undoubtedly the most handsome Aster in cul-tivation. 1% feet high. Many colors, fine n ixed, 10c.

4 NEW COMET AS-TER - Resembling the the Japanese Chrysanthemum in shape of flowers,

ASTER, CROWNED

MIXED—10c. 6. ASTER, GERMAN QUILLED— Many col-ors, choice mixed, 5c.

7. ASTER-All kinds mixed, 5c.

8. NEW WHITE BRANCHING—In habit of growth this new Aster resembles the Truffaut Paeony-flowered type, but the plants grow from 10 to 12 inches taller. The flowers are large, very double pure white and of the true "Semple" type. The plants grow about 30 inches high ple type. The plants grow about 30 inches high and produce from twenty to twenty-five flowers, which are borne on stems from 20 to 24 inches long. Its unright habit admits of close planting and it will attain full growth when set only 15 or 16 inches apart. The growing of many plants in a small space is a decided advantage when room is scarce. Per large pkt. 25c.

BACHELOR'S BUTTON, OR CORN FLCWER. 9. CENTAUREA CYANUS—This is the widely known and ever popular "Corn Flower," or Corn Bottle," which, if the seed is sown just as soon as the ground is fit in spring, will furnish a profusion of white, blue and pink flowers from July until late in autumn. Hardy annual. Two to three feet high. Mixed, pkt. 5c.

BALSAM, OR LADY SLIPPER-The Balsam has been improved so much by cultivation as to be scarcely recognizable. The blossoms are double, though some semi-double and single ones will be pretty certain to appear, and such plants should be removed. 11. CRIMSON-Pkt. 5c.

12. SNOW WHITE-Very double, perfect in

form. Pkt. 5c. 13. DOUBLE CAMELIA-Flowered.

13. DOUBLE CAMELIA—Flowered. Best mixed, pkt. 5c.

14. INVINCIBLE—We have no hesitancy in pronouncing this strain one of the finest in cultivation. The flowers are very large, measuring from 2 to 3 inches in diameter, of perfect form, resembling the flower of the Camelia, and are as double. Pkt. 10c.

CANDYTUFT.

One of the most ropular annuals. Hardy, almost equally so as Sweet Alyssum and like it, of easiest culture; splendid for bouquets or

borders, 15. CANDYTUFT, WHITE ROCKET-Pure

15. CANDYTUFT, WHITE ROCKET—Pure white, pkt. 5c.
16. CANDYTUFT—Different colors, fine mixed, pkt. 5c.
17. EMPRESS—One of the finest varieties in cultivation. It is intermediate in height, between the old Rocket and the newer Tom Thumb sorts. The plant is of very branching habit, and when fully grown and covered with its pure white flowers resembles a floral candelabra. Do not sow too thickly. Pkt. 10c, 3 for 25c; ½ oz. 20c.

CAPE-MARIGOLD-CALENDULA.

Attractive and free-blooming hardy annuals. doing well in almost any situation. The Pot Mari-

gold, C. Pongel, is much prized as a pot plant.

CAPE MARIGOLD Fine, double mixed. Pkt. 5c.

19. E L DO R A DO-Immense flowers, 9 to 14 inches around; double primrose, lemon, orange, and golden shades. Pkt. 5c: 14 oz. 15c.

20. CALLIOPSIS-Coreopsis--Showy border plant, producing flowers in every shade of yellow orange, crimson and brown. Finest double brown. Fine mixed Pkt.5c.

Cape Marigold

SPLENDENS.-One most brilliant of flowers; it thrives in any light, rich soil; often called flowering sage. Free bloomers. A brilliant searlet. Very fine. One of the most satisfactory of all bedding plants, Pkt. 10c.

CARNATION.

An important and beautiful class. None more so are grown. Most of the varieties have a delicious clove fragrance. Half-hardy perennials. 22. CARNATION-Extra choice, mixed. pkt.

10c. -23. NEW DWARF MARGUERITE—Like its parent, the Marguerite, this Carnation blooms in four months from sowing. The flowers are larger, more durable and the variety of colors is infinitely greater. If taken up in the fall the plants bloom all winter. Pkt. 100: 8 pkts. 36a.

CASTOR BEANS.

24. RICINUS—Tall, majestic plants for lawn, with leaves of glossy green, brown or bronzed metallic hue, and long spikes of scarlet and green prickly fruit. Of very quick growth in rich soil. Tender annual, 6 to 15 feet high. Mixed, pkt. 5c.

25. ZANZIBARIENSIS—A new form of Ricinus; of short-jointed, stout growth and extraordinarily large leaves which are produced in

ordinarily large leaves, which are produced in such abundance that the plant is a perfect pyramid of beautiful foliage. The most tropical and ornamental Castor Bean yet introduced. They are sure to please all. Pkt. 5c; oz. 15c.

COSMOS HYDRIDUS.

26. A showy and graceful annual of rapid growth, making large bushes fully five feet high, which are a mass of elegant foliage until they bloom in August. Fine mixed, pkt. 10c.

27. Early Flowering can now be had in bloom from July to November. It is such a strong, vigorous grower and its fine fringe-like foliage is such a pretty background for its lovely spreading flowers of white, pink, crimson or rosy purple that it can hardly be spared from any garden. It is really one of the most satisfactory of annuals. Price, pkt. (100 seeds), 10c; 3 pkts. for 25c.

28. CHRYSANTHEMUM — Superb mixed double seed from the finest Chinese and Japanese varieties extant, which we offer in mixture. Pkt. 10c.

ture. Pkt. 10c. 29. DOUBLE 29. DOUBLE ANNUAL CHRYSANT MUMS—A fine mixture Pkt. 5c; ¼ oz. 10c. CHRYSANTHE-

COXCOMB-CELOSIA

30. Annual plants of tropical origin. One of the most satisfactory and showy for garden decoration. Fine mixed, pkt. 5

CYCLAMEN.

31. Well known and universally admired tuberous rooted plants, producing exceedingly handsome red and white flowers. Tender perennial, one foot high. Persicum-Mixed. Of great beauty and many colors. Pkt, 5c.

DAISY-BELLIS

Charming little plants for hedging and borders. Tender, perennial, six inches high.

32. DAISY—Double

mixed, 10c.

DAHLIA

· Admirers of this noble plant may confidently depend upon the quality of this seed, it having been saved from the best varieties in cultivation. Half-hardy bulbs. 23. DAHLIA - Double

mixed, 10c. 34. DAHLIA — Single

mixed, 15c.

Daisy.

FLOS JOVIS-AGROSTEMMA

55. Perfectly hardy plants producing pretty pink-like blossoms on long, tender stems. Agrostemma Coronaria Perennial, mixed. Pkt.

FLOS FLOWER-AGERATUM MADLIN Profuse blooming plants during summer and autumn in the open ground, in groups or masses, also good for pot culture for winter blooming. Pkt. 5c.

FORGET-ME-NOT-MYOSOTIS.

37. Pretty little favorites with lovely clusters of fine, delicate flowers. Blue, 1/2 foot. Pkt. 10c.

FOUR O'CLOCK-MARVEL OF PERU

38. Very picturesque plants, with flowers of great variety of color, which contrast finely with their dark green, glossy foliage. Fine mixed, pkt., 5c; ož. 10c.

FOX GLOVE-DIGITALIS.

29. Ornamental plants of much beauty producing dense spikes of flowers on stems 3 to 5 feet high. Splendid mixed. Pkt. 5c.
40. GERANIUM—These well known garden favorttes are as indispensable for indicate as out-

-of-door decoration and should be extensively

cultivated. Fine single mixed, pkt., 10c.
41. GILIA - Pretty, free-blooming plants, forming clusters of delicate flowers, Will bloom in almost any situation. hardy annuals, Mixed colors, pkt. 5c.

GILLY FLOWERS-STOCKS, TEN WEEKS.

The Ten-week Stock is the most universally cultivated, and usually blooms 10 to 12 weeks after being sown. Half-hardy annuals. GILLY FLOWER-Dwarf fine mixed, pkt.

43. GILLY FLOWER-Large flowering, extra

fine mixed, pkt. 10c.

GODETIA.

44. Beautiful garden plants, of easy cultiva-tion in any good garden soil. Finest mixed, pkt.

HELIOTROPE.

45. Well known, deliciously fragrant, Excellent for bedding purposes or pot culture. Mixed, pkt. 5c.

GL'NT FLOWERING-Will bloom as easily from seed as any of the common annuals. Sow the seed in the open ground about the 1st of May and the handsome bushes will furnish cut flowers all summer and fall. Pkt. 10c, 3 for

HOLLYHOCK

Hollyhock.

The seed we offer of this handsome flower has been saved from named varieties of every known shade of color.

Hardy perennials.

47. HOLLYHOCK-Estra choice mixed saved from exhibition flowers. Pkt. 5c.

47½. ALLEGHANY—Blooms the first year from seed. This grand new flower is an improvement in more than one particular over the old-fashion ed variety. Its first point of merit is the fine transparent, fringed

chrysanthemum-shaped flowers, which look as though they were made up of crushed silk. So fine are these flowers in texture that one would never suspect they were related to the old-style hollyhock. Pkt. 10c, 3 for 25c.

LARKSPUR (DELPHINIUM)

Very elegant and ornamental plants, producing in great variety of form and color some of the most beautiful flowers in cultivation. Dwarf Rocket, double. Mixed, pkt. 5c.

LOBELIA.

49. Dwarf-growing plants, with blue, white, crimson and rose flowers, adapted for ribbon borders and for vases or hanging baskets. Fine mixed, pkt. 50.

LOVE LIES BLEEDING.

AMARANTUS-CAUDATUS- Prized for variety of handsome foliage, whether grown in conservatory or garden. Two feet high, 5c.

LOVE-IN-A-MIST-NIGELLA

51. This singular plant is known as Lady-in-the Green and Devil-in-a-Bush because the blooms are partly concealed by the abundance of finely cut feliage. Hardy annual, Best mixed, Pkt. 5c.

MARSH MALLOWS-HIBISCUS AFRICANUS.

52. One of the most ornamental, beautiful and showy plants cultivated. Hardy annuals, cream color, rich brown center. One and one-half feet high, 5c. MARIG OLD-FRENCH.

Mourning Bride.

53. The Marigold has been an inhabitant of the flower garden from time immemorial, and where a rich display of bloom is desired is almost Halfindispensable. hardy annuals.

Dwarf mixed, 5c.

MOURNING BRIDE SCABIOSO

54. Very useful and ornamental plants with rich and beautifully colored flowers. Equally offective for beds or borders. Mixed, 5c.

MIMULUS.

Strikingly handsome flowers of earliest cultivation. Perennial in the greenhouse, annual in

the open air. Start under glass.
55. MUSK PLANT (MOSCHATUS)—Cultivated on account of the musky odor of the plant;

56. MONKEY FLOWER (PUNCTA Large, beautifully spotted blossoms. (PUNCTATUS) -Blooms first year; 10c.

Mignonette.

MIGNONETTE-RESEDA. This old favorite is so well known that it is necessary to attempt any description hardly of it.

57. GOL_EN QUEEN-Golden yellow, very fragrant; 10c.

MATCHET DWARF - Of pyramidal

h, red, scented; 10c.
MIGNONETTE—Mixture of many varie-69.

Dwarf Nasturtium.

NASTURTIUM DWARF TROPAEOLUM MINOR:

A bed of Dwarf Nasturtiums in the yard is very brilliant and attractive and blooms all the season.

Dwari mixed, pkt., 5c; oz., 10c Dwarf, yellow, pkt., 5c; oz., 20c. Dwarf, scarlet, pkt., 5c; oz., 20c.

Dwarf, rose. pkt., 5c; oz., 20c. Dwarf pearl, creamy white, pkt., 5c; oz., 20c

Tall Nasturtium.

61. NASTURTIUM (TALL) TROPAEOLUM-Elegant growing, profuse flowering. Fine mixed. Pkt. 5c; oz. 10c.

NEW CLIMBING NASTURTIUM, MAD-GUN-THER'S HYBRIDS.

62. For richness and variety of colors these new hybrids have no equals among Nasturtiums. There are shades of rose, salmon, brightest red, pale yellow, either as self-colors or spotted and striped. The foliage is mostly dark and contrasts year, affectively with the rich dark and contrasts very effectively with the rich colors. It contains a great many colors that are not found in any other mixture. Price, large pkt., 10c; oz., 15c; 1/1b., 40c; lb., 11.25. PANSIES

Pansy.

These little beauties need no extended description, as it would be hard to find even a child in the land whose heart has not gladdened by been their bright faces.

63. LORD BEA-CONSFIELD - The ground color is purple violet shaded off in top

petals to only a whit-ish hue. Pkt. 10c. 64. PREMIER MIX-ED-A beautiful French

train. Pkt. 15c. 55. FAUST, OR KING OF THE BLACKS— Pkt. 10c.

66. EMPEROR WIL-LIAM-Brilliant Blue.

Pkt. 10c. 67. SNOW QUEEN-Pure white. Pkt. 10c.

IMPERIAL GERMAN-Largest in cultiva-Extra choice mixed, pkt., 15c.

69. GERMAN-Extra choice mixed, pkt., 10c.

76. Fine mixed, pkt, 5c.

PINKS-DIANTHUS,

This genus of plants is one of the most brilnant of our garden flowers, and gives universal satisfaction.

71. HEDDEWIGGI-Large flower, 3 inches in diameter, beautiful colors, finely marked, 5c.

72. IMPROVED DOUBLE JAPAN PINKS-This is a strain superior to any we have previously had. The flowers are large, double, of the brightest colors, handsomely fringed and borne on long, stiff stems, making them one of the most useful flowers for bouquets. Pkt. 10c; 3 for 25c.

73. Finest double, mixed. Pkt. 5c. 74. CHINENSIS-Best double varieties, mixed.

Pkt. 5c. 75. CARNATION-Double dwarf, mixed.

POPPY-CALIFORNIA ESCHOLTZIA.

doz. 35c. NEW VARIEGATED-The leaves of this variety are bordered with creamy white. Flowers single, very large and of exquisite fragrance. Bulb continues to grow and bloom year after year. Each 6c; doz. 60c. CINNAMON VINE—A lovely climber taking

CINNAMON VINE—A lovely climber taking its name from the peculiar fragrance of its delicate white flowers. The leaves are heartshaped, bright glossy green. Growth is very rapid, reaching about eight feet in height; quite haidy. Good root 15c; 2 for 25c.

MADIERIA VINE—A rapid grower, 10c each;

2 for 15c; doz. 50c.

Compressed Air Sprayer.

Price \$4.50

This New Sprayer is made of heavy galvanized ir n, nicely finished, with air pump attachment, also safety valve to prevent over-pressure, and is furnished with hose, extension pipe and nozzles. The nozzle on the bose can be screwed on extension pipe when desired to spray trees or at a distance. The can is filled one-half or two-thirds full of water or liquids, and the air is pumped in, which only takes about a half-minute and it will force out the entire contents. After the air is pumped in no more labor is required, except opening the valve and directing the spray.

THE DOUBLE-TUBE LIGHTNING INSECT EXTERMINATORS

No producer of vegetables or fruit can afford to without one of these sprayers.

It's returns in one day's operation will be many times its cost.

Kills, drives away and exterminates every liv-ing thing obnoxious to yourself, your animals or your crops.

Every family in city and country are in need of one of these sprayers. No. 2, copner, price, \$1.00; No. 1 tin, price, 50c.

We are State Agents for 'PLANET JR." TOOLS

Space will not permit our showing and describing all the "Planet Jr." tools, but we will send a fully illustrated catalogue free for the asking to any one who desires it. "Planet Jr." goods are standard machines; the best: yet great improvements have been made for 1205. "PLANET JR." NO. 1 COMBINED DRILL WHEEL HOE, CULTIVATOR AND PLOW-It has a complete set of cultivating tools, and all its work is rapid easy perfect and delightful

its work is rapid, easy, perfect and delightful. When used as a drill the seed is sown with great regularity and at uniform depth, regulated at pleasure. The hopper holds one quart. From a drill it is changed into its other uses by un-screwing but two bolts, when any of the attach-ments shown in the cut can be quickly attached.

In the ordinary way, with the greatest regularity; but its distinctive feature is that it will drop nearly in bills, either 4, 6, 8, 12 or 24 inches apart. Price, \$10.50.

"PLANET JR." NO. 4, COMBINED SEEDER AND CULTIVATOR—The latest improvement We have personally tested this machine and it has apparently so many good points that we offer it with confidence. Price, \$10.50; as a drill only Price, \$8.50.

THE "PLANET JR." NO. 5 HILL DROPPING SEEDER—This beautiful new tool will be a delightful surprise to every gardener who tries it. Price, \$13.00.

NO. 25. COMBINED HILL AND DRILL

This new combined machine is intended for a class of gardeners who have a large enough acreage in crops for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy a separate Wheel Hoe. It is large enough for field use, for it holds 2½ quarts (or about 5 lbs, of onlon seed) and has 11¼-inch wheels—which are just the right size. Price, \$13.50

"PLANET JR." NO. 11 DOUBLE WHEEL, HOE. CULTIVATOR, WHEEL HOE, CULTIVA combines in itself the good points of its predecessors with valuable new ideas. It has 11-inch wheels, which can be set at 4 different distances apart; the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and being attached to the arch, are entirely undisturbed in making characteristics.

the arch, are entirely undisturbed in making changes in the height of frame, width of wheels, or in the adjustment of the tools themselves. The arch is of stiff steel, unusually high. The design of the-frames is novel, allowing all changes of tools to be made without removal of the nuts from the standards. A pair of model rakes and a pair of new style hoes are added to the usual equipment—seven pairs of tools in all. The whole set shown in the cut goes with the complete tool. All the blades are tempered and polished steel. The variety of work possible with this machine is incredeble, covering the whole range of wheel hoe work, both in the garden and on the farm, and has our unqualified endorsement. Price, \$9.00

"PLANET JR." NO. 12 DOUBLE WHEEL HOE, CULTIVATOR AND PLOW—This tool is identical with No. 11, except that it has less complete equipment, but is sold at a correspondingly less price. The set of tools with No. 12 is what gardeners need most, and the rest can be added as wanted. Price, \$7.00.

"PLANET JR." NO. 13 DOUBLE WHEEL HOE—This tool is the No.

PLANET JUNIOR," NO. 15 SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

WHEEL HOE-This tool is the No. 11 with 6-inch hoes only, this pair of tools being most generally useful at all seasons. Any or all of the No. 11 tools may be added at any time, and are sure to fit.

Price, \$4.75.
"PLANET JR." NO. 15 SINGLE
WHEEL; HOE CULTIVATOR,
RAKE AND PLOW—This new Wheel Hoe has the advantage of a high wheel with broad face, of convenient arrangement of the frame and a very full set of tools,

most of them being of a new, spe-cial design, such as have been known to perform wheel hoe work in the very best manner. Price,

"PLANET JR." NO. 16 SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW-This wheel hoe is identical with No. 15, except that it has fewer tools, but the price is proportionately lower, and the remaining tools may be added as wanted. Price \$5.85.
"PLANET JR." NO. 17 SINGLE WHEEL HOE CULTIVATOR AND PLOW—This also has

the same frame, handles, etc., as No. 15, but is supplied only with a pair of 6-inch hoes, a set

of cultivator teeth and a plow. Price \$5.00
"PLANET JR." NO. 18 SINGLE WHEEL
HOE-With the same frame and handles as No. It has one pair of 6-inch hoes only. Price, \$3.50

and Cultivator. We without wheel, \$6.65.

COMPLETE "PLANET JR." DESCRIPTIVE CATALOGUE SENT FREE.

"PLANET JR." NO. 8 HORSE HOM AND CULTIVATOR—This new tool has many important improvements—and is a most valuable on for market gardeners. Weight, 83 lbs. Complete, \$8.50.

"PLANET JR." NO. 7 HORSE HOE AND CULTIVATOR-This new tool is identical with No. 8, with the exception that it has no depth regulator. Weight, 78 lbs. Complete \$8.00

"PLANET JR." NO. 4—All Steel Horse Hoe and Cultivator. Weight, 65 lbs. Complete \$6.35 without wheel, \$5.60.

"PLANET JR." NO. 9-All Steel Cultivator, Weight, 63 lbs. With wheel, \$6.10, without wheel, \$5.35.

"PLANET JR." NO. 4-All Steel Cultivator. weight, 58 lbs.; with wheel, \$5.00, without wheel,

"FLANET JR." 12-TOOTH HARROW, CUL-TIVATOR AND PULVERIZER COMBINED-A very satisfactory new tool which will prove valuable for fine cultivation, deep or shallow. It has also the new lever wheel and lever attachnent. It is valuable as a harrow and pulverizer. Price, plain, without Pulverizer or Wheel, \$5.80; without Pulverizer, \$6.90; complete, \$8.50.

No. 72 Planet Jr. Two-Row Pivot Cultivator, Plow, Furrower and Ridger

NEBRASKA BROADCAST SEEDER-Combines every good feature of every other Broadcast Seed Sower and is distinct and superior in many respects. The cheapest, simplest, strongmany respects. The cheapest, simplest, strongest, most durable and most accurate and handsome seeder made. POULTRY SUPPLIES AND REMEDIES

GROUND BELF SCRAPS.

This is the finest thing we know of to cause hens to lay during the winter. Feed three times a week, at the rate of about a handful to every three birds, in the morning meal of hot food. 25 lbs., \$1.00; 50 lbs., \$1.85; 100 lbs., \$3.50.

DEODORIZED BLOOD MEAL.

Blood Meal is greatly relished by the fowls, promotes growth and strength and keeps the digestive organs healthy. Care must be taken not to feed too much, as it is very highly concentrated. One pound of Blood Meal to 18 or 20 pounds of other food is the proper ratio. 25 lbs., 75c; 50 lbs., \$1.50; 100 lbs., \$2.75.

MEAT MEAL.

This meal is exceedingly rich in protein and albumen, containing the Lecessary food for muscle and egg development. Laying hens need it. 25 lbs., 75c; 50 lbs., \$1.50; 100 lbs., \$2.75.

GRANULATED BONE

Is about the size of wheat, and can be fed like any other food in grain, about one handful for every five fowls daily, or every other day, at all seasons of the year. 25 lbs., 75c; 50 lbs., \$1.35; 106 lbs., \$2.50.

FINE BONE MEAL.

For mixing once a day with soft feed this is unsurpassed. Laying hens are much benefited by this. 25 lbs. 75c; 50 lbs. \$1.40; 100 lbs. \$2.50.

CRUSHED OYSTER SHELL.

This is a most important article for the poultry yard through the winter, and should be liberally supplied to the fowls. It is also advisable to keep it before them during the entire thoroughly screened from all dust and dirt. 10 lbs., 25c; 50 lbs., 60c; 100 lbs., \$1.00.

MICA CRYSTAL GRIT.

This is a rock combination of Silica, Aluminum, Iron and Magnesium. Every one knows that hens have no teeth, nature, therefore prompts the hens to pick up and swallow gravel, glass, small shells and other substances, but it may be noticed that they prefer such as are sharp and friegular. 10 lbs., 25c; 50 lbs., 60c; 100 lbs., \$1.00.

X-RAY POULTRY REMEDY.

A sure cure for Roup, Canker, Gapes, Pips, Swellhead, Scaly Legs, and all diseases of the Read, Throat and Eyes. Roup, no matter how bad, can be cured, and must give way to the wonderful new discovery—X-Ray Poultry Remedy. To say that this remedy is a positive cure of the terrible disease, Roup, and its ailments, does not in the least begin to express its merits and the high esteem that poultry breeders have for it, who have been fortunate enough to test Its powerful effects. It has worked wonders and has done more than actually claimed for it. One application gives encouragement and generally effects a permanent cure; three applications will cure the most stubborn case. 8-oz. bottle, 50c; 16.oz. bottle, \$1.00.

AHAMO VERMIN DESTROYER.

Without any doubt the best and most effective preparation for all kinds of Poultry Insects, Lice on Cattle, Horses and Swine; Lice or Fleas on Cats and Dogs; Ticks on Sheep; Water and Bel Bugs, Roaches, Moths on Clothing, Insects on Plants and Vegetables. Parasites of every description. Small pkg., 10c; 1-lb pkgs., 25c; 3-lb., pkgs., 50c.

THE GREAT NAPOLEON LICE KILLER.

The greatest disinfectant and Vermin destroyer for poultry and stock of all kinds. All kinds of

Insects thoroughly removed.

The discovery of The Great Napoleon Lice
Kilier revolutionized all existing methods of exterminating insects and vermin affecting poultry and stock. Being a liquid paint, it has manifold advantages over any form of powder or liquid; it is easily applied to roost-poles and about the poultry house, and kills all vermin, mites, bed bugs, etc., that have their lodging in the cracks and crevices. It retains its virtue for a long time after application, and the oder arising from the painted surface will kill the body lice on the fowls that roost over it without injury to the fowls. Each can has a label giving full directions for use. Qt., 25c; 4-gal., 50c; 1 gal., 75c, 5 gal., \$3.00.

PERFECTION EGG MAKER.

Best Egg Food known, prevents and cures most diseases common to fowls, makes fowls vigorous and healthy, alds digestion and shortens the moulting period. Small pkg., 10c; 2-lb. pkg., 25c; 4-lb. pkg., 50c.

SATISFACTION CONDITION POWDER.

Crres diseases of Poultry. A remedy used by cultry rulsers. This remedy is a sure cure for poultry raisers. Chicken Cholera, Diarrhoea, Leg Weaknesses, and all other Poultry diseases; it also puts hens in fine condition so that they will lay eggs in abundance. 8-oz. pkg. 15c; 2-lb. pkg. 40c.

LEG BANDS.

CLIMAX-12, 25c; 25, 40c; 50, 75c; 100, \$1.35. NEST EGGS.

CHINA-Each, 5c; dozen, 40c.

DRINKING FOUNTAINS.

Stoneware-each, 1/2-gal., 25c; 1 gal., 35c; 2 gal.,

CAPONIZING TOOLS.

PHILADELPHIA-In velvet-lined case, \$2.75; without case, \$2.50.

Sweet, Pot and Medicinal Herbs

No garden is complete without a few herbs for culinary and medicinal purposes, and care should be taken to harvest them properly. This should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed closely, entirely excluded from the air. Sow in spring in shallow drills one foot apart, and when well up thin out and transplant to a proper dis-

ANIS (PIMPINENLLA ANISUM)-Used cordials, also for garnishing and seasoning. Pkt. 5c; oz. 10c. BALM (MELISA OFFICINALIS)—For balm

ten or wine for fevers. Pkt. 5c; oz. 20c.

BASIL, SWEET (OCYMUM BASILICUM)—
For seasoning. Pkt. 5c; oz. 15c.

BORAGE (BORAGO OFFICINALIS)—For fiav-

oring, excellent for bee pasture. Pkt. 5c; oz. 15c. CARAWAY (CARUM CARVI)—Used in pastry, confectionery, etc. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 75c.

CATNIP (NEPETA CATARIA)-Pkt. 5c: oz.

DILL (ANETHUM GRAVEOLENS)-Used making pickles. Pkt. 5c; oz. 10c; 4-lb. 25c; lb.

FENNEL. SWEET (ANETHUM FOENICU-LUM)-Ornamental leaves. Pkt. 5c; oz. 20c.

HOREHOUND (MARRUBIUM For making cough remedies. Pkt. 5c; oz. 20c. HYSSOP (HYSSOPUS OFFICINALIS) -Pkt. 5e; oz. 25e.

LAVENDER (LAVENDULA VERA) - Aromatic medicinal herb. Pkt. 5c; oz. 15c. MARJORAM, SWEET (ORGANUM MAJOR-

ANA,—Desirable for se 15c; ¼-lb. 40c; lb. \$1.50. seasoning. Pkt. 5c; oz.

GPIUM POPPY (PAPAVER SOMNIFERUM)-Pkt. 5c; oz. 20c.

POSEMARY (RO-Pkt. 5c; oz. 30c. (ROSEMERINUS OFFICINALIS)

RUE (RUTA GRAVEOLENS)-Medicinal herb. Good for croup in fowls. Pkt. 5c; oz. 15c. SAGE (SALVIA OFFICINALIS)—Extensively used for seasoning. Pkt. 5c; oz. 15c; 4-lb. 40c; lb. \$1.50.

SUMMER SAVORY (SATUREIA HORTENSIS)

-Extensively used for seasoning. Pkt. 5c; oz. 15c; ¼-lb, 30c; lb, \$1.00.
THYME (THYMUS VULGARIS)-Extensively used for seasoning. Pkt. 5c; oz. 25c; ¼-lb, 75c; lb. \$2.25. B. \$2.25.
WORMWOOD (ARTEMSIA ABSYNTHIUM)

- Used for medicinal purposes. Pkt. 5c; oz. 15c.

Artichoke

French, Artichaut. German, Artichoke.
Plant the seeds early in the spring one inch
deep and three or four inches apart, in drills
one foot apart. Hoe often and transplant in
following spring to hills four feet apart, setting from one to three plants in a hill.

Artichoke Roots

LARGE GREEN GLOBE—The largest and best. Pkt., 5c; oz., 35c; ¼ lb, \$1.00; lb, \$3.50.

JERUSALEM—Well known. Cut and plant same as potatoes. Best for stock. Pk. 50c; bu.

Asparagus

French, Asperge. German, Spargel.
To grow asparagus plants from seed, sow in drills about one inch deep in rows 1 ft. apart.
Keep the soil mellow and free from weeds during the summer, and in the fall or spring the ing the summer, and in the fall or spring the plants may be set out in beds about 13 inches apart, in rows 4 ft. apart, with the crowns 4 inches below the surface. Before winter, cover the transplanted bed with four inches of manure. Sow a little salt on the surface in the spring; it will keep down the weeds.

PALMETTTO—This variety is uniformly of large size and early; and while not so many may be cut at one time as from some others, this is overcome in the extra size to which it grows. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. 70c.

CONOVER'S COLOSSAL—Of large size and very productive. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. 60c.

COLUMBIAN MAMMOTH WHITE—A fine, large variety, which produces stalks very light in color, being almost white in some specimens. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

Asparagus Roots

COLOSSAL—Two-years per 100, 50c; 1,000, \$4.50; one-year, per 100, 45c; 1,000, \$3.50. PALMETTO—Two year old roots, per 100, 60c; 1,000, \$5.00. One year, per 100, 50c; 1,000, \$4.50. COLUMBIAN MAMMOTH WHITE—Two years, per 100, 70c; per 1,000, \$5.00; one-year per 100, 50c; per 1,000, \$4.50.

Beans (Dwarf, Bush or Snap)

French, Haricot. German, Bohne.

Beans are tender and should not be planted until danger from frost is past and the ground becomes warm. Plant in drills three or four inches apart, or in hills one and one-half feet apart in the row, and rows three feet apart.

Green Podded Varieties

NEW GIANT GREEN POD STRINGLESS VALENTINE—This is a new cross bred variety and one possessing all the merits of the old Improved Valentine, which is one of its parents and having in addition the following points:

It is ready for market with a more prolific crop of pods a week earlier.
The pods are one-third larger, averaging five to six inches in length.

They are always absolutely stringless, round, full and fleshy.

It is more prolific and surpasses others in crispness and flavor. Pkt. 5c; pt. 15c; qt.30c; pk. \$2 00; bu. \$7.00.

PROLIFIC TREE-For field culture, height about 20 inches, branching in all directions, thereby not being so liable to rust as other varieties. Pkt. 5c; pt. 10c; qt. 20c; pk. \$1.00; bu

\$2.50. WHITE MARROW-Exclusively grown as a bean for winter use. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$5.00.

New Stringless Green Pod.

NEW STRINGLESS GREEN POD—This new bean is one of the best stringless green pod bush beans in cultivation. It is crisp, of tender flavor and prolific. The pods are ready for market a week earlier than the Valentine, which is known to be valuable for its earliness. Pkt. 5c; pt. 15c;

to be valuable for its earliness. Pkt. 5c; pt. 15c; qt. 30c; pk. \$2.00; bu. \$7.00.

VALENTINE IMPROVED, RED, ROUND POD—Pods round, maturing in about 60 days; highly esteemed; remains longer in the green state than many other varieties, yet nearly the whole crop can be taken at ohe picking. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.70; bu \$6.00.

LUNG YELLOW SIX WEEKS—One of the earliest; similar to Mohawk, except in color of seed, which is yellowish drab; pods tender. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.40; bu. \$5.00.

REFUGE, OR ONE THOUSAND TO ONE—Pods, round. fine flavor; used extensively for canning. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.35; bu, \$4.50

Dreer's Bush Lima

Bush Lima Beans

DREER'S BUSH LIMA-Is the bush form of DREER'S BUSH LIMA—Is the bush form of Dreer's Pole Lima. It is very early in maturing and productive. The beans are not quite as large as the Large Pole Lima, but grow closer in the pod and more of them. Pkt. 5c; pt. 16c; qt. 30c; pk. \$175; bu. \$700.

BURPEE'S BUSH LIMA—Grows eighteen to twenty inches high, of sturdy habit, erect and branching, forming a bush sometimes two feet

twenty inches high, or sturdy habit, erect and branching, forming a bush sometimes two feet in diameter, making it very productive. The beans are very large, being equal in size to any of the Pole Limas, also in quality. Pkt. 5c; pt. 16c; qt. 30c; pk. \$1.75 bu. \$7.00

HENDERSON'S BUSH LIMA—It grows in compact bush form eighteen inches high, and produces fine crops of Lima Beans, which can be as easily gathered as the common garden bush beans. Pkt. 5c; pt. 15c; qt. 30c; pk. \$1.75 bu. \$7.00

Wax Podded Varieties

BLACK WAX—Early, stringless, pods round and waxy, yellow, solid and tender. Pkt. 5c; 10c; qt. 30c; pk. \$2.00; bu. \$7.50.

NEW PROLIFIC GERMAN WAX—An improved strain of Black Wax, but more prolific. Easily harvested; free from rust. Pkt. 5c; pt. 20c; qt. 30c; pk. \$2.00; bu. \$7.50.

GOLDEN WAX—This is one of the best snap heave in cultivation. It is unsurpassed in tenders.

beans in cultivation. It is unsurpassed in ten-derness and richness of flavor; moreover, it stands high in favor as a shell bean for winter use. Pkt. 5c; pt. 20c; qt. 30c; pk. \$2.00; bu. \$7.50.

Davis Kidney Wax.

DAVIS WAX-This is the most hardy and productive bush, wax-podded bean in cultivation.

All of the pods are very long, white, straight

and handsome. The vine is rustless and very vigorous, bearing near the center many clusters, some of which extend above the foliage. When young the pods are very brittle, crisp and tender. The dry beans are kidney-shaped, clear, white, and excellent for baking.

ONE OF THE BEST FOR SHIPPING

AS SNAP BEANS,

and of the greatest value for either the mar-ket or the home garden. The length, perfect shape and fine color of the pods, and the clear, white seed makes this

ONE OF THE BEST FOR CANNERS. It is just what they want, a long, straight, clear white pod, which does not discolor in canning. Pkt. 5c; pt. 20c; qt. 30c; pk. \$2.00; bu. \$7.50

ROUND POD KIDNEY WAX-A new sort and we think very desireable especially for the home garden. The vine is dwarf, spreading and very pro-productive. The exceedingly beautiful pods are round, long, slightly curved, very white and wax-like, stringless, cylindrical and of the best quality. They are uniformly perfect, an ill-shaped one being rarely seen. Seed long, cylindrical, nearly white, with a little dark marking about the eye. Pkt. 5c: Pt. 15c: Qt. 30c: Pk. \$2.00: Bu. \$7.50.

WARDWELL'S DWARF KIDNEY WAX-

WARDWELL'S DWARF KIDNEY WAX— Vines of medium size, erect, hardy and pro-ductive. Pods long, broad, flat and of a delicate waxy yellow, brittle and entirely stringless, Pkt. 5c: pt. 15c: qt. 39c; pk. \$2.00; bu. \$7.50, KUST PROOF GOLDEN WAX—While grown side by side for several years with other wax beans, all of them more or less affected by rust, many of them completely rulned by it, this bean has remained entirely free from it. But not only is it RUST PROOF, but it is exceedingly CRISP AND TENDER, with no approach whatever to stringiness, and of a most delicious flavor. Pkt. 5c; pt. 15c; qt. 30c; pk. \$2.00; bu.

WHITE WAX-Except in the color of its seed this variety bears a strong resemblance to the black wax. Pods wax-like. Pkt. 5c; pt. 15c: qt. 30c; pk. \$2.00; bu. \$7.00.

JONES' STRINGLESS WHITE SEED, ROUND POD WAX. POSITIVELY FREM FROM RUST—This grand absolutely stringless bean, is the result of five years' systematic cross breeding between the Yosemite and a white seed cross from lvory Pod Wax. It will without doubt become one of the most popular of all our Wax varieties now grown, combining points never before obtained in a true stringless wax pod. Pkt. 5e; pt. 20e; qt. 35e; pk. \$2.00 bu.

Pole or Running Reans French, Haricots a rames. German, Stangen-bohne.

They are more tender and require more care in culture than the bush beans and should be planted two weeks later. Plant in hills from three to four feet apart; plant five or six beans in a hill, leaving a space in the center for the pole.

LARGE WHITE LIMA-Pods broad and rough. Seeds large, broad and white. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.

DREER'S IMPROVED LIMA-Smaller seeds than the preceding, but more hardy and more produceive. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50 bu. \$5.50. EARLY GOLDEN CLUSTER WAX POLF-

This variety takes the lead of all pole beans, in earliness, coming into use a week or ten days later than the Dwarf Golden Wax. It is crisp and tender. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00;

and tender. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00; bu. \$7.00.

GERMAN BLIACK WAX POLE—One of the best varieties either for snap or shell beans in the green state. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.00; bu. \$7.00.

EARLY DUTCH CASE KNIFE—One of the earliest of the pole varieties, is good green or dry; very productive. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.

RED SPECKLED CUT-SHORT OR CORNHILL—An old variety, and yet one for which every one has a good word; vines medium, pods short, round and tender. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.50; bu. \$5.50.

KENTUCKY WONDER — Vines vigorous, climbing well and very productive, bearing its pods in large clusters; pods green, very long, often reaching nine or ten inches. Pkt. 5c; pt. 20c; qt. 30c; pk. \$1.76; bu. \$7.00.

SCARLET RUNNER—An ornamental sort, used same as Morning Glories. Pkt. 5c; pt. 20c; qt. 35c; pk. \$2.10; bu. \$3.00.

RED GIANT WAX—Pkt. 5c; pt. 25c; qt. 45c; pk. \$2.25; bu. \$3.00.

Beets

French, Betterave. German, Rothe Ruebe

For an early sup-ply sow as early in the spring as the ground can be prop-erly cultivated, lay out the drills for the seed about one foot to one and one-half feet apart and two inches deep. For main crops sow the first week in May first week in May and for winter use in June.

CROSBY'S EGYPTIAN -The name of this variety is misleading as it resembles the Egyptian only in its extreme earliness. It is larger, lighter colored and more mearly sprerical; one of the best for early planting out doors. It is a most excellent sort, becoming fit for use sooner than any other variety, but it is not as well peds or for trans

Crosby's Egyptian

suited for forcing in hotbeds or for trans planting as the Egyptian. Pkt. 5c; oz. 10c; 1/2 lb. 25c; 1 lb. 75c.

ARLINGTON FAVORITE—A new dark-leaved early blood variety, originated at Arlington Mass., where it is grown extensively for the Boston market. It follows the Eclipse closely in maturing, but is of much darker color and superior in quality. Perfectly round in shape; it differs from all other dark blood sorts in that it has the sweetness of the Bassano, and yet a very dark deep blood color. Its small, upright growing tops, early maturing, and the splendid shape and color of the roots, makes it popular with everyone who plants it. Pkt. 5c; oz. 10c; 16. 20c; 1b. 60c.

EARLY EGYPTIAN—The well known early variety. Color extra dark, shape flat, quality excellent. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 50c.

COLUMBIA-This distinct new Beet is early, of finest quality and great uniformity, both in roots and meat, handsome foliage, being of turnip shape, with smooth, clear skin and deep blood red flesh. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb.

EXTRA EARLY ECLIPSE—An excellent sort, about as early as the Egyptian, but we consider it better because it is larger and of much finer quality. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

EARLY BLOOD-RED TURNIP-The stand-by. Pkt. 5c; oz. 10c, ¼ lb. 20c; lb. 50c.

MITCHELL'S PERFECTION—This variety is one of the earliest sorts known. It is of rich dark blood red color, small top, very smooth. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

EDMAND'S EARLY BLOOD TURNIP-The very best sort for general crop. In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 50c.

LONG SMOOTH BLOOD—The standard long sort. Fixt. 5c; oz. 10c; 14, 1b. 20c; 1b, 50c.

DEWING'S EARLY BLOOD TURNIP—A good variety for main crop. Keeps well. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 50c.

DETROIT DARK RED TURNIP—A grand beet for bunching for market; tops are exceptionally small and uniformly upright; roots are perfect turnip shape with small tap roots. The principal fault with most Turnip Beets is the occasional appearance of white rings but the occasional appearance of white rings, but by careful selection this has been overcome, and this will be found one of the deepest red Beets. Quality is the very best, sweet and tender. Gardeners can safely plant it largely. Pkt. 5c; oz. 10c; ¼ lb, 20c; lb. 50c.

Mangel Wurzel

French, Betterave. German, Runkel Ruebe.

Mammoth Long-Red Mangel Wurzel

Sow in April and May in thoroughly ploughed, well manured soil, in dr:lls two inches deep about 18 inches apart. Thin out to apart. Thin out to 12 inches and keep the weeds down by frequent hoeing and cultivating.

> Prices on all kinds of Mangel Wurzel, 5c per oz.

MAMMOTH LONG MAMMOTH EURON RED-More generally grown than any other sort. Roots large, quality excel-lent. Oz. 5c; 4 lb., 10c; lb., 30c.

NORBITION RED GIANT-One of the finest qualities in cultivation; grows to an enormous size. Oz., 5e; 1/4 lb., 10e; lb., 30c.

GOLDEN TANK-ARD-A very valuable variety, of fine form and bright yellow in color Oz. 5c; ¼ lb., 10c; lb., 30c.

MAMMOTH LONG YELLOW - Similar to Long Red except in color. Oz, a lb., 10c; lb., 30c. 50: 34

KINVER'S YEL-LOW GLOBE-It is of superb quality and an enormous cropper. Oz. 5c; 34 cropper. Oz. 3 lb., 10c; lb., 30c.

RED GLOBE-The root is of large size and globular in form; very productive. Oz. 5c; ¼ lb. 10c; lb. 30c.

See pages 24, 25 and 26 for Northern Grown Seed Potatoes : : : :

Sugar Beets

French, Sucore Betterave. German, Zucker
Rueben.

Plant seeds close together in the drills; when the young plants are large enough to handle, thin same out to about six inches apart; in rich soil the beets should be closer together, and in poor soil further apart. Cultivate often and keep free from weeds by hand weeding or hoeing. Sow for sugar purposes 20 lbs., and for feeding purposes 10 ibs. to the acre.

KLEIN WANZLEBEN-This kind is cultivated on a larger scale than any other Sugar beet. The root is conical, straight and even, quite large at the head and rapidly tapering. It is a heavier yielder than Vilmorin's Improved and contains from 14 to 15 per cent of sugar. Pkt. 5c; ¼ lb. 10c; lb. 30c.

VILMORIN'S 1MPROVED--Under average conditions it has yielded 14 tons of roots to the acres containing about 16 per cent of sugar. Pkt. 5c; ½ 1b. 10c; lb. 30c.

FRENCH RED TOP SUGAR—The most generally grown sort in France, as it combines with heavy yield a good percentage of sugar. It has produced 30 tons of beets to the acre, containing about 10 to 13 per cent of sugar. Pkt. 5c; ¼ lb. 10c; lb. 30c.

LANE'S IMPERIAL.—The largest and most prolific of all sugar beets. This variety is most used for feeding purposes. Pkt* 5c; 1 lb. 10c; lb. 30c,

Cabbage

French, Choux Pommes. German. Kopf Kohl.

To secure early cabbages, sow seed in fall in boxes and winter the young plants in cold frames, or it may be sown in February or March in hotbeds. The latter plan is generally adopted in this neighborhood. The February sown plants, when large enough, should be transplanted into cold frames, and as early as the ground is in fit condition they should be planted into the garden in rows about two feet and about eighteen inches in the row. The late varieties should be sown about the lst of May and set out in the garden in July. As these grow larger than the early varieties, they should be planted in rows about three feet apart and about two feet apart in the row.

EARLY SPRING CABBAGE--This now famous extra early cabbage has been grown by a number of the progressive cubbage growers of the country, and it has given entire satisfaction. It is of the type of the Early "Allhead." resembling it in the habit of growth, but is smaller and is as early as the Wakefield. The heads have few outside leaves and these are small and grows oclose to the head that they can be planted very close together. It is round in shape, slightly flatteped, very solid, even before the cabbages attain their mature size. On account of its shape, preductiveness and solidity it will become one of the most profitable early sort. Market gardeners cannot afford to be without this, as it will be a good "seller." Pkt. 5c; oz. 30c; ¼ lb. 80c; 11b. 82.30,

EARLY WINNINGSTADT -- One of the surest headers grown, cone shaped and remarkably hard and solid; desirable for both early and late; quality excellent. Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.50.

THE CHARLESTON WAKEFIELD - This variety is a selection of the best and largest

heads of the Early Jersey Wakefield, and we can offer it with confidence to those who desire a larger size than the above mentioned variety. It will average about 50 per cent larger in size than the old type of Wakefield, and is only about two or three days later. Pkt. 50; oz. 25c; 14, 15, 75c; 1b, \$2.00.

Early Jersey Wakefield,

EARLY JERSEY WAKEFIELD—No words of praise can be written about our Jersey Wakefield that would recommend this most desirable cabbage too highly. It is to-day more largely planted by market and private gardeners all over the United States than any other first early cabbage known. It gives every market gardener who plants it complete control of the early markets, and is everywhere pronounced by them the best and mast profitable first early cabbage. It is ten days earlier than any other early cabbage. Price—Pkt. 5c; oz. 25c; ¼ lb. 75c; lb. \$2.00.

NEW EXPRESS-Produces fair sized heads in eighty to eighty-five days from sowing of seed. Pkt. 5c; qz. 25c; ¼ lb. 60c; lb. \$2.00.

EARLY YORK DWARF-An early spring and summer variety; heads small; very tender Pkt-5c; oz. 25c; ¼ 1b. 60c; lb. \$1.40.

EARLY YORK LARGE—Two weeks later than the Early York Dwarf, but larger; stands the heat well. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$1.40.

HENDERSON'S EARLY SUMMER—This variety is deserved by popular with market gardeners. It forms large, solid, round, compact heads of excellent quality. Pkt. 5c; oz. 30c; ¼-lb. 60c; lb. \$2.00.

BURPEE'S ALLHEAD—We quote the originator's description: "Earliest of all large cabbages, often coming in before the Early Summer. It is at least one-third larger than this popular variety, and therefore much more profitable to the market gardeners, who have in this variety a cabbage larger and at the same time earlier. Seed of the Allhead sown in July and plants set out about the middle of August will bring heads large and solid, which are sure to stand the winter well." Pkt. 5c; oz. 30c; ½-1b. 60c; 1b. 42.00.

ALL SEASONS—This variety is certainly one of the very best for all the year around, forming a solid and compact head of very fine quality. Pkt. 5c; oz. 30c; 16.60c; 1b, \$2.00. HENDERSON'S SUCCESSION—One of the finest second early cabbages yet introduced. It is about one week later than the early summer, but is double the size and is so finely bred that, in a field of ten acres, every head was a perfect specimen fit for exhibition purposes. Pkt. 5c, oz. 25c, ½ 1b. 60c, lb. \$2.00.

tif no a

EXCELSIOR FLAT DUTCH—A low-growing variety, heads large bluish green, round, solid, broad and flat on top, and often tinted with red and brown. Pkt. 5c, oz. 20c, ¼ lb, 50c, lb, \$1.50.

SUREHEAD—Very reliable cabbage, large, round, flattened heads of the Flat Dutch type. A good keeper and shipper and has become very popular. Pkt. 5c, oz. 20c, ¼ 1b. 60c, 1b. \$2.00.

PREMIUM LATE DRUMHEAD—We recommend this sort to market gardeners and growers for shipping purposes. In good, rich soil and with a favorable season, 'he heads will grow to an enormous size. Very compact and solid, and of excellent flavor. Pkt. 5c; oz. 25c; ½ lb. 60c; lb. \$2.00.

THE N. S. CO'S SEL. PREMIUM LATE FLAT DUTCH—This we consider superior to any late cabbage in cultivation. It possesses all the good qualities of the Late Flat Dutch, and is a sure header. Our stock of this variety has been especially raised for us from carefully selected heads, and we think it superior to any other strain of this popular variety. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.00

St. Louis Late Market Cabbage,

ST. LOUIS LATE MARKET—It is a large, late strain of market gardener's cabbage. The heads are of large size, hard and firm, with but few outside leaves; stems short, foliage compact and of a beautiful green color. It is a very desirable variety for a late crop on account of its solidity and because it is an excellent winter keeper. It also stands a considerable time without bursting. In quality it is not quite equal to THE SUCCESSION, or BURPEE'S SURE-HEAD, as a summer Cabbage, being slighty strong, but improves as the season advances, making it a winter Cabbage. The hard, thick, flat heads are remarkably uniform in color, as well as in shape and size. Per pkt. 5c; oz. 30c 410.70c. lb.82.25.

HENDERSON'S AUTUMN KING...A strain of late Cabbage which is highly spoken of by all market, and family gardeners who have thus far tested it. The heads are of enormous size and very solid. It has few outer leaves and will produce a greater weight of crop from the same space of ground than any other late Cabbage. Pkt. 5c, oz. 25c, ¼ lb. 6cc, lb. \$2.25.

THE LUPTON—This new winter cabbage was originated by Mr. J. M. Lupton, one of the best seed growers on Long Island. It is the result of an effort to combine in one variety the best qualities of second early and late sorts. It is earlier than Flat Dutch or Drumhead, and makes it therefore suitable for main crop. The heads are very large, solid and fine-grained, and are not likely to crack open. The stalk is rather short; color dark green. A very good keeper. Pkt. 5c. 02. 25c. 14 lb. 60c. 1b. lb. \$2.25.

and are not likely to crack open. The stalk is rather short; color dark green. A very good keeper, Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. lb. \$2.25. DANISH BLL HEAD—One of the best varieties for gen ral crop. It has been selected for more than fifty years by the Danish gardeners, who grow it almost exclusively for winter cabbage and annually export large quanties. The heads are not as large as Late Flat Dutch, but harder and more solid, fine-grained and good keepers, Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

LUXEMBURG, OR HARD HEAD-The Chicago market gardeners have for several years grown this variety, which was brought there by a German gardener who knew no name for it. It proved so valuable that the seed has been sold frequently at \$1.00 per ounce, and sometimes higher. It makes a very hard head of good size and extraordinary weight, and is remarkable for its keeping qualities when buried over winter. It is an excellent sort for late spring sales, after the other sorts are gone, when it commands a high price owing to its fresh greep color, size and quality. It is undoubtedly one of the most profitable kinds to grow, and every gardener should have it. Pkt. 5c, ½ oz. 15e, oz. 25c, ¼ 1b. 60c, lb. \$2.25.

EARLY BLOOD, OR DARK RED ERFURT— Early, heads round and solid, fine color and excellent quality. Pkt. 5c; oz. 25c; 1/4 lb. 60c; lb. \$2.25.

MAMMOTH ROCK RED—This is by far the best, largest and surest heading red cabbage ever introduced. The plant is large with numerous spreading leaves. The head is large, round, very solid and deep red color. Pkt. 5c, oz. 25c, ½ 1b., 60c, 1b. \$2.25.

RED DUTCH, OR PICKLING—Medium size, very hard, oblong heads. Good for pickling. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

SAVOY CABBAGE.

French, Chau de Savoie. German, Wirsingkohl.

NETTED SAVOY—This is the finest of the Savoy class and a general favorite. Heads large, very solid and compact, of a yellowish-green color. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

AMERICAN LATE DRUMHEAD SAVOY—Heads large, round and compact. Excellent for winter use. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$2.25.

CHICORY.

French, Chicoree, German, Cigorien,

LARGE ROOTED, OR COFFEE—Sown in drills, the roots become well developed. When they are dried, roasted or ground, they become the chicory of commerce, and are used in adulterating coffee. Pkt. 5c; oz. 19c; 1/4 lb. 35c; lb. 31.00.

Cauliflower

French, Chou-fleur, German, Blumenkohl,

Sow in February or March in a hot-bed, transplanting the plants when large enough in another or the same frame, and gradually haroother or the same frame, and gradually haro-ening them off, preparatory to planting them out as early as the ground is in fit condition. Any good garden soil, if thoroughly cultivated and made very rich by manuring, will suit. When heading tie the top leaves together to protect from exposure to the sun. There is no vegetable where the quality of the seed has more to do with the success of the crop than the cauliflower. Our seed is most carefully grown and with the best care.

EXTRA EARLY SELECTED SNOWBALL CAULIFLOWER.

Our Strain of Extra Early Selected Snowball our Strain of Extra Early Selected Showball is exceedingly early and hardy and is one of the surest to make a solid, compact head. Pkt. 20c; ¼ oz. \$1.00; oz. \$3.00; ¼ lb. \$9.00.

BURPEE'S BEST EARLY—This grand variety has proved to be one of the very best early Cauliflowers in cultivation. Pkt. 20c; 14 oz. 50;

EXTRA EARLY SELECT DWARF ERFURT—This is the finest variety grown, very large Pkt. 20e; ¼ oz. \$1.00 oz. \$3.00; ¼ lb. \$9.00.

EARLY SNOWBALL—Fine heading variety, true heads, pure white, and sure headers. Pkt. 20c; ¼ oz, 60c; oz. \$2.00; ¼ ib. \$7.00.

EARLY DWARF ERFURT-Very good, and a fine strain. Not so early as the Selected Erfurt. Pkt. 20c; ¼ oz. 60c; oz. \$2.00; lb. \$7.00. VEITCH'S AUTUMN GIANT-A distinct and valuable late variety. Pkt. 5c; ¼ oz. 20c; oz. 60c;

1/4 lb. \$1.75.

EXTRA EARLY PARIS—Head rather large. Pkt. 5c; ¼ oz. 30c; oz. \$1.00; ¼ lb. \$2.59. LENORMAND'S SHORT STEMMED — A French variety. Pkt. 5c;; ¼ oz. 25c; oz. 90c; ¼ lb. \$2.25.

. Chervil

French, Cerfeul. German, Gartenkerbel.

By many this is preferred to parsley for garnishing, and its aromatic leaves are much used for seasoning and in salads. Sow early in the spring, in rich, well prepared sand soil. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.28.

Cress

French, Cresson, German, Kresse.

Sow peppergrass early in the spring, in shallow drills, and every two or three weeks for a succession, cut often, as it will continue to grow. The Water Cress must be sown on the margin of a stream or running water, or in a

very moist location.

CURLED, OR PEPPER GRASS—Common and well known. Pkt. 5c; oz. 10c; ¼ lb. 15c; lb. 50c.

TRUE WATER CRESS—Leaves tender and highly flavored. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; lb.

Chives

German, Schnitt lauch.

Chives are perfectly hardy little perennial members of the onion tribe, and are grown exclusively for their tops, which are used wherever the flavor of onion is desired. Planted in small clumps in any common garden soil, they will grow readily. Per bunch, 15c; two for 25c.

Corn Salad

French, Mache, German, Feldsalat oder Rabinschen.

Sow early in the fall or first of the spring, in shallow drills, about twelve inches apart. Cover lightly, and if very dry, occasionally water. To protect through the winter, cover with straw or light evergreen brush. LARGE LEAVED—The best variety cultivat ed. Pkt. 5c; oz. 15c; ¼ 1b. 25c; lb. 80c.

Celeriac .

Turnip Rooted Celery.

A variety of celery having turnip shaped roots, which when cooked and sli ed in vinegar makes a most excellent salad.

LARGE, SMOOTH PRAGUE—This is the largest and best variety grewn, and grows to a large size, Pkt. 5c; oz. 25c; ½ lb. 50c; lb. \$1.75. GIANT ERFURT, TURNIP ROOTED—A good variety for salads, acups, etc. Pkt. oc; oz. 25c; ½ lb. 50c; lb. \$1.75.

RUBICON HALF LONG-Since the introduction of this valuable and distinct American carrct a few years ago, it has rapidly grown in popularity, until now it is more largely grown than all other varieties of carrot combined. It is the best in shape, and its deep red orange colored flesd is the finest of all in quality. The strain was selected and perfected by a well known market gardener of Connecticut, under whose care the carrots attained such uniform shape that they were almost exact duplicates of each other. It is earlier than Danvers, about the same length, but heavier and thicker at the shoulders, making it more productive; the leaves are also shorter, fewer and finer. It is a wonderfully heavy cropper, producing thirty to forty tons to the acre under good field cultur. It grows without neck, the crown is holow, and it grows well under the ground, which prevents it from becoming sunburnt. Pkg. 5c; oz. 10c; ¼ lb. 25c; lb. 70c.

GUERANDE OR OXHEART—A variety with short, thick roots, the diameter often exceeding the length. Color bright orange, sweet and fine grained, good for table or stock. Pkt. 5c; oz. 10c;

14 lb. 25c; lb. 70. EARLY HALF LONG SCARLET STUMP-ROOTED—An excellent variety for market gardeners, color scarlet; good for shallow soil. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 70c.

DANVERS-There is no variety grown which wiii produce as much to the acre, with a mini-mum length of root, as this one. Under proper reasonably be expected to produce, which it may reasonably be expected to produce, which it has dore, 25 to 30 tons per acre. It is of medium length and heavy at the neck, but pointed and quite smooth, color a rich orange. Pkt. 5c; oz. 10c · ¼ lb. 25e; lb. 75c.

CHANTENAY-One of the most perfect and uniform in shape, smooth and a heavy yielder. It is fine in texture and easily dug; the flesh is of a beautiful deep orange, solid, tender and of excellent flavor. One of the very best for table use. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c, IMPROVED LONG ORANGE—A well known

standard sort, roots long, thickest near the crown

tapering regularly to a point; color deep orange; suitable for the table and main field crop. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 60c. IGARLY SCARLET HORN STUMP-ROOTED—

A fine variety of medium size; color deep scarlet; fine flavor. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 70c.

Celery

Sow in April and May and rake seeds in lightly: water, and shade from strong sun. Prepare trenches from two to four feet apart, a foot wide and a foot deep; dig into the bottom plenty of weil-rotted manure, and set the plants when they are three or four inches high, six to eight inches apart in each trench. Keep them shaded until started and gradually earth them up as they grow.

WHITE PLUME-Unlike all other varieties this one does not require to be earthed up, but if only loosely tied, or a few handsful of earth brought closely around the base of the leaves to keep them close together, all the inner leaves or thin stalks will turn white and crisp. Pkt. 5c; oz. 20c; ¼ lb. 50c; lb. \$1.75.

SELF-BLANCHING CELERY-Like GOLDEN the White Plume, this celery requires very little earthing up, and in many other respects it is similar to that favorite sort, differing, however, in color, which is yellowish, the heart being large and solid and of a beautiful golden hue. Pkt. 5c; oz. 25c; 14 lb. 75c; lb. \$2.50.

GIANT PASCAL-Grows about two feet high; the stalks are very broad, thick and crisp, and entirely stringless; the width and thickness of the stalks are distinctive features of this variety. It bleaches with but slight "earthing up," and very quickly, usually in five or six days. Pkt. 5c; oz. 25c; ¼ lb. 50c; lb. \$1.75.

GOLDEN DWARF, OR GOLDEN HEART-The heart is very large, the stem waxy golden yellow, when fully blanched. These are also crisp and quite solid and of excellent flavor. Pkt. 5c; oz. 25c; ¼ lb. 50c; lb. \$1.75. CELERY FOR PLAVORING—Os. 10c; ¼ lb.

20c; lb. 40c.

Cucumbers

French, Coucombre. German, Gurken. Plant in hills four feet apart, in well prepared, warm, rich, loamy soil. Mix a shovelful of well rotted manure in each hill. The fruit should be picked when large enough, whether wanted or not.

CUMBERLAND—A new and distinct variety, said to have originated from crossing the Parisian Pickling and the Early White Spine. It certainly has the good qualities of each of these sorts. The fruits are large, symmetrical, dark green, covered with innumerable small, white spines, and are of prime quality for sileing. The vine is vigorous, wonderfully prolitic, and continues in bearing much longer than most sorts. Pkt. 5c; oz. 30c; ¾-1b, 50c; lb. \$1.55.

EARLY FRAME, OR SHORT GREEN—One of the standard pickling kind, shape uniform, short and somewhat thick. Pkt. 5c; oz. 10c; 4 lb. 3c; 15. 5(,00.

Chicago Pickling Cucumber.

CHICAGO PICKLING—The variety used almost exclusively by the Chicago pickle factories. The best for market, also for home use. Pkt. 5c; oz. 10c; ½ 1b. 30c; lb. \$1.00.

GREEN PROLIFIC—Enormously productive, crisp and tender. One of the finest for pickles. Pkt. 5c; oz.10c; 1/4 lb. 30c; lb. \$100.

EARLY RUSSIAN—The earliest of all varieties; makes a fine pickle; can be used for slicing in the early summer. Pkt. 5c; oz. 10c; 11b. \$1.00.

EARLY CLUSTER-A good pickling variety. It grows in clusters. Fruit very uniform and choice. Pkt. 5c; oz. 20c; 1/4 lb. 60c; lb. \$1.75.

IMPROVED EXTRA EARLY WHITE SPINE—This is a favorite variety, producing fruit from six to eight inches in length and two to three inches in diameter, of a handsome deep green; flesh crisp and of fine flavor. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. \$1.00.

BOSTON PICKLING—One of the most prolific of the pickling sorts. We recommend it highly for the home garden. Pkt. 5c; oz. 10c; ½ ib. 30c; ib. \$1.00. EXTRA LONG WHITE SPINE—A large variety of White Spine, largely used for forcing by market gardners, Pkt. 5c; oz. 10cc; 1/41b. 30c; 1b. \$1.00.

ARLINGTON WHITE SPINE—The young fruits are of a dark color and pointed. It is a favorite sort with pickle manufacturers, giving a very small proportion of malformed fruit. Pkt. 5c; cz. 10c; ½ 1b. 30c; 1b. \$1.00.

PEERLESS WHITE SPINE—One of the finest strains of White Spine. Fruit of large size, straight, productive: skin deep green, holding color until maturity. Pkt. 5c; oz. 10c; ½lb. 30c; lb, \$1.00.

WHITE WONDER—This cucumber grows about eight inches long and two inches thick. Color, ivory white. The flesh is very solid and of very fine flavor. It remains in good condition for a long time.

Pkt. 5c; oz. 52; 1/21b. 50c

EVERGREEN WHITE SPINE—The most popular of all the White Spine varieties. Of beautiful shape and color. It remains in the green state longer than any other variety. Pkt. 5c; oz. 10c; ½ lb. 30c; lb. \$ 00.

GIANT PERA—An exceedingly large growing sort, of excellent quality for slicing. Shape long, thick and smooth , having no spines. Pkt. 5c; oz. 10c; ½-1b. 80c; 1b. \$1.00

COOL AND CRISP—The skin is very dark green, almost black, and covered with knobs, upon which the spines set, which gives the pickle a very attractive appearance. They are very early and prolific. As a cucumber for slicing it is splendid. Pkt. 5c; oz. 10c, 11b. 30c

EX. LONG GREEN GIANT—Fruits of this variety are long, 14 to 18 inches, cylindrical in shape, crisp and firm and are fit for the table almost as early as the shorter sorts; are almost solid meat, being nearly seedless. Pkt. 5c; oz. 10c, -2 30c; 10...0

JAPANESE CLIMBING—This variety can be grown on poles or trellises, having the climbing habit more than any other variety. Fruit of medium size, well formed, of a dark green color and of exquisite flavor. Pkt. 5c; oz. 10c; 1/1b. 30c; 1b. 81,00.

SNAKE OR SERPENT-Valuable as a curiosity. Good for display at fairs. For eating, the quality is not up to the standard. Pkt. 5c; oz. 25c; 1/41b. 80c.

SMALL GHERKIN (Burr Cucumber)—Is esteemed highly for bottling. It is small in size, in shape like a chestnut burr. Quality fine. Pkt. 5c; oz. 20c; 41b. 70c; lb. \$2.00.

IMPROVED LONG GREEN -- Produced by selections from the Long Green Vines. Vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts; fruit about 12 inches long, firm and crisp. The young fruit makes excellent pickles, and when ripe is best for sweet pickles. We offer a carefully selected strain, uniformly long and of good form, with the large werts and spines well distributed over the surface instead of being clustered at one end as in Inferior atock. Pkt. 5c; oz. 10c; 1-1. 30c; 1b. \$1.00.

Improved Long Green

Corn (Sweet or Sugar)

French, Mais. German, Welschkorn,

Plant in hills three feet apart and leave four plants to the hill. Plant at intervals of ten days from early spring to middle of summer.

EARLY CORY (RED COB)—One of the earliest varieties of Sweet Corn known, with fair-sized ears. Excellent for market and has attained wide popularity. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$300.

EXTRA EARLY ADAMS—The hardiest and earliest variety for table use, but not a sweet corn Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

FIRST OF ALL—This new Sweet Corn is the earliest of all. It is a week earlier than the Cory and of superior quality. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$5.00.

CROSBY'S EARLY-Early and a great favorite in the market. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY MINNESOTA—An extra early variety. Very productive and of excellent quality. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

SHAKER'S EARLY—The kernels are very large, of pearly whiteness and delicious flavor. It is quite as early as the Minnesota and the ears are much larger. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. 83.00.

PERRY'S HYBRID—A very fine early variety, as early as the foregoing. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

HICKOX IMPROVED SWEET—Of medium earliness and is valuable alike for the market, family garden or for canning. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c bu, \$3.00.

STABLER'S EXTRA EARLY—A large early sort, coming into use about the same time as Marblehead. It is a good market variety; very sweet. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3 00.

COUNTRY GENTLEMAN—This is the variety par excellence for quality. It is medium early, rows zig-zag, grains long, flavor beyond description. Excellent for canning. Pkt, 5c; pt. 20c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY WHITE CORY—A selection of the Cory. Of the same character in all respects, except that it has a white cob and kernels. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

MAMMOTH WHITE CORY—An improvement on the White Cory. The ears are twelve rowed and nearly twice as large as the White Cory and covered with very large white grains of good quality. It is extra early. No market gardener should be without it. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

NEW EARLY EVERGREEN SWEET CORN'—One of the very best sugar corns in existence, possessing every good quality of Stowell's Evergreen and resembling it in every respect, except that the stalk is about one foot shorter and that it will mature in 80 days, or fully 10 days earlier. The ears are like Stowell's, very large, with about eighteen rows of very large grains, which are of the finest quality, Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

STOWELL'S EVERGREEN—This variety is more largely planted than any other, being the general favorite with canners and market gardeners for late use. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3 00.

MAMMOTH LATE—This produces the largest ears of any Sweet Corn, a single ear sometimes weighing as much as two or three pounds. It ripens a little later than the Evergreen. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

Early Ford Hook.

PEEP O' DAY

The two points of this remarkable corn to which we wish to call most particular attention are its extraordinary earliness and unparalleled sweetness; surpassing in these particulars any other known variety, early or late.

The early varieties of sweet corn do not as a rule yield as heavily as the late sorts, but Peep O' Day not only surpasses in this particular all other early varieties, but all late varieties as well; in fact our crops of Peep O' Day have given us for the past year almost double the yield per acre of any other variety we have grown, early or late.

Incredible as this may seem, it is readly accounted for by the fact that the stalks bear from two to five ears each and the growth being dwarf—about 4 feet admits of vary close planting.

feet, admits of very close planting. Pkt. 5c; pt. 15c; qt. 25c; pk. 90c; bu. \$3.00.

EARLY FORD HOOK

This is the largest-eared extrs early dwarf-growing true sweet corn,—the ears averaging six to seven inches in length. It is two to three days earlier than the Cory, and has both grains and cob of pure white coloring. The ears are eight-rowed, with quite small cob and deep grains.

While similar in growth, it is greatly superior to the Cory in sweetness and flavor.

Pkt, 5c; pt. 15c; qt. 25c; pk. 90c; bu.\$3,00

Dandelion

French, Disse-en-lit, German, Loewenzahn. LARGE LEAVED-Leaves are fully double the size of the common Dandelion. It is a great advance over the old variety. Pkt. 5c; oz. 25c; 41b. 60c; 1b. \$2.00.

Egg Plant

French, Aubergine. German, Eirpfianze. Sow in hot beds

very early in the spring, and transplant to two or three feet apart, in very rich warm ground. Hoe often and hill up gradually until they blossom.

IMPROVED NEW YORK PURPLE - The best variety in cultivation, being early, early, a sure cropper and of fine quality. The fruit is large, oval, very deep purple. Pkt. 5c; oz. 40c; ¼ lb. \$1.00; lb. \$3.25.

N. Y. Improved Egg Plant

EARLY LONG PURPLE-Earliest and most productive. Pkt. 5c; oz. 20c; 4lb. 60c; lb. \$2.00.
BLACK PEKIN—The fruit is jet black, round in form, very solid. Pkt. 5c; oz. 30c; 4lb. 75c;

Endive

French, Chicoree. German, Endivien. Sow in August in shallow drills, twelve to fif-teen inches apart, and thin to one foot in drills. When fully grown the over the outer leaves of a few plants every week or ten days to blanch.

WHITE CURLED—Self-blanching. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.
GREEN CURLED—Leaves curled, dark green. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.
FRENCH CURLED MOSS—Handsomely curled. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Gourds

French, Gourde. German, Zier Kuerbis.

THE DIPPER GOURD—This variety is useful for many household purposes. When grown on the ground the stems will be curved, while if raised as a climbing vine on a trellis the weight of the blossom end will cause the stem to grow straight. Pkt. 5c; oz. 25c; ¼ lb. 40c; lb. \$1.00.

JAPANESE NEST-EGG GOURD—These exactly resemble in color, shape and size the eggs of hens. do not crack and are uninjured by cold

of hens, do not crack and are uninjured by cold or wet. They make the very best nest-eggs. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.00.

Horse Radish

The best horseradish is produced from small pieces of root. These are to be set small end down, so that the top will be two inches below the surface. It is hardy and may be left in the ground until spring before digging. We frequently receive orders for the seed of this vegetable, but we can supply the roots only. Dox. 20c; 100, 75c; 1,600, \$5.00.

Kale or Borecole

French, Chou Vert. German, Blaetter-Kohl, The Kales make excellent greens for winter and spring use. Sow the seed about the end of spring, and then transplant and cultivate like cabbage.

Dwarf Green Curled Kale, DWARF GREEN CURLED—A sort of espe-DWARF GREEN CURLED—A sort of especial excellence, being a very fine curled variety of yellowish-green color, growing very close to the ground. Pkt. 5c; oz. 15c; ¼1b. 25c; lb. 80c. GREEN CURLED SCOTCH—Grows about 18 inches in height and spreads. The leaves are

bright green, beautifully curled. Pkt. 5c; oz. 15c; ¼lb. 25c; lb. 80c.

BROWN GERMAN CURLED—Similar to Scotch, except the color, which is of a dull purple; most esteemed by the Germans. Pkt. 5c; oz. 15c; ½lb. 25c; lb. 75c.

Kohl Rabi

French, Chou-rave, German, Kohl-Rabi.

Early White Vienna Kohl Rabi.

Cultivation same as directed for Cabbage, taking care to set the plants no deeper than they stood in the seed bed, and in hoeing not to heap much earth about them.

EARLIEST WHITE VIENNA--The earliest and best for forcing. Pkt, 5c; oz.20c; 11b.60c; ib. \$2.00.

EARLIEST PURPLE VIENNA-Differs from the Early White Vienna only in color, which is bluish purple. Pkt. 5c; oz. 20c; 1/1b, 60c; lb \$2.00.

GIANT GREEN—A good variety for summer and fall use Grows larger than the Vienna. Pkt. 50; oz. 200; 11b. 60c; lb. \$2.00.

Leek

Sow early in spring. When about 6 inches high transplant into rows about 10 inches apart each way and as deep as possible to perfect the blanching process. The richer the soil the finer the leeks will grow.

MUSSELBURG-Pkt. 5c; ox. 15c; 1/4 lb. 40c; lb. \$1.00.

LARGE AMERICAN FLAG—A favorite mar-ket variety, Pkt. 5c; oz. 10c; 1/1b. 40c; lb. \$1.00.

LETTUCE

French, Laitue, German, Salat.

For an early crop sow under glass in February and transplant on a well prepared bed, in some sheltered corner, in April. For successive crops, sow in beds of well pulverized soil in March, and at intervals of about a fortnight until the end of May.

Black Seeded Simpson Lettuce.

BLACK SEEDED SIMPSON—The standard sort for early spring planting and for growing under glass. Pkt. 5c; oz. 10c; 1/4lb. 35c; lb., \$1.00.

ST. LOUIS MARKET—This is one of the very best market sorts. Medium size, light green color. Very slow to run to seed; solid heading sort. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

LARGE WHITE SUMMER CABBAGE—A good summer variety Heads of good size, close and well formed. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c

ALL THE YEAR ROUND—A hardy, compact growing variety with small, close heads of a dark green color. Pkt. 5c; oz. 10c; 1/41b. 30c. 1b, 90c.

GOLDEN BALL—A fine variety with very solid heads, of superb quality and great beauty. It is quite as early as the White Tennis Ball, has larger heads and is unsurpassed for table use. Pkt. 5c; oz. 10c; 1/4 lb. 30c: 1b. 90c.

Hanson Lettuce

HANSON—A very fine heading variety of large size. The heads are very solid, sweet, tender and crisp throughout and entirely free from any bitter taste. Pkt. 5c; oz. 10c; ½ 1b. 30c; lb. 90c.

BLONDE BLOCKHEAD—A very handsome lettuce, forming large, solid heads of rich golden yellow, of spiendid quality and an excelent keeper. Pkt. 5c; oz, 10c; ¼ lb. 30c: lb. 90c.

GRAND RAPIDS FORCING—In the vicinity of Grand Rapids, Mich., this is the only variety they plant for forcing. It is an excellent sort. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

EARLY CURLED SIMPSON—This variety does not head, but forms a compact, close mass of leaves. Pkt. 5c; oz. 10c; 1/4lb, 30c; lb. 90c.

GREEN FRINGED—This variety is beautifully cut and fringed and furnishes an abundance of tender leaves. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

PRIZE HEAD—It forms a large, close head, very crisp, tender and of excellent flavor, Pkt. 5c; oz. 16c; ¼ lb. 80c; lb. 90c.

TILTON'S WHITE STAR—Of the black seeded Simpson type, but grows larger and more rapidly, has a broader, thicker, darker colored leaf, less frilled at the edge, forms a larger, more distinct and solid central cluster of leaves, Blanches perfectly and is of excellent quality. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

SILVER BALL—Produces a beautiful head, firm, solid and compact, with handsomely curied leaves. It is of attractive silver-white color, very rich, buttery and of most delicious flavor. pkt., 5c; oz. 10c; 1/4 lb. 30c; lb. 90c.

BIG BOSTON—This variety resembles the well known Boston Market, but produces heads about double the size and matures a week later. A valuable sort for open ground or forcing. Pkt. 5c; oz. 10c; 1/2 lb. 30c; lb. 90c.

DENVER MARKET (SEED WHITE)—A variety of the same general character of growth as the Tilton's White Star, this being noticeable for its savoved and crimped leaf. Pkt. 5c; oz. 10c; ¼ 1b. 30c; lb. 90c.

"BOSTON CURLED—A handsome variety, much used for garnishing. Early and of good quality. Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

EARLY WHITE SELF-FOLDING (SEED WHITE)—A distinct Cos lettuce which does not need tying up. The leaves are yellowish-white in color, long, narrow, upright, and folding into a solid head like that of an Early York Cabbage and very crisp and tender. This is a truly self-blanching lettuce of superior flavor. Pkt. 5c; oz. 19c; ¼ lb. 30c; lb. 90c.

THE TRIANON COS, OR CELERY LET-TUCE—This new variety from France is by far the best Cos lettuce we have ever grown, and we recommend it, Pkt. 5c; oz. 10c; ¼ lb. 30c; lb. 90c.

TESTED SEED CORN

Melons--Musk

French, Melon. German, Zucker Melone.

This melon grows best in light soil. Plant in hills about six feet apart, mixing in each hill about a shovelful of well rotted manure. Sow about a dozen seeds in every hill, early in May, and when well started thin out to three or four of the strongest plants.

PRINCESS—It is quite large, dark green skin, heavily netted, small seed cavity; flesh thick of a rich orange color, very sweet, watery and of a most delicious flavor—in short, about perfection. Not a good shipper, but sells well in any home market Pkt. 5c; oz. 15c; ½ 1b. 35c; 1b. \$1.00.

EXTRA EARLY GRAND RAPIDS—A new extra early, yellow-fleshed sort, of handsome shape. Profitable to the gardener on account of its size, attractive appearance and extreme earliness. Pkt. 5c; oz. 15c; ½ lb. 35c; lb. 81.00.

TIP-TOP — A new yellow-fleshed melon of very distinct appearance. Unequalled for uniform good quality. Every fruit produced, whether large or small, is a good one. It will please all those who use it. Pkt. 5c; oz. 15c; ¼ 1b. 35c; 1b. \$1.00.

EXTRA EARLY CITRON—This excellent sort of melon does not differ from the Hackensack except that it is a little smaller. While small it is very deep fleshed. Dark green color. Pkt. 5c; oz. 15c; ¼ 1b. 35c; 1b. \$1.00.

MELROSE—This new melon is very hardy, strong and vigorous. The vines remain green longer than any other. It is very early in season and of extra choice quality. Pkt. 5c; oz. 15c; ½ lb. 40c; lb. \$1.00.

OSAGE—This is one of the finest all around melons in existence. Skin dark green, almost black, Very slightly netted. Flesh rich salmon. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

JERSEY BELLE-Extra quality. Beautiful deep green flesh. Pkt. 5c; oz. 15c; 1 lb. 40c; lb. \$1.00.

MELON PEACH-Pkt. 5c; oz. 15c; 1 lb. 40c; lb. \$1.25.

BAY VIEW—A very prolific and finely flavored and green-fleshed melon. Pkt. 5c; oz. 15c; 1/2 lb. 40c; lb. \$1.25.

NETTED GEM — A very early variety of small size. It is globe-shaped, green-fleshed and of delicious flavor. Pkt, 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

EMERALD GEM—A choice melon for home use. Size medium, of fine appearance. Flesh juicy, delicious and rich salmon. Pkt. 5c; oz. 10c; ¼ lb. 50c; lb. \$1,40.

CHICAGO MARKET—A standard, green-fleshed nut melon. The favorite of the Chicago market. Pkt. 5c; oz. 15c; ½ lb. 35c; lb \$1.00.

LONG YELLOW CANTALOUPE—A very large variety, ribbed and netted. Salmon fleshed. Pkt. 5c; oz. 15c; ¼ 1b. 35c; 1b. \$1.00.

MONTREAL MARKET-One of the largest melons we know of. Flesh green, thick and of very fine flavor. Pkt. 5c; oz. 15c; ¼ lb. 45c; lb. \$1.50.

PAUL ROSE MUSKMELON.

NEW MUSKMELON — The "Paul Rose" — This new melon is the result of careful cross-breeding of the Osage and Netted Gem, and for a number of sea. sons past has held the leading place in the Chicage markefs. It combines the size of the Osage, shape and shipping qualities of the Netted Gem with the rich orange color and fine quality of our Emerald Gem. These melons are shipped to the cities in oblong handle-baskets holding one-half bushel each, and so carefully have they been bred for even size that 16 melons exactly fill one of these baskets in two layers of 8 melons each, making a most attractive and easily handled package.

The fruits are nearly round or slightly oval, slightly ribbed and heavily netted of light green or faint golden hue when fully ripe. The flesh is thick, of rich, deep orange color, ripening close down to the rind, with small seed cavity. While the flesh has the deep coloring and superior flavor of the Emerald Gem, it is much firmer (resembling the Netted Gem in this respect), making it an excellent shipping variety. The highest praise we give the "Paul Rose" melon is to state that it is an excellent shipping variety, and in quality ranks higher than all other varieties.

Pkt. 5c; oz. 15c; 1 lb. 35c; lb. \$1.00.

Rock Ford Cantaloupe.

ROCKY FORD CANTALOUPE takes its name from the little town of Rocky Ford, Colorado, which has become as famous for its meions

which has become as famous for its meions as Baltimore for its oysters.

The reason for the wide-spread popularity of these meions is two-fold. First, its superb table qualities, being firm, sweet and remarkably solid. Second, its wonderful shipping qualities, which enables it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juley. It is very early and wenderfully productive. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

IARGE HACKENSACK—Large, round, flattened, green flesh. Pkt. 5c; oz. 15c; ½ lb. 35c; lb. \$1.00.

EXTRA EARLY HACKENSACK—Ten days earlier than the foregoing. Pkt. 5c; oz 15c; ¾ lb. 35c; lb. \$1.00.

LONG ISLAND BEAUTY—A splendid new variety of the Hackensack type, of superior quality, with green flesh and densely netted. In shape resembling Hackensack, slightly more ribbed and a decidedly more attractive melon. It is claimed to be the earliest in cultivation. Ikt. 5c; oz. 15c; ½ lb. 30c; lb. \$1.00.

ACME, OR BALTIMORE—Oblong, pointed light green flesh. Pkt. 5c; oz. 15c; ¼ lb. 80c; lb. \$1.00.

BANANA — Grows eighteen to twenty-four, inches long; a curiosity. Pkt. 5c; oz. 15c: ¼ lb 80c; lb. \$1.00.

PROLIFIC NUTMEG-Round, heavily netted, thick green flesh. Pkt. 5c; oz. 15c; 1/2 lb. 35c; lb. \$1.00.

MILLER'S CREAM-Flesh of rich salmon, thick and sweet. Pkt. 5c; oz. 15c; 4-lb. 40c; lb. \$1.25.

GREEN-FLESHED OSAGE—Pea-green flesh, of delicious flavor. Pkt. 5c; oz. 15c; 1/4-lb. 40c; lb. \$1.25.

THE BANQUET-Densely netted, globular, dark rich salmon flesh. Pkt. 5c; oz. 15c; 1/4-lb. 40c; lb. \$1.25.

Melons-Water

French, Melon d'eau. German, Wasser-Melon.

Plant in hills eight to ten feet apart each way with a shovelful of well-rotted manure mixed with the soll in each hill. Put six or eight seeds in each hill and finally leave, when danger from insects is past, but three strong plants. Hoe often. If extra large fruit is desired have but two or three melons to the vice.

KLECKLY SWEETS — The finest melon yet intro duced for home growing and table use. The vines are strong, vigorous, and the fruits grow uniformly to large size, 18 to 20 inches long and 12 inches in diameter. The skin is a rich, dark green; flesh bright scarlet, ripening close to the rind which is but half an inch thick, so that shipping it long distances is not practicable. The seeds are white, lying close to the Skin and leaving a very large, solid heart. Crisp, sugary, melting and entirely free from stringiness. The handsome appearance, uniform growth and luscious sweetness make it one of the finest melons in cultivation. Our seed was saved from carefully selected melons and is strictly pure and true. Pkt. 5c; oz. 10c; ¼ lb, 25c; lb. 85c.

Cole's Early Water Melon.

COLE'S EARLY—Very hardy, a sure cropper and extremely delicate in texture of flesh, which is of a dark red color. The rind is thin and the quality of the flesh is sustained clear to the rind. It is, however, extremely brittle, hence not desirable for shipping purposes. Pkt. 5c; oz. 10c; ½ lb, 20c; lb. 60c.

CUBAN QUEEN—The largest and one of the best grown, often reaching fifty and sometimes seventy pounds. An excellent keeper, Skin beautifully striped, light and dark green, The fless is red, solid, delicate in flavor and very sweet. Pkt. 5c; oz. 10c; ½ 1b. 20c; ib. 60c,

NEW TRIUMPH WATERMELON—This new melon has created quite a furore among Southern shippers on account of the very high prices reclized by the few who have grown them. Triumph is a cross between the Duke Jones and Kolb's Gem, having the handsome dark green color of the former and the fine-shipping qualities of the latter, but infinitely superior in flavor and grows much larger than either. Mr. D. H. Gilbert, a large Florida grower, writes he gathered from half an acre 523 melons, weighing over 43 lbs, each, with no small melons on the vines. The Monticello Constitution publishes the weight of four prize Triumph melons grown in Georgia at 90 lbs., 95½ lbs., 91¾ lbs and 80 lbs., respectively, Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

FLORIDA FAVORITE—An oblong melon of fine flavor. Pkt. 5c; oz. 10c; 4-lb. 25c; lb. 80c.

PRIDE OF GEORGIA-Round in shape, skin striped. Pkt. 5c; oz. 10c; 4-ib. 25c; ib. 80c.

VICK'S EARLY—Extra early, oblong, skin varies in color. Pkt. 5c; oz. 10c; 1/2 lb. 20c; lb. 60c.

PHINNEY'S EARLY-Very early; flesh bright red, sweet, tender and well flavored. Reliable for market gardeners. Pkt. 5c; oz. 10c; 4-lb. 20c; 1b. 6uc.

ICE CREAM, OR PEERLESS—True white seeded, oblong, luscious. Pkt. 5e; oz. 10c; 4-lb. 20c; 60c.

KOLB'S GEM-The great market melon. Carries well. Pkt. 5c; oz. 10c; 4-1b. 20c; 1b, 60c.

FORDHOOK EARLY—Has proved to be the largest early variety on the list and we verily believe it to be the carliest of all. From seeds planted May 10th ripe meions were produced the last of July. The rind is tough, making it valuable for shipping. Color uniform medium green. Seeds white. Flesh bright red and very sweet. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c.

M'IVER'S WONDERFUL SUGAR—The sweetest melon grown. Without a single exception this is the sweetest watermelon of all. It is strepty superb. The melons grow oblong, resembling Ruttlesnake in shape, attain a great weight and are of very handsome appearance. Never crack or lose their fine flavor in the wettest season, Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 60c.

THE JONES-A great favorite in the South, rich flavor. Pkt. 5c; oz. 10c; 1/4-lb. 25c; lb. 80c.

COLORADO PRESERVING—The best for citron preserves. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 80c. ItED SEED CITRON—Old standard variety, especially used for preserving. Flesh white and solid seeds red. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb.

JUMBO—The shape is round, color green with faint lighter stripes, deep red meat, surpassing all other varieties as much in flavor as in size. Pkt. 5c; oz. 10c; 1/4 lb. 20c; lb. 60c.

New Sweet Heart Water Melon.

NEW SWEET HEART—A magnificent new shipping melon, of uniformly large size and fine quality. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, very heavy, uniformly mottled light and very light green. Rind thin but firm, flesh bright red, firm, solid, but very tender, melting and sweet. Pkt. 5c; oz. 10c; ¼ 1b. 20c; 1b. 60c.

KENTUCKY WONDER - A popular market melon in the west. Pkt. 5c; oz. 10c; ¼ lb.

GEORGIA RATTLESNAKE—A large, oblong taelon. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c. BLACK SPANISH—Earliest round, skin dark green, fiesh red, rich, sugary flavor. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 60c. MAMMOTH IRON CLAD—A standard variety. Grows very large. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 10c.

DIXIE—In this we have a new watermelon of excellent merits and we can recommend it to our customers as the best shipping meion grown, being even larger, earlier and far more productive than Kolb's Gem, which has here-tofore been considered the best meion for ship-ping. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c.

Mushroom Spawn

French, Mousseron. German, Champignon.

French, Mousseron. German, Champignon. Mushrooms may be grown in any dark room or cellar where the temperature can be kept at from 50 to 60 degrees Fahrenheit.

Procure soil from an old pasture and thoroughly mix it with fresh horse manure. Dig a bed a foot in depth, and lay in successive layers of soil and spawn until the bed is filled. In about ten days cover all with a light layer of loam and manure, pressing armly. Within six weeks the mushrooms will appear, and grow rapidly and continually for a month or over. ENGLISH—This variety comes in bricks; lb 25c.

FRENCH—This variety is put up in 2-pound boxes and produces a smaller mushroom than the English. Per lb. 40c.

Mustard

French, Moutard. German, Senf.
YELLOW OR WHITE LONDON—Best for salad. Pkt. 5c; oz., 10c; ½-1b. 15c; lb. 35c.
BROWN OR 3LACK—More pungent than the white. Pkt. oz. 10c; ½-1b. 15c; lb. 35c.
CHINESE CURLED, OR GIANT—Leave twice the size of the white. Pkt. 5c; oz. 10c; ½-1b. 20c; lb. 50c.
GOLDEN—A new very superior sort. Pkt. 5c oz. 10c; ½-1b. 20c; lb. 50c.

Okra or Gumbo

French, Gumbo. German, Ocher.

Sow about the middle of spring in drills, thin the plants to a foot or more apart. Highly esteemed and cultivated for its green seed pods, which are used in soups or stewed and served

HRC Asparagus,
LONG GREEN, OR
HIBDORY, Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 50c,
IMPROVED DWARF GREEN — Early and
very productive Smooth pods. Pkt. 5c; oz. 10c;
4-lb. 20c; lb. 50c.

French, Ognon. German, Zwiebeln. We make a specialty of onion seed, and handle it extensively. We grow a large portion of our seeds ourselves, and have them grown by exseeds ourselves, and have them grown by experienced growers under our supervision. We are one of the largest growers of Onion Sets in the West, and all Onion Seed unsold at end of senson is sown for sets, thus enabling us to offer customers nothing but tresh seed every year. Our seed is grown from choice selected bulbs, and can be relied on. Will make special prices to gardeners or others using large quantities of seed

The ground for Onlons should be well prepared by digging in plenty of well-rotted manure. The seed may be sown from the first of April to the middle of May. Sow in drills one inch deep and twelve inches apart. When the onlons are up, thin them out to a distance of three inches apart.

LARGE RED WETHERSFIELD—This is a standard register of the weather onlong in the West.

dard variety and the favorite onion in the West, where immense crops are grown for shipment. Large sized, skin deep purplish red, form round, semewhat flattened. Flesh purplish white, moderately fine grained and stronger flavor than any of the other kinds. Very productive, the best keeper, and one of the most popular for general cultivation. It is more inclined to form large necks if planted on suitable soil than the Danvers, but is the best variety of any on poor or dry soils. Pkt. 5c; oz. 15c; 34 lb. 25c; lb. 90c; 5 lbs. \$4.25.

DANVERS YELLOW GLOBE—Distinct in form, being nearly globular, of a beautiful golden yeldard variety and the favorite onion in the West, where immense crops are grown for shipment.

DANVERS YELLOW GLOBE—Distinct in form, being nearly globular, of a beautiful golden yellow. Mild flavor and good keeper. Pkt. 5c; oz., 15c; ¼ lb. 25c; lb. 90c; 5 lbs. \$4.25.

SOUTHPORT LARGE RED GLOBE—True globe shaped, enormous yielder. Grows to a large size, of mild flavor, and a good keeper. Pkt. 5c; oz. 15c; ¼-lb. 35c; lb. \$1.25.

LARGE WHITE GLOBE—This is one of the finger onlows in cultivation, both in appearance and

quality. It is grained, and of excellent flavor, and commands a higher price in the market than any other white onlon grown. Its skin is pure white, and its keeping qualities particularly good. Pkt. 5c; oz. 20c; ¼-lb. 50c; lb. \$1.60.

HHILADELPHIA SILVERSKIN—This is practically the same variety as the White Portugal, but having been grown for many years in the vicinity of Philadelphia especially for White Sets, is now particularly desirable for that purpose. Pkt. 5c; oz. 20c; ¼-lb. 50c; lb. \$1.60.

PARIS WHITE PICKLING, OR SMALL SILVERSKIN—For pickling. This is of small size, silvery white, and used almost entirely for pickling on account of its small size. Pkt. 5c; oz. 30c; ¼-lb. 65c; lb. \$2.00.

EXTRA EARLY WHITE PEARL—Originally this was an early Italian variety (Silver White Stra), but it may now be classed under the

ARGE WHITE GLOBE—This is one of the inest onions in cultivation, both in appearance and quality. It is large, globe shaped, firm, fine and commands han any other dure white, and good. Pkt. 5c;

This is press.

THE N. S. CO.'S PICKLING—For early bunching, pickling or sets, the fluest strain offered. This may seem a broad statement, but for these purposes we have never sold or seen its equal. Pkt. 5c; oz. 20c; ¼-1b, 50c; lb, \$1.60.
WHITE QUEEN—A very early varity, white, small and fine flavor. Pkt. 5c; oz. 20c; ¼-lb, 50c; lb, \$1.60.

EXTRA EARLY RED FLAT—A medium-sized flat variety, producing abundantly and coming into use about two weeks earlier than Red Wethersfield. Pkt. 5c; oz. 15c; ¼-lb. 30c; lb. 65 lbs 44.95 90c; 5 lbs. \$4.25.

ONIONS-Continued.

PRIZE TAKER-This is one of the best of the bage foreign varieties. When started early under grass, and transplanted into open ground, they bottom fairly well, are nearly free from stiff neeks, and when offered for sale always attract marked attention. This variety is witnout a doubt the largest onion grown, samples under special culture sometimes weighing ave

under special culture sometimes weighing averpounds. We offer this season American grown seed. Pkt. 5c; oz. 15c; 4-lb. 40c; lb. \$1.20. DANVERS YELLOW FLAT-This fine variety is a thick that, heavy, straw colored onion, mild flavored and yields abundantly, ripens early and keeps equal to the best. Pkt. 5c; oz. 15c; 4-lb.

20c; 1b. 90c; 5 lbs. \$4.25.
MAMMOTH SILVER KING-The largest Onion in cultivation. Has been grown extensively in the past few years in all sections of the country, especially in the West, and has given universal satisfaction. Pkt. 5c; oz. 20c; %-lb. 50c;

lb. \$1.60.

a Red Globe Onion of the finest and most select type and we believe it to be superior to any stock in existence. It is called Globe Red Wethersfield in order to distinguish it from all other stocks of Red Globe Onions, from which other stocks of Red Globe Onions, from which it differs, not only in purity of stock and perfection of shape, but in earliness, productiveness and beauty, of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. We have been led to pay special attention to this onion. Pkt. 5c; oz. 20c; ¼-lb. 40c; lb. \$1.20 australian Brown — This new onlon is of neat, round shape, medium size, with skir of a deep amber brown, distinct from all other onions, extremely hard and firm, of fine flavor and will keep almost indefinitely. Australian Brown is the only onion Australian grown seed from the original importation. Pkt. 5c; oz. 15c; ¼-lb. 30c; lb. \$1.00.

Pepper

French, Piment. German, Pfeffer.
Sow early in hot bed, or in open ground about the middle of spring. Transplant when three inches high, to one foot apart, in drills twenty inches apart, and earth up a little in hoeing, which can be continued until the plants are in full bloom.

LARGE BELL OR BULL NOSE—A very large sort of square form, topering to a point. Mild, thick and hard. Suitable for filling with cabbage, etc., and for mixed pickles. Pkt. 5c; os. oz. 26c; ¼-lb. 70c; lb. \$2.00.

SWEET MOUNTAIN—Similar to the Bell, but

larger. Much used for stuffling pickles. Pkt. 5c; oz. 20c; 44-lb. 70c; lb. \$2.00.

LONG RED CAYENNE-Long, red, hot and pungent. Dwarf growth Pkt. 5c; oz. 20c; 44-lb. 70c; lb. \$2.00.

Long Parsnip.

Parsnips

German, Pastinake. French. Panais.

spring as as early in the spring as the weather will permit, in drills 15 inches apart and haif an inch deep, in rich, well-mauured ground manured ground, well dug. Cultivate similar to carrots and thin out to six inches apart in the rows.

GUERNSEY, OR HALF LONG—As name indi-cates, not as long as the Hollow Crown. Quality very sweet and delicate. Pkt. 5c; oz. 10c; 14-ib. 20c;

HOLLOW CROWN, OR LARGE variety in cultilargest vation. Roots long white, smooth, tender, sugary and of excellent flavor. I'kt. 5c; oz. 10e; 1/4-lb. 20c; lb. 40c.

Parsley

Frech, Persil. German, Petersilie. Parsley thrives best in a rich soil. The seeds germinate very slowly, three to four weeks generally elapsing before it makes its appearance. Sow early in the spring, half an inch deep, previously soaking the seeds for a few hours in tepid water.

PLAIN-This is the hardiest variety. Pkt. 5c; oz. 10c; 1/4 lb. 20; lb. 50c.

CHAMPION MOSS CURLED - A compact growing, finely curled variety of a bright sightly yellowish green color. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c.

DOUBLE CURLED-A dwarf, beautifully curled sort: Pkt. 5c; oz. 40c; 4 lb. 20c; 1b. 50c.

HAMBURG, OR TURNIP ROOTED --Fleshy rooted. The roots are used for flavor-ng soups. Pkt. 5e; oz. 10e; ¼ 1b. 20e; 1 1b. 45e.

Ruby King Pepper.

PEAS

French, Pols. German, Erbsen

The planting of an early crop of Garden Peas should be made in the spring, as soon as the ground can be worked, in a warm, dry situation, and covered about three inches. They are usually planted in double rows three to four feet apert, and, those requiring it, bushed when about six inches high. The large and later sorts do better at a greater distance apart, leaving a broad space for planting low growing vegetables between. bles between.

All marked thus O indicate wrinkled sorts.

(1) THE GRADUS—A new early and hardy wrinkled variety of the highest type of perfection grows 2½ feet high, is a vigorous grower; light green color; pods and grain very large, closely resembling Telephone. The results with this new pea, for the last four seasons, were an uter surprise in fluding a green wrinkled variety with a pod so large as the Gradus produces, to mature only three days after Extra early varieties, hence we claim it to be the earliest wrinkled pea known. The large pods produce from 6 to 9 peas of enormous size, which, when cooked, retain their beautiful soft green, and are sweet, rich and mellow.

In the liew Gradus Pea the greent problem of combining fine quality and productiveness with earliness in pea culture seems to have been solved, and it behooves every progressive gardener to give it a trial. Per pkt. 5c; pt. 25c; qt.

Extra Early Tall Varieties

i) SURPRISE—This new extra early wrinkled pen is certain to become very popular. The vine is no tailer than those of the best strains of First and Best and is as early, continuing longer in condition for use. The pods are like those of the Alphn and the peas are exceedingly tender, sweet and good invored. It is unsurpassed in quality pkt. 5c; pt. 15c; qt. 25c; pk. \$1.50; bu. \$5.50.

NEBRASKA LIGHTNING PEA—No extra early pea has ever given the universal satisfaction among market gardeners that this one has The pouls are very large and well filled with round peas of fine flavor. Market gardeners and others can make no mistake in using this variety for their entire first early crop. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25: bu. \$4.50.

DANDY-The finest early, the greatest yielder, the most delightfully flavored pea on earth. This grand variety is without doubt the earliest This grand variety is without doubt the earliest trendy to use 42 days after planting) and most productive variety in existence, entirely free from runners. They ripen up so uniformly as agt to require over two pickings to clean up the entire crop. We highly recommend this new pea to market gardeners, truckers and private gardeners. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.50.

THE NEBRASKA SEED CO.'S FIRST AND BEST—Vines small, bearing three to seven straight, handsome pods, each containing six to eight medium sized round peas of good quality. Stock we offer is especially grown for us. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu \$4.50.

ALASKA—This pea has become a standard variety. The vines are very dwarf. Peas green and smooth. Height 2 feet. Pkt. 5c; pt. 15e; qt. 25e; pk., \$1.50; bu., \$5.50.

PHILADELPHIA EXTRA EARLY - Peas smooth and of excellent quality. A deservedly popular market sort. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1,25; bu. \$4,50.

Extra Early Dwarf Varieties

TOM THUMB-Remarkably dwarf and early; of excellent quality and yields abundantly, Height 10 inches. Pkt. 5c; pt. 15c; qt. 80c; pk. \$1.50; bu, \$5.50.

t) M'LEAN'S LITTLE GEM-A dwarf, prollic, green wrinkled marrow, habit similar to the Tom Thumb. It has all the sugary flavor of the late wrinkled peas. Height 1 foot. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.60; bu. \$6.00.

() CARTER'S PREMIUM GEM-A valuable extra early dwarf, wrinkled pea, robust in growth, with long pods. Height 1 foot. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.60; bu. \$6.00.

') NOTT'S EXCELSIOR—Pods are square and chinky, always containing from five to seven large peas, packed so closely together in the pods that the peas are always more square than round. It grows to a uniform height, and is at all times very tender and of fine flavor. Height 1¼ feet. Pkt. 5c; pt. 15c; qt. 30c; pk \$2.00; bu. \$7.00.

(AMERICAN WONDER-Of fine quality and flavor, and wonderfully productive. Its great distinctive feature, however, is its compact and dwarf growth. Height & feet. Pkt. 5c; pt. 15c; qt. 20c; pk. \$2.00; bu. \$7.00.

Second Early Varieties

() McLEAN'S ADVANCER-A green wrinkled variety with long pods, which are abundantly produced and well nied to the end. Height 25 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.20; bu. \$4.20.

\$4.20.

PRIDE OF THE MARKET-Vines stiff with large, dark green leaves, bearing at the top, generally in pairs, a fair crop of very large, dark green pods well filled with large peas of good flavor. Height, 2 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

() BLISS EVERBEARING-The vines are very proline. As many as one hundred pods have been counted on a single vine. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

() BLISS ABUNDANCE-Remarkably productive and of excellent quality. Height 2 feet. Pkt.

tve and of excellent quality. Height 2 feet. Pkt. bc; pt. 15c; qt. 25c; pk. \$1.20; bu. \$4.25.

() THE N. S. CO.'S FAVORITE PEA.—The seeds

are white wrinkled, of vigorous growth, branching habit, prolific, pods large sized, which grow in pairs well filled with large peas of fine quality. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

() SHROL'SHIRE HERO—A robust grower, producing its large pods in abundance. Pods are larger and better filled than Stratagen. Height 2½ feet. Pkt 5c; pt. 15c; qt. 25c; pk. \$1.30; pu. 2½ feet.

o) HEROINE—Is a green wrinkled pea, and comes in between Advancer and Champion of England, and bears a profusion of large, long slightly curved pointed pods, containing from nice to ten large peas of finest quality. An immense cropper, yields double the quantity ordinary varieties do. Height 2½ feet. Pkt. 5c; pt. ary varieties do. Height 2½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.25; bu. \$4.25.

Late or Main Crop Varieties

LONG ISLAND MARROWFAT-Used profitably by market gardeners in New Jersey in place of the old White Marrowfats; being productive, more showy in the basket and far better in navor, the pods having somewhat the appearance of Telephones, but are earlier by four or five days, being ready to pick for market in sixty days after germination. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.20; Du. 01.20.

O IMPROVED STRATAGEM — Green, square, wrinkled, vigorous, branching habit. Remarkably luxuriant foliage, leaves unusually large. Pods long, well filled with from seven to mae peas of enormous size. Height 2 feet. Pkt. 5c;

pens or enormous size. Height 2 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.60; bu. \$5.50.
() TELEPHONE--Vines very strong. It branches considerably, the branches bearing from three to five pods. The pods average six to seven large wrinkled peas of the first quality. Height 3½ feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.50; bu. \$5.50.

\$5.50.

() CHAMPION OF ENGLAND—Universally admitted one of the best peas grown. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.10; bu. \$4.00. MARKOWFAT, LARGE WIITE—One of the oldest varieties in cultivation, and a favorite market sort. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.10; bu. \$3.40.

LARGE BLACK EYED MARROWFAT—An excellent variety. Height 4 feet. Pkt. 5c; pt. 15c; qt. 25c; pk. \$1.00; bu. \$3.20.

(SHARPE'S OHEEN—Main crop. Height 2)

(SHARPE'S QUEEN-Main crop. Height 21/2 feet, large, green, wrinkled; without an

equal for immense size of pod, productiveness and fine flavor.

Most stocks of the large podded semi-dwarf English varieties of peas have been wanting in uniformity and evenness of type as to disgust American planters, but by constant effort we uniformity and evenness of type as to disgust American planters, but by constant effort we have developed a stock of this, the best variety of that class, which comes true, and we do not hesitate to pronounce it one of the best of the large podded sorts.

All the good qualities of the old Stratagem are highly developed in this new and grand pea,

and it is vastly superior to the stocks now generally sold as Stratagem.

For general consumption it is one of the most profitable varieties that can be grown, being of sturdy branching habit. The pods are very large, slightly curved and contain from ten to thirteen fine large peas, which are of a deep, green color, and most delicious flavor. Pkt. 5c; pt. 25c; pk. \$1.60; bu. \$5.50.

Pumpkin

French, Potirou. German, Kuerbis.

These are easily grown and profitable for stock feeding. At time of corn planting scatter a few seeds in every fourth or fifth hill, or for a large crop sow in May, in good warm soil in hills eight to ten feet each way, four plants to a hill.

Large Cheese Pumpkin.

LARGE CHEESE-Cheese shaped; in flavor like Crookneck squash, yellow fleshed, fine grained and very productive. Superior to most field varieties. Pkt. 5c; oz. 10c; 4-1b. 20: lb. 50c.

CONNECTICUT FIELD—A large, yellow variety, hard shell. An excellent variety for field culture. Pkt. 5c; oz. 10c; ¼-lb. 15c; lb. 40c.

JAPANESE PIE—This remarkable variety comes from Japan, and makes a valuable addition to our ple and cooking numpkins. The flesh is very thick and nearly solid. Pkt. 5c; oz. 10c; 4-1b. 25c; lb. 80c.

CUSHAW, CROOK NECK — Solid flesh, fine and sweet, keeps well. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c.

PURPEE'S QUAKER PIE—A distinct and valuable variety. Pkt. 5c; oz. 10c; 1/4-lb. 25c; lb 50c.

TENNESSEE SWEET POTATO—Grows to a medium size, pear shaped, and a little ribbed. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c.

"SUGAR—This variety is smaller than the Large Field, but of finer grain, sweeter and very prollic. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 50c.

JONATHAN — This new pumpkin is one of the best varieties grown. It is very sweet and fine for pies. Pkt. 5c; oz. 10c; ¼-lb. 25c; lb. 80c.

MAMMOTH KING—The largest variety ever introduced. An enormous yielder, having produced over 100 tons per acre. The flesh is very thick, bright orange color and of fine quality, and in flavor equals squash. I'kt. 5c; oz. 15c; 1/4-ib. 40c; b. \$1.25.

Radishes

French, Radis. German, Radieschen.

For a successive supply sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot bed in February, care being taken to give plenty of ventilation, otherwise they will run to leaves. WHITE STRASSBURG-Very large, half long sort of unexcelled flavor. It is a rapid grower, sometimes producing a crop in six weeks. Pkt. 5e; oz. 10c; ¼-lb. 20c; lb. 55c.

YELLOW SUMMER TURNIP-Grows to a large size. Excellent to stand the heat and drouth of the summer. Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 55c.

EXTRA EARLY SCARLET TURNIP-Small round red radishes. Pkt. 5c; oz. 10c; 1/2 lb. 20c; lb. 55c.

CHINESE ROSÉ, OR SCARLET CHINA-An excellent winter radish. Pkt. 5c; oz. 10c; 1/4-lb. 20c; lb. 55c.

CALIFORNIA MAMMOTH WHITE WINTER
Of immense size, long. 1kt. 5c; oz. 10c; 1/4-lb.
20c: 1b. 55c.

I:OUND BLACK SPANISH—The favorite winter radish of Germany. Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 55c.

LONG BLACK AND LONG WHITE SPANISH WINTER-Each, Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 55c.

GOLDEN GLOBE—A favorite summer radish. 5c; oz. 10c; 4-1b, 20c; 1b. 55c.

EARLY DEEP SCARLET TURNIP—A small round, red turnip-shaped radish, with a small top and of very quick growth. Mild and crisp when young. Pkt. 5c; oz. 10c; ½-1b. 20c; lb. 55c.

EARLY SCARLET GLOBE—One of the quickest growing and handsomest extra early radishes bu cultivation. It is crisp and tender, while its perfect globe shape leaves nothing to be desired. Pkt. 5c; oz. 10c; ¼-1b. 20c; lb. 55c.

SCARLET, OLIVE-SHAPED - Quite early Olive shaped, Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 55c;

EARLY WHITE OLIVE-SHAPED-White skin and crisp, white flesh. Pkt. 5c; oz. 10c; 4-lb. 20c; lb. 55c.

Rosy Gem.

ROSY GEM-Fine for forcing or open culture, a perfect globe in shape. Deep scarlet on top, and fine grained, rarely becoming hollow or blending into white at the bottom. Very tender pithy. Pkt. 5c; oz. 10c; ¼-lb. 20c lb. 55c.

FRENCH BREAKFAST-Olive-shaped, red, white tipped. Pkt. 5c; oz. 10c; ¼-lb. 20c; lb. 55c.

EARLY HALF-LONG DEEP SCARLET—One of the handsomest and best of all extra early radishes. The root is somewhat longer than the oilve-shaped, very even, and with a smooth skin, of a rich, deep scarlet color. Pkt. 5c; oz. 10c; 4-1b. 20c; lb. 55 c.

EARLY SCARLET TURNIP, WHITE TIPPED

-Very early; color bright scarlet, tipped with
white, an excellent market variety, fine for forelag. Their shape is perfectly globular with rich
deep scarlet top, blending into pure white at
the bottom. Tender, crisp and delicious.

Pkt. 5c; oz. 10c; ¼-1b. 20c; lb. 55c.
CHARTIER, OR LONG ROSE, WHITE TIPPED-A very distinct variety, being dark red at
the top, and merging into pure white at the
buse. It stands well and will grow to a large
size before it is unfit for the table. Pkt. 5c;
oz. 10c; ¼-1b. 20c; lb. 55c.

LONG SCARLET SHORT TOP—Standard sort grown for private gardens and for market. Pkt. 5c; oz. 10c; 4-1b. 20c; 1b. 55c.
EARLY LONG WHITE VIENNA, OR LADY FINGER—This is unquestionably the fluest long white radish in cultivation. Pkt. 5c; oz. 10c; 4-1b. 20c; ib. 55c.
LONG, BRIGHTEST SCARLET, WHITE TIPLED—This is a new variety resembling the

1. D. 20c; 10. 50c.

LONG, BRIGHTEST SCARLET, WHITE TIPPED—This is a new variety, resembling the Early Long Scarlet in shape and size, and is very early, being ready for use twenty-five days after sowing. It is very handsome, being of the brightest scarlet, tipped with white. 1kt. 5c; oz. 10c; 4-1b. 20c; lb. 55c.

1111LAD ELPHIA WHITE "BOX"—Its points of the property of the prope

of superiority are its remarkably short top, rapid growth, perfect turnip shape, extra fine quality, and showing no disposition whatever to become tithy with age. Pkt. 5c; oz. 10c; 14-lb. 20c; lb. 55c.

EARLY WHITE TURNIP-Both skin and flesh are white and crisp. Pkt. 5c; oz. 10c; 4-lb. 20c;

GIANT WHITE STUTTGART—An immense white radish. Pkt. 5c; oz. 10c; 4-lb. 25c; lb. 70c.

Salsify or Oyster Plant

French, Salsifis. German, Bocksbart.

Sow early in the spring in drills 14 inches apart. Cultivate same as carrots or parsnips. Gather what may be wanted for the winter, and let the balance stand in the ground for the rext spring's use.

LONG WINTE-The standard variety. Pkt. 5c; 0z. 15c; ¼-lb. 40c; lb. \$1.25.

MAMMOTH SANDWICH ISLAND — A new and leave growing variety of great value to the

and large growing variety of great value to the market gardener. Zkt. 5c; oz. 15c; ¼-lb. 40c; lb.

SCORZONERA, OR BLACK OYSTER PLANT
-Root black before cooking. Pkt. 5c; os. 15c;
4-lb. 40c; lb. \$1.25.

Squash

French, Courge. German, Kuchen Kuerbis.

Plant in hills, in well prepared ground, mixing two or three shovelsful of well-rotted manure in each hill. Light soils are best suited for their growth. Plant six to eight seeds in each hill and thin out to three or four after they have made partial growth. Plant bush varieties from three to four feet apart each way, and the trailing sorts six to eight.

Regular Hubbard Squash.

HUBBARD—The leading squash for fall and winter use; good in any climate; hard skinned; a splendid keeper; fiesh, dark yellow, fine grained, very dry, sweet and rich. Pkt. 5c; oz. 10c. 14-1b. 35c; lb. \$1.00.

MAMMOTH WHITE BUSH—The best strain of white scalloped squash in existence. It grows to a large size, and for quality it is simply delicious. Pkt. 5c; oz. 10c; 4-1b. 25c; ib. 76c.

GOLDEN HUBBARD—A sport from that old standard of excellence, the Hubbard; it is a perfect type of its parent, except in color, which is a bright, deep orange-yellow, exceedingly showy and attractive. Flesh is deep golden yellow color, much richer than the Hubbard, fine grained, cooks very dry, and of excellent flavor. Its keeping qualities are fully equal to, while in productiveness it excels the old variety. Its superior keeping qualities, combined with its sweet, rich flavor, attractive color and shape, are bound to make it a popular fall and winter variety. Pkt. 5c; oz. 10c; ½-1b. 35c; ib. \$1.00.

CHICAGO WARTED HUBBARD—Our select strain of the ever popular old Hubbard Squash is most excellent, but the Chicago growers seem to have produced "An Ideal Hubbard." "A Hubbard Squash, large, blackish-green, hard as wood, with warty knots all over it, satisfies even the inexperienced observer that it is the best of its class, rich in quality, a keeper and thick-flethed, such as will sell on sight." Pkt. 5e; os. 10c; ¼-1b, 35c; lb. \$1.00.

MARBLEHEAD—A fine late variety, resembling the Hubbard, only that the flesh is a little lighter than that variety. Pkt. 5c; oz. 15c; 1/2-lb. 40c; 1b. \$1 00.

BUTMAN—A variety in size and productiveness resembling the Hubbard. Flesh fine grained, lemon-colored, and of excellent flavor. Pkt. 5e; oz. 10c; ¼-1b. 30; lb. \$1.00.

(Squash continued on next page.)

Squash-Continued

FORDHOOK SQUASH—It is described as being of medium size, bright yellow outside and seed cavity small. The vine is a rapid grower, and the squashes mature carlier than other winter varieties, and it is also very productive. The quality is the best. Pkt. 5c; oz 15c; 1/4-1b. 40c; 1b. 51.25.

MAMMOTH CHILI — A very large growing squash, often attaining the cuormous weight of 250 pounds. Excellent for culinary purposes, and especially desirable for stock. I'kt. 5c; oz. 15c;

cspecially desirable for stock. I'kt. 5c; oz. 15c; 4-b, 50c; lb. \$1.70,

LONG ISLAND WHITE BUSH—A selection of the old White Bush Scallop, and a vust improvement, having less prominent ridges and provement, having less prominent ridges and usually contains nearly twice as much weight as the old sort. In addition to this it is of finer ausility and very profile. Pkt. 5c; oz. 15c; ¼-1b. 25c; lb. 80c.

ESSEX HYRRID-A good squash for fall and wilter use: Pkt. 5c; oz. 15c; 4-b. 40c; ib. \$1.20.

MAMMOTH SUMMER CROOKNECK-This strain is a great improvement on the old variety of Crookneck. It is larger and better in every way. Pkt. 5c; oz. 10c 14-1b. 25c; lb. 80c.

KARLY WHITE BUSH, SCALLOPED — The White Patty Pan Squash. Pkt. 5c; oz. 10c; 1/4-1b.

25c; 1b. 80c.

EARLY YELLOW BUSH, SCALLOPED-Differs from the foregoing in its deep orange color. Pkt. 5c; oz. 10c; ¼-10, 25c; lb. 80c.
EARLY SUMMER CROOKNECK-The popular small crooknecked. Pkt. 5c; oz. 10c; ¼-1b. 25c; lb. 80c.
BOSTON MARROW-A bright orange squash, for gutump use. Pkt. 5c; oz. 10c; ¼-ib. 30c; ib.

Spinach

French, Epinard. German, Spinat.

This is one of the most important of our mar-The is one of the most important of our market garden crop, and one that requires very little care. For summer use sow at intervals of two or three weeks from April to August, and for early spring crop sow in September, covering it in exposed places with straw to protect it from severe frost.

LONG STANDING—The leaves are thick, cooks and exampled early to the Bloomsdale.

LONG STANDING—The leaves are thick, fleshy and crumpled, equal to the Bloomsdale Curled Savoy-Leaved, and standing at least two weeks longer than any other variety without running to seed. Pkt. 5c; oz. 10c; 4-ib. 15c; lb.

25c.
BLOOMSDALE CURLED, SAVOY-LEAVED—
The leaves are krinkled like Savoy Cabbage, from whence the name; it is a very valuable variety, particularly for market gardeners. Pkt. 5c; oz. 10c; 4-lb. J5c; lb. 25c.
PRICKLY, OR FALL—Stands winter well, of less bulk than the round leaf. Pkt. 5c; oz. 10c; 4-lb. 15c; lb. 30c.
ROUND. THICK-LEAVED—Excellent market senally good for spring and fall sowing:

ROUND, THICK-LEAVED-Excellent market sort: equally good for spring and fall sowing; leaves large and thick and fleshy, in general use for early spring planting; also for fall sowing. Fkt. 5c; oz. 10c; 4-lb, 15c; lb. 25c.

BROAD-LEAVED FLANDERS—This is an excellent and productive variety, very hardy, robust grower, producing long thick leaves, ten inches long and eight inches wide at the base, and may be sown nearly all the year around. Pkt. 5c; oz. 10c; 4-lb, 15c; lb, 25c.

LONG STANDING PRICKLY—The largest, thickest leaved and best keeping Spinich we have ever seen. Very hardy; equally desirable for summer or winter planting. Pkt. 5c; oz. 10c; 4-lb, 15c; lb, 25c.

Rhubarb

French, Rhubarbe. German, Rhabarber.

Sow in April, in drills one foot spart, thinning out to about the same distance apart in the rows when a few inches high. Transplant into deep rich soil in fall or the following spring, about three feet apart each way.

VICTORIA—Very large, later than Linnaeus. Pkt. 5c; oz. 20c; ½-lb. 50c; lb. \$1.50. MONARCH—The largest and most vigorous and productive variety known. Pkt. 5c; oz. 20c;

60c; lb. \$1.50.

RHUBARB ROOTS—(Choice Selected) — Any of the above named varieties with three or four eyes. Each, 10c; doz. \$1.00; 100, \$6.50.

Tomato

French, Tomate. German, Liebezapfei.

Sow early in March, in hot-beds or seed-boxes, and when plants have four leaves transplant to four or five inches apart; give plenty of air and endeavor to secure a vigorous and healthy growth. When all danger of frost is past, transplant to open ground, four to six feet apart each way.

Livingston's Globe Tomato.

We quote the originator's statement: We started with an elongated (from stem to blossom end) fruit, one as far removed from the flat shape as possible. We did not, however, lose sight, for a moment, of any of the other good points which have entered into the make-up of all of our other varieties. Now we have in the 'Livingston's Globe' an extra good all round sort of distinct tobe shape, with quite a large persort, of distinct globe shape, with quite a large per-centage of elongated fruits. It is a very beautiful va-riety, and, on account of its shape, one that permits of a greater average number of slices to be taken from each fruit.

In time of ripening we class it among the first ears lies, being among the first to ripen fruit both in our greenhouses as well as our field trials, along with many other varieties. The fruits are of large size, and a good marketable size is retained throughout the season: always smooth, of firm flesh and has few seeds; ripens evenly; color, a fine glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. An exceedingly productive variety, having plants with many short joints at which large clusters containing three to seven fruits are almost invariably formed, so that it can be truthfully stated the plants are literally loaded with fruit. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect. In quality there is nothing more to be desired, being mild, pleasant and of delicate flavor; unsurpassed for slicing or to eat from the hand. Sold in pkts. only; pkt. 20c; 3 pkts. 50c; 7 pkts. \$1.00.

EXTRA EARLY ADVANCE—Is one of the earliest. With favorable weather this tomate will ripen in ninety days after sowing the seed. Pkt, 5c; oz. 35c; ¼-lb. 60c; lb. 1.75.

CRIMSON CUSHION—Fruit very large, round and regular, bright scarlet color, flesh solid and best quality, cells small and few in number. The plants are very productive. The fruit is of fine form and appearance, and will stand shipment well. Pkt. 5c; os. 45c; 14-lb. 90c; lb.

White's Excelsior Tomato

WHITE'S EXCELSIOR-

The vines are of a dark green, grow rapidly and to a great size, bear a heavier crop than any other, purple variety and continue bearing until killed by the frost. The fruit is a beautiful glossy, dark purplish red, very large, set in great clusters and retain their size until the last end of the season. The seed cavity in the fruit is so small that they are nearly solid, and unlike other purple varieties. Pkt. 5c; oz. 30c; ¼-ib. 50c; lb. \$1.80.

BUCKEYE STATE—Color "Deep Glossy Purple"—In Buckeye State we have the largest fruited variety of any of the smooth round tomatoes, averaging fully one-half larger than Livingston's Beauty. It is an immense cropper, bearing its fruit in large clusters, often six to eight in a cluster. Color about the same as Beauty, but deeper shade, very showy and stilking when displayed for sale. Remarkably solid and meaty... Pkt. 5c; oz. 25c; ¼-ib. 70c; lb. \$2.20.

THE MIKADO, OR TURNER'S HYBRID—A new variety of very large size and superior quality. Color, purplish red, perfectly solid, produced in immense clusters. Pkt. 5c; oz. 35c; ¼-lb. 70c; lb. \$2.50.

THE GREAT B. B. (BRINTON'S BEST)—
They attract great attention
owing to their beautiful deep red color, uniformly
even, large size and perfect, smooth shape. The
quality and solidity are unequaled. Pkt. 5c; oz.
30c; 1-1b. 60c; 1b. \$1.80.

NEW IMPERIAL—This fine new tomato is not as early as the Early Ruby, but the fruits are of large size and thicker through. It is quite smooth and fine in form, of a bright red color, but changing to pinkish purple, like Acme when fully ripe, Pkt, 5c; oz. 25c; ½-1b. 50c; lb. \$1.75.

EARLY RUBY—The great value of this variety lies in the fact that it is by far the earliest of all the large-sized tomatoes which combine good form, rich crimson color and solidity. Pkt. 5c. oz. 30c; 1/4-lb. 60c; 1 lb. \$1.80.

ATLANTIC PRIZE—We have no hesitation in offering this as the best and earliest of the extra early sorts, and invaluable to those to whom earliness is the first consideration. Pkt. 5c; oz. 25c; ¼-lb. 60c; lb. \$1.80.

ACME-The well known standard bright pink tomato. Pkt. 5c; oz. 30c; 4-lb. 60c; lb. \$1.75.

BEAUTY-Large, solld, smooth tomatoes; purplish pink. Pkt 5e; og. 25c; 14-lb. 60e; lb. \$1.75:

DWARF CHAMPION—A very distinct variety of tree-like, upright growth. The plant grows jointed stems. It can be planted as close as three feet. The Dwarf Champion will bear very heavy manuring, the strength increasing the abundance and size of fruit. Instead of producing superabundant vines. Pkt. 5c; oz. 40c; 4-lb. 05c; lb. \$2.75.

DWARF STONE is fully double the size of Dwarf Champion, and yet equally as early. It is fully as prolific and consequently vnstly more productive. This is another splendid new variety. In habit of vine it resembles Dwarf Champion, but is of stronger growth and more erect. The fruit resembles Livingston's Stone in color, shape, and what is more remarkable, it is almost the same in size.

We consider this one of the best productions, one that will meet with general favor, especially with a class of growers whose gardening is limited to a few acres, and where economy in saving land must be taken into account.

The shape of the fruit is perfect, with a good skin, which is free from crucks about the stemend. It is very solid, ripens evenly, and is of most excellent quality. Pks. 5c; oz. 40c; 16. 80c; 1b. \$2.75.

quanty. Pres. 5c; 02. 40c; 3/10. 30c; 10. 32.45.

HENDERSON'S PONDEROSA, OR NO. 400—
This grand variety is a monster of the tomato
family, the tomatoes often weighing two or three
pounds each; of a rich, bright crimson color
and all solid ment; exceptionally free from seeds.
Extremely delicious in flavor, whether used raw
or cooked; a single tomato is enough for a meal,
Very destrable for family and market purposes.
Pkt. 5c; oz. 45c; 4-lb, \$1.00; lb, \$3.25.

THE NEW STONE-Ripens for main crop. is rery large and of bright scarlet color. Pkt. 5c; oz. 30c; 14-lb, 60c; lb. \$1.80.

FARAGON-The well known standard bright red tomato. Pkt. 5c; oz. 25c; 4-lb, 60c; lb. \$1.75.

LIVINGSTON'S PERFECTION—In our opinion this is identical with Paragon, Pkt. 5c; oz. 25c; 4-lb. 60c; lb. \$1.75.

LIVINGSTON'S FAVORITE — Bright red, smooth tomatoes of good size. Pkt. 5c; oz. 25c. 4-lb. 60c; lb. \$1.75.

TROPHY-Very large, solid and generally smooth. Pkt. 5c; oz. 25c; ¼-lb. 60c; lb. \$1.75.

GOLDEN QUEEN—This is the only first-class large, pure, yellow tomatoe, Pkt. 5c; oz. 40c; 1/2.1b. 95c; 1b. \$3.20.

RED CHERRY-Fruit about an inch in diameter: in bunches, used in pickles. Pkt. 5e; oz. 45c; ¼-lb. 85c; lb. \$2.50.

YELLOW CHERRY-Similar to Red Cherry in form and habit, differing only in color. Pkt. 5c; oz. 45c; ¼-lb. 85c; lb. \$2.50.

PEAR-SHAPED YELLOW-Fruit pear-shaped and yellow, used for pickling. Pkt. 5c; oz. 45c 4/5c, 85c; lb. \$2.50.

YELLOW PLUM—Bright yellow in color, round and regular in shape, useful for preserves. Pkt. 5c; oz. 45c; ¼-lb. 85c; lb. \$2.50.

STRAWBERRY, OR WINTER CHERRY—The fruit has a pleasant strawberry-like flavor, esteemed by many for preserving. Pkt. 5c; oz. 50c; ¼-1b. 85c; lb. \$2.50.

TOBACCO SEED

French, Tabac. German, Taback.

Sow soon as danger of frost is over. When plants are about six inches high, transplant into rows six feet apart each way and cultivate thoroughly with plough and hoe.

IIAVANA—Commands a high price for cigar stock. Pkt. 5c; oz. 20c; ¼-lb. 65c; lb. \$2.25. MISSOURI BROAD LEAF—A well known standard sort. Pkt. 5c; oz. 20c; ¼-lb. 60c; lb.

standard sort. Pkt. 5c; oz. 20c; ¼-lb. 60c; lb. \$2.25.

CONNECTICUT SEED LEAR—This is a staple yarlety. Pkt. 5c; oz. 20c; ¼-lb. 60c; lb. \$2.00.

Turnip -

French, Navet. German, Welsse Rueben.

Light, well manured soil is best suited for turnips. Sow the earliest varieties in April, in drills about fifteen inches apart, and thin out to from 6 to 9 inches in the rows. For a succession sow at intervals until the end of August.

1. EXTRA EARLY WHITE MILAN-Extra early turnip in which the extreme earliness, small top and tap root of the Purple Top Milan is united with clear white skin and flesh. Pkt. be; oz. 10e; 1/4-lb 30e; lb. 75e.

2. GOLDEN BALL (ROBERTSON)-A rapid grower; globe-shaped, and of a beautiful color and a good keeper. Pkt. 5c; oz. 10c; 1/4-lb. 20c;

1b. 50c.

3. TARGE WHITE GLOBE—One of the most productive. In rich soil the roots will frequently grow to 12 pounds in weight. Globe-shaped, skin white and smooth. Pkt. 5c; ox. 10c; \(\chi_1\)-1b. 20c; lb. 50c.

Fint; fine flavor and one of the most popular varieties grown, and when sown late it is one of our best varieties, being an excellent keeper. Pkt. 5c; oz. 10c; 14-1b. 20c; lb. 50c.

6. PURPLE TOP WHITE GLOBE—A hand-some looking bulb and is rapidly taking the lead of all other varieties of early turnips for market garden purposes. Pkt. 5c; oz. 10c; 1/4-lb. 20c; lb. 50c.

EXTRA FARLY PURPLE TOP MILAN—Fully a week earlier that the Munich, which has heretofore been considered the very earliest. It is of medium size and flat-shaped, pure white flesh, of excellent flavor, very small top and a gred keeper. Pkt. 5c; oz. 10c; ½-lb. 30c; lb. 75c. EARLY PURPLE TOP MUNICH—A German variety; very handsome, very early, with a bright purplish-red top and fine mouse-tailed root. Pkt. 5c; oz. 10c; ½-lb. 20c; lb. 60c.

Purple Top Strap-Leaf Flat Turnip.

Ruta Baga

(Swedish or Russian Turnip)

French, Navet. German, Kohl Rueben. The roots may be preserved in a pit or cellar during the winter, and are excellent for table use Sow from the tenth of June to the middle of July in drills two feet apart and thin out to

of July in drills two feet apart and thin out to eight inches.

4. IMPROVED AMERICAN PURPLE TOP—A most excellent sort for either table or stock, Pkt. 5c; oz. 10c; 4/-1b. 20c; lb 50c.

Skirving's Purple Top—A good variety oz. 10c; 4/-1b. 20c; lb. 50c.

IAING'S IMPROVED—An early variety. Bulb handsome and of fine quality. Pkt. 5c; oz. 10c; 4/-1b. 20c; lb. 50c.

CARTER'S IMPERIAL HARDY SWEDE—Pkt. 5c; oz. 10c; 4/-1b. 20c; lb. 50c.

SHAMROCK—A very fine purple top variety. Buib large and handsome, with small top and few leaves. A good keeper. Pkt. 5c; oz. 10c; 4/-1b. 20c; lb. 50c.

Seed Sweet Potatoes

Early Yellow Jersey Sweet Potatoes.

We make a specialty of having our seed sweet potatoes grown in New Jersey, where they have inequalled facilities for handling and storing. New Jersey grown sweet potatoes are everywhere acknowledged to be the best in quality, being niveh dryer and sweeter than those grown in the South and West, while their keeping and shipping qualities are away ahead. We pack for shipping the forevery susceptible to climatic that are very susceptible to climatic We make a specialty of having our seed sweet to climatic but as they are very susceptible to climatic changes, we cannot hold ourselves responsible for their condition after long journeys of several hundred miles, and wish it distinctly understood that customers take all risk after we deliver in good condition to the express or railroad com-pany here. We do not ship until about planting time unless especially ordered to do so.

THE FOLLOWING PRICES are about what will rule, we think, but as there is liable to be a shortage of good seed at planting time the prices here quoted are SUBJECT TO MARKET

NEW EARLY GOLDEN-Light, golden yellow skin, yellow flesh of excellent quality. Tubers of medium size, very prolific. Lb. 10e; pk. 50e; bu. \$1.25; bbl. \$3.25.

YELLOW . NANSEMOND-Yellow skin flesh. Very large growing variety, second Lb. 10c; pk. 40c; bu. \$1.25; bbl. \$2.50. second early.

FARLY YELLOW JERSEY-Yellow skin, yellow flesh, Very early and prolific. Of fine quality and flavor. Lb. 10c; pk. 40c; bu. \$1.25; bbl. \$2.50.

RED JERSEY-Red skin, yellow flesh. Very early and prolific. Of fine flavor. Lb. 10c; pk. 40c; bu. \$1.25; bbl. \$3.25.
SWEET POTATO PLANTS-Above varieties, 50c

per 100; \$2.50 per 1,000.

NORTHERN GROWN SEED POTATOES

No Potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDOM FROM DISEASE, or PRODUCING and LONG KEEPING QUALITIES

Our seed potatoes have been carefully and especially grown for seed. We are pleased to say that the quality of our stock is as fine and pure as was ever grown.

Advantages of Changing Seed

There is no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as the potato. They seem to take on new life and to prosper wonderfully, provided the change is to a well selected stock, and the further north it is grown, the Our best customers will not plant their own raising of seed at all, but buy of us every They can grow nearly double the crop on the same land that they can from their own raising, and the tubers are smoother, handsomer and better quality and more saleable on the markets. A good change of seed always pays.

Out of hundreds of varieties, grown by us and Out of hundreds of varieties, grown by us and others, we are offering our patrons a collection of Choice Seed Potatoes, selected on their merits for quality and productiveness which cannot be equalled. With the endless variety of potatoes listed, we realize the difficulty to make a selection from the majority of catalogues which would meet the requirements. Especially when so much similarity exists in a large number of kinds. Our collection embraces the distinct and leading up-to-date sorts. embraces the distinct and leading up-to-date sorts, and we are confident every one desiring the money-

makers will realize the great results which may be obtained by planting these sorts.

Terms—Cash with order. Express or Freight charges to be paid by purchaser.

(FRICES SUBJECT TO MARKET FLUCTUATIONS.

We cannot guarantee delivery in good order. will ship in good condition, but will not hold ourselves responsible against loss either by heat or cold.

When wanted in large quantities, write for special prices.

EARLY OHIO

EARLY OHIO—Early Ohio is the most popular early potato in this country. We have more calls for it than for any other variety. Every potato grower knows what it is, and knows just about what it will do in his locality. It is the standard extra early the country over, and other varieties are measured by it. We will venture to say that not one farmer in ten, the country over who thinks he has Early Ohio has pure stock. Most of them do not know that they are mixed. But Early Ohio is an old variety and has become frightfully mixed throughout the United States. Farmers and market gardeners better sell off their own Ohios and get some of our pure im

proved, grown from Red River Valley seed.
We consider our stock of Ohios to be the earlyest, purest and altogether the handsomest stock
of Early Ohio potatoes to be found anywhere. Om of Early Ohlo potatoes to be found anywhere. On these points we challenge comparison with stock from any other source. We do not admit that its equal exists among Early Ohlo potatoes. They are grown under conditions that make them cost more than common stock. They are selected with the utmost care and the result is grand, such as to delight everyone who knows and appreciates a good potato. Every one of them is a "picture" of what an Early Ohlo potato should be. 1 lb, 10c; pk, 35e; bu, \$1.20; 5 bu, \$5.08. EARLY SIX WEEKS—This variety is very evidently a seedling of the Early Ohio, which it closely resembles in every way. The potatoes grow so rapidly that under favorable circumstances in six weeks they are as large as hen's eggs, and therefore fit for family use in six weeks from the time of planting. Lb. 10c; pk. 85c; bu. \$1.20; 5 bu. \$5.00.

Red Bliss Triumph

RED BLISS TRIUMPH—This new early potato is now attracting wide attention. This variety is also known by the names of Improved Bermuda and Stray Beauty. It combines the wonderful productiveness of the old Peerless with all the good qualities of the Early Rose, is much

more productive and matures its crop at least a week in advance of the Early Rose. Tubers are of medium rize, round and uniform in shape, with but a very few small ones; eyes slightly depressed; color a beautiful light red. Its great beauty, productiveness and fine quality make it one of the best extra early red market varieties.

They are not only the earliest potatoes, but the heaviest yielders and the best cookers of all the extra early varieties, and although they grow very rapidly, they are never hollow. For these reasons they bring the highest price of any potatoes, runging from one and one-half times to four times the value of the ordinary prime cating petato. The Triumph has been grown guite extensively in Wisconsin and Minnesota for five years, and the price of them is as high as it was the first year. The Triumph has come to stay and will undoubtedly bring more money than any other potato for years to come. Even though the seed does cost more, they are the most profitable potatoes to buy for raising seed potatoes to sell

We have never advocated the planting of any but popular and well known varieties of potatoes, because such are wanted and sell readily, when unknown and new varieties are hard to place; but the Red Bliss Triumph have won their way, and we recommend them as the best early potato in the world, and the most profitable to the grower. Price: Lb. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.00.

CMAHA ÉARLY ROSE—Now we offer you a new Early Rose named after our own beautiful town. It is earlier and the tubers larger than the old and popular Early Rose, and under ordinary field culture will yield 250 to 300 bushels to the acre. We know you will be more than satisfied if you give this fine new sort a trial, as it is the standard early potato; rosy blush skin, white fierh; early, productive, and of excellent flavor; a fine keeper. Lb. 10c; pk.35c; bu. \$1.20; 5 bu. \$5.00

EXTRA EARLY BOVEE—The Introducers Statement—"When we introduced Extra Early Bovee potatoes, our own tests and the opinions of others led us to chaim a good deal for it, and our confidence has not been misplaced. Not only is it the earliest, but it takes a leading place, among the heavy cropping varieties, an unusual thing among first earlies. It is even earlier than Early Ohio, and compares favorably with Triumph. The Bovee, in all competitive trials, has outyleided all the early potatoes, and in many of the tests conducted by Experiment Stations and private growers is has outyleided even the late varieties. The vine is dwarf and stocky, enabling it to be planted six inches closer than searly all other varieties, which results in a much

larger return per acre, and is a feature of the utmost value where land is valuable. The tubers grew remarkably close; all bunched together in the hill close up to the vine. (See cut.) They size up to a marketable size more evenly than any potato we ever saw; none too large or too small; practically the whole crop being merchantable and the quality perfect. The potato is very smooth, pinkish cast, very few eyes, which set very shallow. Wehave only one warning—it is apt to prove disappointing on poor soil or with poor cuitivation, as it sets so freely the tubers are apt to be small. But on good potato ground, well fertilized and cuitivated, no other early potato to day compares with it. Price: Lb. 16c; pk. 35e bu. \$1.20; 5 bu. \$5.00.

BURPEE'S EXTRA EARLY-One of the earliest varieties; it has preved to be ten days to two weeks earlier than Early Rose, Beauty of Hebron, Early Purltan, etc.; fully one week carlier than the ordinary Early Ohlo and nearly twice as productive, Lb. 10c; pk. 35c; bu. \$1.25: 5 bu. \$5.00.

IMPROVED THOROUGHBRED

IMPROVED THOROUGHBRED-If fine table and long keeping qualities, combined with great productiveness ever warranted the introduction of a potato, we are justified in sending out the Tacroughbred, believing it will find favor with all who grow it, and that it will take care of itself in the battle for popular favor.

The Thoroughbred is a second early and main

crop potato; is productive to an extraordinary degree. The tubers are bunched closely in grow-ing, which materially lessens the labor of harvest-ing. The potato itself is of the size and shape

best liked in the leading markets. Eyes are few and nearly flush with the surface. In quality nothing can surpass it. In fact, in this particular we know of no sort that equals it. Its snowy whiteness when cooked, together with its dry and floury nature, has made it a favorite on every table where it has been tried. The testimonials that have been received from purchasers of this variety in previous seasons show that it succeeds variety in previous seasons show that it succeeds over a wide range of territory and under most varied conditions. Lb. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.00.

When wanted in large quantities, write for

Special **Prices**

All Prices are Subject to Change.

RURAL NEW YORKER NO. 2-Well known now the country over, and very largely planted for a profitable main crap. Rurals are now quoted in all the leading markets of the country along with Rurbanks and other standard sorts, and usually they are quoted higher than Burbanks. They are certainly more profitable to raise.

When Rural No. 2 first made its appearance as send out in 1889 by the Rural New Yorker, it introduced an entirely distinct class of potatoes,

unbrown up to that time. The class is characterized by a long, rather spindling vine, with dark-colorel stalks, dark green leaves and purple blossoms: tubers nearly round, flattened, with very smooth, pure white skin, uniform in size, quite numerous in the hill, always very attractive in

Our stock of Rural New Yorker this year is a spended one, and our prices are certainly very reasonable. Lb. 10c; pk. 35c; bu. \$1.20; 5 bu. \$5.66.

CLOVER AND GRASS SEEDS

Prices subject to fluctuations. If wanted by Mail, add for postage 8c a pound extra

Market prices on application

We pay particular attention to this department of our business. These seeds are selected with special reference to their quality. Purchasers may rely upon our best endeavors to furnish Grass and Field Seeds fresh, pure and free from noxious and foreign seeds—all recleaned by the best machinery to make them choice.

On account of the early publication of this Catalogue we cannot guarantee the following prices on Clover, Grass and Field Seeds. These are market articles, and prices are subject to variation, but purchasers may depend on having them at the prices ruling from store that date, and of the best quality, and that we will always send as much seed as the money received will pay for. Market prices of the day or special prices on large lots cheerfully given on application. Express or freight charges always to be paid by the purchaser, except when sufficient money is sent to prepay charges. Two bushel bags 20 cents each extra.

RED CLOVER-This species is regarded by far the most important of the whole genus for the practical purpose of agriculture, being valuable not only as a forage plant, but also for its fertilizing properties on the soil. It has very long and powerful tap-roots, and when these roots decay they add largely to that black mass of matter called the soil. As a forage plan, it makes an excellent quality of hay, and can be cut at least twice a year. Sow about twelve or fifteen pounds to the acre. Weight. 60 !bs per bushel, Lb. 20c; bu. \$7.50-\$8.00-\$9.00.

MAMMQTH OR SAPLING CLOVER-Compared with common Red Clover, its flower, follage and stems are of a darker color, and its seed is the product of the flower of the first crop, while the seed of the common Red Clover is the product of the flowers of the second crop, and different in some other characteristics of It is valuable when sown little importance. with other grasses for mixed hay, as it ripens later than the common Red Clover, and about the time that Timothy, Orehard and grasses ripen, thereby making the hay a much better quality. Being a very rank grower, it is coming into very general use for soiling purposes. Sow twelve to fifteen pounds to the acre. Weight, 60 lbs. per bushel. Lb. 20c; bu. \$8.50-\$9.00

ALSYKE, OR SWEDISH CLOVER-This clover comes from the little province of Alaska, in Sweden. It is one of the hardiest varieties known, being perennial and absolutely refuses to winter kill; it is alike capable of resisting the extremes of drouth or wet. It is a great favorite with all who have tried it. Produces annually a great quantity of herbage of excellent quality. Sow in spring or fall about eight or ten pounds per acre. Weight, 60 pounds per bushel. Lb, 20c; bu. \$8.00-\$8.50-\$9.00.

WHITE DUTCH CLOVER-An excellent pasture clover, forming in conjunction with the Kentucky Blue Grass, the fluest and most nutritions food for sheep and cows. Sow five or six pounds to the acre. Weight, 60 pounds per bushel. Lb. 30c; bu. \$10.00-\$11.00-\$12.00.

ESPERSETTE, OR SANFOIN (HEDYSARUM ONOBRICHIS)-This is a leguminous plant with many stems from two to four feet long, tapering, smooth, leaves in pairs of pointed, oblong leaflets, slightly hairy on the under side, flower stalks higher than the leaves, ending in a spike of crimson or variegated flowers. succeeded by flat, hard pods, toothed on the edges and prickly on the sides, root perennial, hardy and woody. Flowers in July. Espersette is considered an indispensable forage / plant, improving the quality of milk when fed to milch cows. It is especially adapted to dry soils, sands, gravel and barren regions, with rainfall scarce and irrigation unobtainable. To produce a good-stand sow forty to fifty pounds per acre. Weight, 24 pounds per bushel. Lb. 15c; bu. \$2.50.

CRIMSON TREFOIL CLOVER-This annual variety, in common use in Italy and the south of France for feeding green. It is also where it is called "German Clover," and we think it would do well here in our Western States. It is from two to three weeks earlier than Red Clover, and for this reason very desirable. The yield in fodder is immense, and, after cutting, it at once commences growing again, and continues until severe, cold, freezing It grows about one foot high; the rocts are nearly black; leaves long; blossoms long, pointed and of a very deep red or carmine color. Makes good hay. Sow in the fall, fifteen pounds of seed per acre. Weight, 60 pounds per bushel. Lb. 15c; bu. \$5.50.

WHITE BOKHARA CLOVER-This is a tall, shrubbery-like plant, growing to the height of four to six feet, with branches whose extremities bear numerous small white flowers of great fragrance. It should be sown in spring, in drills twelve to sixteen inches apart. Ten pounds will sow one acre. Weight, 60 pounds per bushel. Lb. 25c; bu. \$5.00,

ALFALFA OR LUCERNE

The Grandest Hay and Forage Plant Ever Introduced

Alfalfa

ALFALFA-This is the best forage plant that can be grown. It will produce more forage per acre, either green or dry, than any other known clover or grass, and is being more extensively planted every season. The reasons why it is meeting with such universal favor are many, but can be summed up as follows:

It successfully resists the fiercest drouth. In

the driest weather when every blade of grass withers for want of moisture, alfalfa stands up as fresh and green as in the spring.

It is proof against our severest winters. Exceedive rains and snows, the long continued freezing weather of winter does not affect it in the least. If the soil is well drained it will succeed, and for many years continue to flourish and produce wonderful crops of the richest

It is adapted to dry and sandy soils where other plants fail to grow, as well as those that are deep and rich. Its roots often measuring 20 to 30 feet in length, force their way down deep into the subsoil in search of moisture, and plant food that cannot be reached by any other plant.

It is "perpetual life." A successful stand will It is "perpetual life." A successful stand will last from ten to forty years. constantly yielding heavy crops which may be first cut in May. a second crop in July, a third crop in August, and with a good curing season, a fourth crop can sometimes be harvested, yielding two to three tens of the most nutritious hay at each cut-

All in all, it is the grandest forage plant on earth, and cannot be too highly recommended.

The yield of seed this year has been very small; and the quality of the seed in general is very poor. We are pleased to state that we began early buying the best grades obtainable and now have a fine lot of seed on hand. Alfalfa is the cheapest forage crop that can be sown. Invariably, the first season the returns are double the cost of seeding.

Sow early, from 20 to 30 pounds of seed to the Some seedsmen recommend at the rate of 10 to 12 pounds of seed per acre. This is a fatal error, and has been the primary cause of several failures in obtaining a good stand. It must be seeded heavily in order to get a good stand and have a fine quality of hay.

Cut when in full bloom, rake into winrows and let dry until the leaves, if roughly handled, are inclined to fall off, then lay in piles, one forkful

in each pile to cure, Weight 60 pounds per bush \$2.25; bu. \$8.50; second grade \$7.50. per bushel.

DOUBLE YOUR CROP-But do not spend a lot of money for unnecessary femilizers. Science has discovered a nitrogen-gathering bacteria that fertilizes the soil. How? By drawing free nitrogen out of the air and depositing it as plant food in the soil. Science has also discovered how to produce and use this harmless germ to make crops grow where they never grew before. NITKO-CULTURE does it. Did your alfalfa or clover fail to catch? Did it winter kill? Did it turn yellow and die? does it. Did your affaifa or clover tail to catch? Did it winter kill? Did it turn yellow and die? Then use Nitro-Culture. Simply inoculate the Seeds before sowing, with a solution containing the germs. You'll get a full catch and largely lacreased crop. \$2.00 worth will materially increase your yield per acre. Results guaranteed.

Nitro-Culture catalogue free. See page 36.

TIMOTHY (PHLEUM PRATENSE)—This is decidedly the best grass for kay, making a large return on strong, rich clay, of medium state of moisture. Sow twelve to fifteen pounds per acre. Weight, 45 pounds per bushel. Lb. 10c; bu. \$1 50: 5 bu. \$7.00.

MEADOW OAT GRASS ELATIOR)—This produces an abundant supply of foliage, and is valuable for pasturage on account of its early and inxurlant growth. Sow three bushels to the acre. Weight, 14 pounds per bushel. Lb. 25c; bu. \$2.50.

ENGLISH PERENNIAL RYE GRASS (LOLI-UM PERENNE TENUE)—A highly esteemed grass in Europe, either for lawn or pasture, On good soil it yields a large return of valuable forage. For pasture sow about two bushels to the acre, and for lawns, about three bushels. Welght, 20 pounds to the bushel. Lb. 15c; bu. \$2.00.

GRASS (SORGHUM PENSE)-This is a species of the Sorghum family. It is an excellent grass for grazing, and contains a large percentage of saccharine matter. Sow about one buskel to the acre. Weight, 25 pounds per buskel. Lb. 15c; bu. \$2.00.

Dwarf Essex Rape and Speltz. See page 33

Turkestan Alfalfa or Lucerne

Medicago Sativa Var. Turkestanica

Perfectly Hardy, Withstands Drouth, Heat and Cold. Yields the Heaviert and Richest Crops of Fodder. The Best Clover for Permanent Hay and Pasture.

The importance of forage crops has occupied our attention many years, and we are constantly on the alert for new varieties. Turkestan Alfalfa we believe to be the most important in-troduction in late years. Its value can hardly be estimated, but without doubt it will add millions of dollars to the annual hay crop of the United States.

The seed was first secured from Russian Tur-kestan by Prof. N. E. Hanson, while en-gaged as agricultural explorer for the Depart-ment of Agriculture, Washington. In 1898 and 1899, 1,101 packages of the seed were distributed by the Secretary of Agriculture throughout the United States, and upon careful investiga-tion it has proved vastly superior to the com-mon Alfalfa, inasmuch as it withstands ex-treme drought and cold much better. treme drought and cold much better.

Value as a Fodder Plant on Dry Arid Soils— The climate of Turkestan is not unlike that of The climate of Turkestan is not unlike that of our interior States, being far removed from the ocean and surrounded by wide expanses of dry land. The summers are very hot and long, and in many places the evaporation exceeds the quanty of moisture that has fallen during the year. The inhabitants are mainly employed raising cattle, and here it is this Alfalfa grows and flourishes. We have every reason to believe it will prove equally as valuable in this country. country.

Withstands Extreme Cold Without Injury.—
At the Experiment Station, Brookings, S. D.
with a minimum temperature last winter of 49
degrees below zero with the ground bare, common Alfalfa was killed, while Turkestan came
through unharmed. At the Wyoming Experiment Station the Turkestan Alfalfa was exosed to a minumum temperature of 45 degrees below zero without harm.

Good Crops on Alkali Soils.—The introduction of Turkestan Alfalfa permits of a great extension of the area heretofore devoted to the cultivation of Alfalfa, and this, too, in sections where climatic conditions have almost prohibited the growing of leguminous forage crops. Not only does it endure extreme drought and cold, but excellent crops of it have been raised on strongly alkaline soils.

The plants grow strong, more leafy with

The plants grow strong, more leafy with slender and less woody stems than the common sorts, thereby making a finer and more autritious hay. For its cultivation follow the general directions given for common Alfalfa. The seed we offer is imported direct from Tur-

Turkes!an Alfalfa

kestan, Lb. 25c; pk. \$2.50; bu. \$9.00. grade \$3.00 bushel.

Trans-Mississippi Lawn Mixture

All the lawns at the Exposition were sown with The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture, identically the same as we offer to our customers, any one of whom can with ordinary care, equal and even surpass the results obtained at the Exposition, if the simple directions be followed which are printed on every packet of our Trans-Mississippi Lawn Mixture.

The grass seeds we use in The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture were exhibited by us at the Exposition and received a Gold Medal award along with the rest of our seeds.

That The Nebraska Seed Co.'s Traus-Mississippi Lawn Mixture is the finest mixture ever offered, the immense quantities we sold the Exposition As-sociation is a very good proof. It is the best

seed for our American climate, and is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained. The Nebraska Seed Co.'s Trans-Mississippi Lawn Mixture is the result of several years' careful experimenting, and as we now offer it, the Lawn Mixture is unequaled. It may not also be generally known that it is, relatively speaking, the cheapest seed offered. est seed offered.

est seed offered.

The quantity required for making new lawns is four bushels per acre, or for renovating old lawns, one to two bushels. For a plot 15x20, or 350 square feet, one quart is required for new, or one pint for renovation. Price, 25c per quart, \$1.00 per peck; \$1.35 per ½-bu.; \$2.00 per bu. (If wanted by mail, add at the rate of 7c per quart for postage.

For Northern Grown Seed Potatoes, See Pages 24, 25 and 26

Bromus Inermis.

BROMUS **INERMIS**

Drouth Defying Frost Resisting

Yields enormous crops of splendid hay and affords early and abundant pasturage. Our best grade of this magnificent grass is unequalled for purity and high germination, and less seed of it is required to the acre than any other grade.

> From Good Seed, Good Crops Grow.

Bromus Inermis. The Coming Grass for the West and Arid Lands

Bromus Inermis.

HUNGARIAN, OR AWNLESS BROME—GRASS (Bromus Inermis)—Is the best all around pasture grass that has ever been introduced. It is a native of Hungary, but it seems to be adapted to the prairies of the West, the cold regions of the North, and the hot plains of the South better than any other grass.

it is a strong-growing perennial grass with smooth, leafy stems, which grow from one to four feet high. It forms a tough sod, soon crowding out other common forage plants. It is very hardy. The underground stems, (root stalks)grow more rapidly in light, sandy loam, but they penetrate with apparent case the stiffest clay, and in all cases form a dense, tough

For several years past we have lost no opportunity, either through our catalogue or by personal correspondence, to urge its value on those who have not yet used it and whose attention has not been particularly drawn to its great and unquestionable merits.

We believe that the introduction of Bromus Inermis has added \$5 to the value of every acre of land in the West, especially in the Dakotas, Montana, Washington, Nebraska, Kausas, Idaho, and other states having within their boundaries large areas of land which will not under ordinary circumstances yield a crop of grass. Its introduction has added millions of dollars to the productive capacity of these states, thus increasing the value of every acre within the state.

Bromus Inermis comes to us from Russia. On

value of every acre within the state.

Bromus Inermis comes to us from Russia. On the great prairies of that country this marvelous grass thrives luxuriantly. It stands year after year, yields enormous crops of excellent hay, and furrishes, both early and late, rich and abundant pasture. It is an inestimable boon to countries where clover does not thrive and where timothy and other grasses, either tame or wild, yield a light and decreasing crop of hay.

It is a thoroughly established success in the West. It is a "cosmopolitan" grass, adapting itself to almost every condition of soil or climate and to any use to which grass may be put, equaling in quality and rivalling in yield almost every other grass, resisting extremes of temperature,

whether of heat or cold, profitable to sow anywhere, but most valuable for its wonderful power to grow under dry conditions. Its supreme adaptation for the semi-arid belt that lies west from the Rocky Mountains and extends northward from Okiahoma to the Alaskan boundaries, renders it a vertible Godsend to the people of that region.

The worth of this grass to all parts where clover is not as yet a decided success, is beyond all estimate. Those owning lands in the West should not neglect any longer establishing this important grass on their farms. Get a start even though you can this year seed only a small area. You can raise your own seed for further recuirements, and there will be such a demand for this seed for years to come that this alone would make one of the most profitable crops possible to grow.

Browns Inermis is not an experiment; it is a proven success, and it is to be hoped that this year every one who can possibly do so—and who cannot if he tries?—will get a start with the grass.

cannot if he tries?—will get a start with the grass. SOWING—Bromus Inermis may be sown at any time of year when the ground is bare, but the preferred season for sowing in the West is in the early spring, with or without a nurse crop, but is better sown alone. The seed is large and light and it has been generally supposed that it could only be sown by hand, but the special "Thompson Wheelbarrow Seeder" handles this and other grass seeds perfectly and rapidly, and we have arranged to make special prices on this seeder to those who purchase their seed from us. Sow 28 lbs. per acre. Weight, 14 pounds per bushel. Lb., 20c; bu., \$1.50; 5 bu. \$6.75.

See Page 33 for Dwarf Essex Rape and Speltz

Don't Overlook Turkestan Alfalfa, Page 29 KENTUCKY BLUE GRASS (POA PRATENSIS)

This is the best pasturage for our climate and soil, succeeding finely on bill lands and producing the most nourishing food for cattle, retaining its qualities to a late period in the winter. Weight, 14 pounds to the bushel. Fancy cleaned seed, 10. 25c, 5 lbs., \$1.00; bu. \$2.00; Extra cleaned seed, 10. 15c; bu. \$1.00.

RED TOP (AGROSTIS VULGARIS)—A valuable grass. If sown on mcist, rich soil, it will grow two feet, and on poor, sandy soil, about half that height. Sow fifteer to twenty pounds per acre. Weight, 14 pounds per bushel. In chaff, lb. 10c; bu. \$1.00. Free from chaff, lb. 15c; bu. \$1.50.

bu. \$1.50.

ITALIAN RYE GRASS-In nutritive value earliness and quickness of growth after it has been mown, it far surpasses the Perennial Rre Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years, it is of no use in permanent pastures. The soils best adapted to Italian Rye Grass seem to be those that are moist, fertile and tenacious, or of a those that are moist, irrilie and reflactors, or of a radium consistency, and on such sol's it is said to be one of the best grasses knewn to cut green, affording repeated luxuriant an inutritive crops. Sow thirty to forty pounds to the acre. Weight, 25 pounds per bushel. Lb. 15c; bu. \$2.00.

The Nebraska Seed Co.'s Golf Link Mixture

There is no use to which a lawn is put that is so exacting as that used for Pleasure Grounds, Golf Links, etc. No other turf is required to stand such wear and rough usage; hence the necessity of sowing such grasses as will produce a thick and healthy growth, and withstand the constant tramping of many feet. We have devoted much time to experimenting, in order to produce the correct mixtures, such as will quickly produce a rich green turf. For sowing the seed follow same directions as for Trans-Mississippi Lawn Mixture. Price per pound, 25c: 5 lbs. \$1.00; ½-bu. \$1.25; bu. \$2.25.

Meadow Fescue

Orchard Grass

English Rye Grass

MEADOW FESCUE, OR ENGLISH BLUE GRASS-Grows two or three feet high, but never in large tufts like Orchard Grass. One of the earliest, most nutritious and productive grasses. It is especially suitable for permanent pasture; thrives well in all soils, but to ent pasture; thrives well in all soils, but to best, advantage on moist lands. Makes good hav and cattle thrive well on it, whether dry or in a green state. It succeeds well even in poor soil, and, as its roots penetrate the earth twelve to fifteen inches, it is not affected except by exceedingly dry weather, and is as valuable a fertilizer as Red Clover. It is one of the hardiest grasses after a good stand is secured; it will stand more freezing than any other variety. It yields an abundant crop of seed, about eight to ten bushels per acre, which can be threshed by any threshing machine. Notwithstanding its acknowledged merits, this grass has been sown only to a limited extent in this country. It is deserving of much more attention than it has heretofore received from our western farmers. Sow about twelve to eighteen pounds per acre in spring or fall. Weight, 24 lbs. per bushel. Lb. 15c; bu. \$2.00.

ORCHARD GRASS-No farm should be without a small field of Orchard Grass, as in many respects it is superior to all other grasses, respects it is superior to all other grasses, stands the drouth, grows well in the shade, does well in wet and poor ground, and is splendid to prevent worn-out fields from washing. This grass furnishes excellent pasturage three weeks before any other and after close grazing, ten days' rest is sufficient to produce another growth. Cows fed on this will produce more and richer milk-than on Blue Grass. It makes a very heavy sod, and when well set remains for many years. It is especially adapted for winter grazing, as it remains green all the senson. Sow twenty-five to thirty pounds to the acre. Weight, 14 pounds per bushel. Lh. 25c; bu. \$2.00.

FLAX SEED

It will pay farmers to buy their flax seed and quit the process of raising it under contract for the mills. It is a quick crop to grow and always finds sale at a fair price.

RUSSIAN FLAX-A great improvement over the common American fisx. Seed double the size. Yields 12 to 14 bushels per acre. Lb. 10c; pk. 50c; bu. \$1.60.

BROOM CORN

WILSON'S IMPROVED TENNESSEE EVER-LAST-ING-This Broom Corn grows about 8 to 10 feet high, stands up well and is entirely free from crooked brush. The fibre is long and fine and will always command the highest price; 1b 1(c; pk. 60c; bu. 81.25.

MISSOURI EVERGREEN -- Is a favorite of Kansas. Nebraska and Missouri. Lb. 10c; pk. 60c; bu. \$1.25.

PEANUTS

Peanuts can be cultivated as early as potatoes. They yield largely and are a paying crop. Planted in April, they ripen in August. Lb, 15c; 10 lbs. \$1.25.

BUCKWHEAT

Buckwheat should be sown about the middle of June, broadcast, at the rate of from one to three packs per acre.

NEW JAPANESE BUCKWHEAT-We advise all who are growers of Buckwheat to give this new and distinct variety a trial in preference to any other variety, whether it be for milling or for the apiary or aviary. Lb. 10c; pk. 50c; bu. \$1.50; 5 bu. \$7.00.

SILVER HULLED-A greatly improved variety. is in bloom longer, matures its crop soover and yields twice as much as the ordinary sort. Lb. 10c; pk. 50c bu \$1 50; 5 bu. \$7.00,

COMMON—The old, well known sort. Lb. 10c. pk. 45c; bu. \$1,45: 5 bu. \$7.00.

ET. MILL

EARLY FORTUNE MILLET-A most promising new variety, of which astonishing yields are re-

ported. It is very early, and it is claimed to be rust proof, and that chinch bugs will not eat the plant The seed is very beautiful and distinguished in appear-Price Fancy Recleaned Early Fortune Millet, lb 10c; peck, 40c; per bu \$1.75.

MANITOBA, OR HOG MILLET,-This has come to be one of the most valuable crops that the farmer can raise, the seed being the richest and most valuable hog food that can be produced, while the hay is very valuable for stock. A very much prized peculiarity of the New Manitoba is that the seed ripens while the hay is yet green, when if cut promptly can be threshed for seed, while the hav makes excellent fodder after being threshed. Lb. 10c; pk. 40e; bu. \$1.25.

GERMAN OR GOLDEN MILLET.-Grows three to five feet high, heads closely condensed, spikes very numerous, seed round, golden yellow, in rough sheaths Sow thirty to fifty lbs per acre. Weight 50 lbs. per bu. Lb. 10e; pk. 35c; bu. \$1.00.

HUNGARIAN GRASS-PANICUM GERMANICUM A valuable forage plant, withstands drouth, yields well on light soil. Sow broadcast at the rate of thirtyfour to forty-eight pounds to the acre and cultivate the same as Millet. Weight 48 pounds per bu. Lb. 10c; pk. 35c; bu. \$1.00.

THE NEW SIBERIAN-The most wonderfully productive and satisfactory forage plant, possessing in a superior degree all the essential merits of any of the older sorts—exceeding them by far—besides many other points of excellence that distinguishes it and renders it a most valuable addition to the list of forages, and the claims are well founded which destines it to take front rank, if not lead of all the rest. It is said to have come from Russia, which would, of course, give it vigor and hardiness not possessed by those originating in a warm climate. Lb. 10c; pk. 30c; bu. 90c.

JAPANESE MILLET.

All things considered we call this the most valuable thing in our whole list of forege plants. It has been sold under different names, as "Billion Dollar Grass," "Steel Trust Millet." etc., but they are all one and the same thing. We recommend it for the following reasons:

First. It makes more hay than German Millet or

any other.
Second. Although it grows so large, sometimes

Second. Although it grows so large sometimes seven or eight feet high, the hay is of most excellent quality, superior to corn fodder.

Third. It is adapted to all sections and a great success wherever tried. It does well on low ground. Fourth. Two crops a season may be cut from it, or, if left to ripen, it will yield almost as many bushes of seed per acre as oats.

Fifth. It requires less seed per acre than any

Fifth. It requires less seed per acre than any other millet, 20 to 30 lbs. being sufficient.

Six'h. It makes fine silage, especially if mixed with Soja Beans or Sand Vetch.

Seventh. It is highly endorsed, and recommended by the U.S. Department of Agriculture, by all Experimental Stations and by seedsmen generally, Be sure to order of us, as we are headquarters. At

our prices it is even cheaper than German Millet, our prices its even receiper that derinal miles, as it requires only half as many pounds to seed an acre. Therefore, the expense cannot stand in the way of trying it this year. Do not be afraid of it because it is new. Treat it just exactly as you would German Millet, only sow it a little earlier for the best results. The latter part of May is about right. We know it will please you. 1 lb. 10c; pk. 50; bp. 4150. right. We 1 50; bu. \$1.50.

> TURKESTAN ALFALFA. See Page 29.

RAPE-TRUE DWARF ESSEX

One Acre of Rape will Pasture 20 Sheep for Two Months

DWARF ESSEX RAPE—Is an annual, bearing a close resemblance in leaf and stalk to the Ruta Baga, but both leaves and stalks are more numerous in the Rape plant, and of a talier habit of growth. It is a pasture plant which may be eaten by any kind of live stock, but it is pre-eminently fitted to furnish pasture for sheep and swine. A good crop will furnish at least twelve tons of green food per acre and its autritive value is nearly twice that of clover. One acre of well grown Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market. Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. This plant may be grown successfully in the following ways, viz.: First—In the early spring to provide pasture for sheep and swine. Second—in June or July on well prepared land to provide pasture for sheep and swine. Second—in June or July on well prepared land to provide pasture for sheep. Third—Along with grain, using two ibs. of seed per acre to provide pasture for sheep, and to get a "catch" of clover. Fifth—Along with corn drilled in broadcast to provide pasture for sheep, and to get a "catch" of clover. Fifth—Along with corn drilled in broadcast to provide pasture for sheep. Sixth—in corn, sowing the seed with the last cultivation giver to the corn. Seventh—Along with rye sown in August in sheep pastures. When the Rape is sown broadcast, 5 lbs. of seed per acre will suffice When sown in rows, say 30 inches apart, and cultivated, from one to two ibs. will be enough. It is now being grown in the United States from the Atlantic to the Pacific ocean. The day is not far distant when it will be grown extensively as a pasture for swine. Millions of sheep and lambs will be fattened on it in the United States. A director of one of the Agricultural Experiment Stations says: "We had one-half an acre of Rape this year, which gave an actual yield of 9% tons, or at the rate of 18½ tons per acre."

Reware of the ki

Fisrex Rape seed every year from Essex County, England, and know it to be genuine, and of the very best quality, which alone is a sufficient guarantee, worth much more than the price of the seed. This is the article to sow this year, as the price is lower in proportion than on any other fodder crops. Price, lb. 15c; 10 lbs. at 12c per per lb; 25 lbs. at 10c per lb; 50 lbs. at 8c per lb; 100 lbs. at 6c per lb.; 500 lbs. at 5c per lb.

Speltz

A wonderful new grain that is now attracting great attention. It is neither barley nor oats, but somewhere between the two, although it resembles wheat and when ground into flour is somewhat like rye flour. Thres it is a kind of combination grain. We believe it will preve of much value. For centuries past it has been grown in a limited way in Eastern Russia, its value not being known to the agriculturalists of the civilized world. An emigrant from there brought some to this country and has been growing it. A prosperous American farmer who lives near him secured sufficient seed from him to sow five acres and was surprised at the large crop. It yields more than barley or oats. He says that under the same circumstances it will produce double as much as barley. He has been feeding the grain quite extensively and it is one of the best horse feeds known. The chaff adheres feeding the grain quite extensively and it is one of the best horse feeds known. The chaff adheres to the grain when threshed. It has given spiendid satisfaction to all who have tried it. Will grow anywhere and will produce Immense crops on poor soil: the dry weather appears to have no effect on it, and it can be raised and threshed like any other grain. Can be cut while green and used for fodder. If cured for hay it makes a better quality of hay than millet and out-yields it three-fold. Botanically it is known as Triticum Spelta, and is supposed to be the grain grownin Egypt in the time of Moses. Price lb, 10e; 3 bn. 40c; bu. \$1.25; 5 bu. \$5.75.

> Bromus Inermis, Drouth-Delying, Frest-Resisting. See Page 80.

OATS-Improved Prize Cluster

THE EARLIEST OF ALL OATS—To maintain high-grade oats it is necessary to have a change of seed every few years so as to keep up our standard of excellence, for oats grown on the same soil year after year gradually become light and chaffy. We have for the past five years been working up a stock of Prize Cluster Oats from the parent stock, of which the director of the Iowa Experimental Station spoke so highly. In his report he places Prize Cluster at the head of the list of all varieties tested, both for bulk of crop and weight per bushel. It is a white variety, with very large heads and heavy, plump grain, straw of medium growth, and entirely rustproof. In our selected Prize Cluster Oats we claim to have one of the best, heaviest and thinnest shelled oats in cultivation. Pk. 40c; bu. \$1.50; 2½ bu. \$3.00; 5 bu. \$5.75. \$1.50; 2½ bu. \$3.00; 5 bu. \$5.75.

LINCOLN—After ten years' trial, has proved itself the most popular of any onts yet introduced. We call attention to the following special points of excellence. 1st—It is very productive, having in all instances yielded more to the acre than any other sort grown in the same locality, in one case having yielded 174 bushels from a single bushel of seed. 2nd—It is very early. 3rd—It has thus far proved itself rust-proof. 4th—It stands up better than any other sort. 5th—It is best for feeding on account of its thin hull, heavy ear and soft nib. 6th—It is best for outneal or grinding for the same reasons: Lb. 10e; pk. 35c; bu. \$1.0; 5 bu. \$4.50. 5 bu. \$4.50.

CANADA RED BEAUTY OATS.

Canada Red Beauty Oats mark such a distinct advance over all other varieties, especially in point of productiveness and strength of straw, as to set them apart and above all other oats. They are in a class of their own, and in the particulars above mentioned are not approached by any other oat.

They are preferred by those who have had experience with them, principally on account of their superior yielding qualities, but besides being fully equal, if not better than white oats in point of feeding qualities.

Lb. 10c; pk. 35c; bu. \$1 00; 5 bu \$4.25.

PROBSTEIER OATS—This new and wonderful variety originated from Germany a few years ago. One of the most prosperous farmers of this state was fortunate enough to secure a few pounds of this wonderful oats, which he carefully planted and cased for. He was convinced that the oat would do well in this country and put the same to all sorts of tests, and it has proved to be the best oat for this part of the country. Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.25.

KHERSON OATS-Brought to America in 1900 by the University of Nebraska from the province of Kherson, Russia, with the idea of procuring an oat that would be hardy, a good yielder, and yet extra early. Small lots were sent out to farmers all over Nebraska: and the tests have proven that the oats far exceeded their highest expectation as to earliness, amount of yield, and ability to withstand our heavy winds and not lodge.

We have secured our stock seed from a grower in Douglas county who received his start from one of these small lots furnished him four years ago by the Experiment Station. The Kherson Oats when ripe are a beautiful yellow in color, have fine, large sprangled or full heads which frequently contain more than 100 seeds. The stalk is stiff and does not lodge or rust. It has broad leaves, many of which are three-quarters of an inch wide; they extend to the roots and are so pliable that they stay on even through threshing. Unlike most heavy yielders these oats have a large grain with a very thin hull. Under favorable conditions they have yielded as high as 95 bushels to the area in Nebraska. At the University Experimental Farm they made 74 bushel to the acre. Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.25.

Seed Barley

MANSHURY—Is one of the very best six-rowed barleys grown, with kernels plumper and fuller than the best Scotch Barley, while for maiting it is the very best known. It is early in ripening, which helps it to fill well, thus it is always plump. Lb. 10c; pk. 40c; bu. \$1.25.

BLACK BARLEY—Weighing sixty-two pounds to the measured bushel. Wouderfully productive, and of great value for feeding and fattening cattles and hogs. It is exceedingly prolific, having yielded 180 bushels of shelled barley from two bushels of seed sown. Lb. 10c; pk. 50c; bu. \$1.50.

White Hull-less Barley.

WHITE HULL-LESS BARLEY-A novelty in barley. Plump, heavy kernels, which, when

white Hull-less Barley—A novelty in barley. Plump, heavy kernels, which, when threshed, are hull-less, like wheat kernels. Early, prolific, well filled heads.

Mr. D. C. Carpenter says: "I have grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow early and you can cut two crops from the same sowing. As fattening food for hogs it has no equal. It makes sweeter meat by far than corn. I fatted 20 hogs for one butcher, and made a gain of 106 pounds to the hog in five weeks. I find the best way to feed it is to grind it and feed dry, with clear colo water in another trough for them to drink out of. I have sown it as late as the 18th of June and made a good grain crop. It stoods wonderfully."

We have a fine stock of this barley of our own growing. With us it grew strong and thrifty, was very early, stood up perfectly, and yleided as much or more than any other barley of the common bearded kinds around us. The field when headed out was a beautiful sight. This barley is very heavy and the kernels look like very large and plump wheat kernels. We recommend it as a novelty well worth trying. Sow only 1½ bu. per acre. Price: Pk. 50c; bu. (48 lbs.) \$1.50; 5 bu.

acre: Price: Pat \$1.35 per bu.

Beardless Barley

NEW BEARDLESS BARLEY-All barley growers have experi growers have experi-enced the annoyance occasioned by the chafing and sticking of the beards while threshing. This nuis-ance has been over-come in the New come in the New Beardless Barley which is entirely free from beards. This barley is six-rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth neads resemble smooth wheat with the exception of a small duck bill on the point of each grain. This comes off readily in threshing, le a ving the threshed grain looking like any other white like any other white barley. Lb., 10c; pk., 50c; bu., \$1.50.

> See Pages 24, 25 and 26 for Northern Grown Seed **Potatoes**

Winter and Spring Rye

RXE, WINTER—Our stock is No. 1 Grade—Price. Lb. 10c; pk. 35c; bu. \$1.00.
RYE, SPRING—This grain is often planted by farmers especially for the paper makers, who prefer it to any other. Lb. 10c; pk. 50c; bu. \$1.75; 5 bu. \$8.00.

Winter Wheat

We have growing now the following varieties: Red Turkey, Fulcaster, Highgrade, Nigger, New Monarch, Golden Cross, Red Clawson, Jones Win-ter Fife and others. Will be pleased to quote prices next fall in time for sowing.

Spring Wheat

VELVET CHAFF BLUE STEM—This is a remarkable semi-hard Spring Wheat, yielding extremely well in soft wheat states. No soft wheat will give better satisfaction than Velvet Chaff Blue Stem. Lb. 10c; pk. 45c; bu. \$1.25.

MACARONI SPRING WHEAT—New variety for the semi-arid district. "The thorough establishment of this new Wheat Industry will be the greatest benefit to agriculture in the semi-arid plains." A million or more acres can thus be given to profitable wheat raising which, on account of drouth heretofore have raising which on account of drouth heretofore have been entirely alle or less profitably employed. In a few years time the result ought to be the addition of thirty to fifty million bushels to the annual wheat production of the great plains alone."

In he West, especially the semi-arid sections, the conditions are ideal for producing this wheat. lb. 10c; pk. 50; bu. 61.75; 5 bu. \$3.00.

Immense Crops Without Fertilizers

A new, sure and easy way has recently been discovered to make worn-out or poor land enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Heretofore fertilizers have been needed to put nitrogen into the soil. Nitrogen is very necessary—is the most expensive part of fertilizers. The new way is easier, surer, cheaper—it is to let nitrogen-gathering

germs feed the plants.

The soit is full of air. Air is four-fifths free nitrogen. Think what limitless plant food, in the form of free nitrogen, the air contains. Right here the new discovery comes in. Plants can't extract nitrogen from the air, but there are germs that can. These germs have been discovered and are now being used for that purpose.

These germs when put into the soil fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making many farmers rich. The germs do the work, the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other crops where they never would grow

before.

The new way saves the cost of fertilizers and is very easy to use. The germs come ready for use, in a form called Nitro-Culture. Nitro-Culture is p t up in small, dry packages you can put in your vest pocket. Simply, add it to water and sprinkle the water over the seeds before planting. The germs remain on every seed—live with it—increase about it—feed the roots when they start and keep on feeding them. They also enrich the foil by storing nitrogen in it, so that the second year's crop, whatever it may be, is increased from two to ten times.

Adjoining cut shows specimen plants characteristic of uninoculated and inoculated field of Alfalfa, on farm near Bynum, Harford county, Maryland. The uninoculated plants turning yellow though sown on ground richer and better than the inoculated field. Gain from inoculation with Nitro-Culture nearly 500 per cent. by weight.

PRICE LIST

Nitro-Culture, sufficient to inoculate the following seeds per acre mailed to any address in the United States or Canada at the following prices:

Alfalfa	 		per acre.
Red Clover			
Crimson Clover	 		4.4
Japan Clover	 		44
Cow Peas	 		44
Garden Peas	 		34 ACTA
Sweet Peas	 	******	44
Wax Beans	 		per acre.
Soy Beans			48
String Beans	 		**
Vetch	 		48
Velvet Beans			S .44
Peanuts			- 84
Horse Beans			1.00
Lima Beans			

To the left are roots of Soy Beaus, showing the nodules which collect the free nitrogen from the air and deposit it in the soil, thus making barren land productive, and after the first crop is harvested the ground is left richer and better for the next year's crop.

Non-Saccharine Sorghum

JERUSALEM CORN-Introduced from Palestine by a missionary. One of the surest of all forage plants for dry countries and seasons. Grows three to four feet high produces many large heads well filled with a valuable grain for stock and chicken feed. Lb. 10c; 10 lbs. 60c; 100 lbs.

RED KAFFIR CORN—This grows taller than the white; the stalks are slenderer, but more juicy and very leafy. The heads are long, slender, compact and grow erect; they measure from one to two feet. The seed is red, smaller than that of the white, and rather hard and brittle. It does well on poor land and yields well. It ripens a little earlier than the white variety, and yields much heavier. It is highly recommended by the Kausas Agricultural College at Manhattan. Lb. 10c; 100 lbs. \$2.00.

WHITE KAFFIR CORN—It grows from four to five feet high, making a straight, upright growth. It has a stalky stem, with enormous wide leaves. The stalks keep green and are brittle and juley, not hardening like other varietites of sorghum, making excellent fodder, either green or dried, which is highly relished by cattle, horses and sheep. The seed heads form at the top of each stalk, and as soon as these show the grain well, the joints next below the too send up shoots which yield the second seed heads. For the grain sow in rows three feet apart, three to five pounds of seed to the acre. For fodder sow one-half to one bushel, either broadcast or in drills. Lb. 10c; 100 lbs. \$2.00.

DHOURA. OR EGYPTIAN RICE CORN—A wonderful fodder plant. If sown in spring while the ground is moist it will mature without a drop of rain. It is much sweeter than corn stalks, and cattle, horses and hoge cat it ravenously. Lb. 10c; 10 lbs. 60c; 100 lbs. \$4.00.

Four Great Croppers Bromus Inermis, Speltz, Dwarf Essex Rape, Turkestan Alfalfa.

Cane or Sorghum

Sorghum (or sugar cane) has attracted general attention. In the West, its great merit is not at al. appreciated, and we wish to call the attention of farmers everywhere to the great value of Sorghum as a pasture and fodder crop, and to the particular advantage to be gained by growing it. Sorghum may be made to furnish the principal provender for cattle and horses from August matif the following spring. As a summer pasture for sheep, a wide field is likely to be opened up by it. As a soiling food for swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of corn. It grows right along through the severest and most prolonged drouths, so that a good yield may be expected from sultable soils in any seasons after the plants have secured a good start.

EARLY AMBER CANE—This popular and well known variety is the earliest. Lb. 10c; pk. 40c; 1 bu. \$1.00 5 bu. \$4.50.

EARLY ORANGE CANE—A well known variety, well adapted for the south. Lb. 10c; pk. 40c; 1 bu. \$1.00; 5 bu. \$4.50.

SUGAR CANE FOR FODDER-Lb. 10c; 9k. 40c; 1 bu. \$1.00; 5 bu. \$4.50.

Soja Beans.

SOJA BEANS—The plants grow erect, averaging four and one-half feet in height. The stalk is strong and woody, and has numerous branches covered with heavy foliage. The branches and upper part of the main stem are thickly studded with clusters of pods—from two to five pods in a cluster, each pod containing two beans. Can be cut for hay or used for grazing purposes. The beans should be sown a half bushel per acre broadcast, or planted in drills three and one-half feet apart, and one and one-half feet between the plants, dropping two or three to each hill, which will require one gailon per acre. This variety of bean is sold largely as German Concederries at a fancy price. Lb. 10c; 4-ba. 60c; bu \$2.95.

TESTED SEED CORN

It costs less than 15c an Acre to use our Carefully Selected and Tested Seed Corn

Is it wise to risk deubtful Corn when Good Corn is so Cheap ?

The varieties of field corn we offer are the best ow in use. They were grown especially for now in use. They were grown especially for seed purposes, and well matured, cured, carefully sorted by our seed corn experts, and shelled with grat care. The value of the corn crop of Nebuska alone would be increased two million dollars by an average increase of one bushel per acre, and it has been demonstrated that the crop can be fully doubled by planting some of our improved varieties. We are in the center of the best corn growing country of the world, where the soil and climate are peculiarly adapted to its culture, and now we can say without fear of contradiction, now in use.

that for the season of 1905 we have the best supply of seed corn ever offered by any seed firm in

The necessity of planting the very best varieties is plain, and it will not pay you to experiment with the many sorts we have tried and found worthless, nor to purchase from unscrupulous

All of our seed corn is very carefully tested, and none are sent out that we are not certain will grow under proper conditions. We will mail samples for testing to prospective customers. If a large quantity is wanted ask for special prices.

Buy early—You will not regret doing so

GOLDEN ROW

OUR GOLDEN ROW-Has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been arxiously inquiring for a large-eared, yet early Dent Corn, and to supply their wants we have for years been studying it up, and, until we got up this corn, were not fully satisfied. Many sorts have been tried and found wanting. In the Golden Row our customers will find a high-bred corn, en Row our customers will find a high-bred corn, of beautiful color, and one which will please them. We claim this corn has the largest number of rows on cob, and the deepest, longest grains of any corn ever originated, making the finest appearing shelled corn we ever saw, being a cast of golden yellow, and such corn as brings the highest price in the market; the ears well filled to the extreme tip of the cob with 10 to 14 regular rows. The cobs are unusually small for so large an ear, while the grains are of such remarkable size that when the ear is broken in half the grains will frequently equal in length the diameter of the cob. The richness of color and fine quality of the grains make ness of color and fine quality of the grains make Don't overlook Turkestan Alfalfa on page 29.

It superior for grinding into meal. With us it requires 100 to 110 days to mature the cror, but the ears ripen well. The grain is easily shelled, though firmly attached to the cob. The stalks take firm hold on the ground, are strong and vigorous in growth, with abundant leafage, and attain a height of from ten to twelve feet in rich soil. It will out-yield any corn in this section. We cannot too highly recommend this corn to our customers. We have grown thousands of bushels of other large varieties, and the Golden Roy is from one week to one month earlier, growing side by side and planted the same week. Price: Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

RED COB ENSILAGE CORN—This variety has been grown in the large dairy regions of Nebraska the last four years, so immensely as to almost exclude all other enslings corns. Lb. 5c; pk. 40c; bu. \$1.00; 5 bu. \$4.50.

LARGE WHITE FLINT, OR EARLY SANFOHD—Best for homlny. Lb. 10c; pk. 50c; bu. \$1.00.

POP CORN—Queen's Golden—Lb. 10c. White Rice—Lb. 4c. White Pearl—Lb. 4c.

See page 50 for Two-Row Corn Cuitivaters.

See page 50 for Two-Row Corn Cultivators.

va Silver Mine Corn.

fowa silver mine—stalks grow to a height of seven or eight feet and sets the ears about three and one-half to four feet from the ground, just the right height for easy picking. One peculiarity we noticed in going over the field was that there were no barren stalks, every one had an ear, many stalks had two good ears, and the originator says that that has been characteristic every-year that he has grown it. It has not a large growth of fodder, having been bred essentially for grain, though it has plenty of bledes to support the growth, and it is as well rooted as any corn grown. The type is very even, so unusually so that in selecting the heads for exhibition, they can be taken just as they come in the field, with very few exceptions. SILVER MINE-Stalks with from very few exceptions om ten to twelve measuring from ten to twelve inches in length and weighing one and one-half pounds are not uncommon. The ears are very uniform in size and shape, with sixteen to twenty straight rows (usually eighteen rows) of deep, pure white ternels, set on a small cob; and the ears are well died out over the tip. It is early, matured last year in less than ninety-five days, and has never

been caught by frost. The cob dries out rapidity so that it is ready for market earlier than any white field corn in existence, fully two weeks earlier than Champion White Pearl. The origination tor claims that it is the only strictly pure white corn now on the market. In its yield it will surpass all other varieties of any color. Seventy lbs. of the corn in the car will make sixty-two pounds shelled. It is adapted to a wider range of soil and climate than any corn ever offered. From Mirnesofa to Florida, from Massachusetts to Cali-foinia, it will yield a paying crop where other varieties are grown at a loss. This grand corn was originated as follows:

In selecting over some unnamed white corn, one one ear which was of ideal shape, size and color. He planted it carefully in an isolated spot, and from the crop selected only one car for planting the next season. He continued his careful selection of only the one best ear out of crops for five years, until the type was fully fixed. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

Legal BTender. For description see next page.

LEGAL TENDER—With the exception of Ne-oraska Gold Mine, we consider the Legal Tender the best variety of yellow Dent corn for lowa, Illinois, Nebraska and the South. It is the re-sult of about ten years selection by a seed corn specialist, and has taken first premium at many state and county fairs. The corn is very productive, of uniform pure yellow color, ear very large and long and a deep grain on a small cob, while the stalk does not grow too large. The introducer says. "Our ideal ear is an ear two-thirds as large around as it is long, containing sixteen to twenty rows, and small shank. The kernels are deep, the cob is small at the butt and the ear holds its bigness toward the point until near tapering off. It ness toward the point until near tapering off. It smould be capped over and the kernels should hold their bigness toward the point and the butt run out straight and not crinkle." It matures in about 115 days, but we do not recomment it for the extreme northern portion of this state. Lb. 5c; pk, 35c bu, \$1.00; 5 bu. \$4.50.

EARLY DAKOTA DENT - Dakota Dent Corn is the result of a careful selection of the Pride of the North. It can be planted up to the middle of June, and still make ripe corn by the middle of September. Lb. 10c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

NEBRASKA GOLD MINE—Is very early, ripening only a few days later than the Pride of the North. Ears are of good size and symmetrical. Color, a bright golden yellow, grain very deep, cob small. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50

THE IMPROVED NINETY DAYS' LEAMING —A reliow Dent variety, very small, red cob, with a deep long grain of rich golden color, matures a crop in ninety days, and will if planted by first of June, under ordinary culture, grow, ripen and be fit to husk and crib by September 1. Lb. 5c; pk, 35c; bu, \$1.00; 5 bu, \$4.50.

MAMMOTH CUBAN (DENT)—It is a wonderful cropper, as many as five ears having been produced on one stalk. Very early and a remarkably quick grower. It matures in eighty-five days here in Nebraska. Ears average eight inches long and husk very easily. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

GOLDEN BEAUTY—This variety is the handmomest of all Yellow Corn. The ears are of perfect shape, with from ten to fourteen straight
rows of brightest golden-yellow grains of remarkable size, and filled out completely to the extreme
end of the colo. The richness of color and fine
quality of grain, make it very superior for grinding
into meal. The grains are not of a hard, flinty
type, neither are they so soft as to be greatly
shriveled as in the Golden Dent. Lb. 5c; pk. 35c;
bu. \$1.00: 5 bu. \$4.50. bu. \$1.00; 5 bu, \$4.50.

PRIZE NEBRASKA-WHITE awarded the first premium at the Nebraska State
Fair for the past twelve years. It is an extra
early pure white variety of the Dent family, very early pure white variety of the Deut lamily, very productive and exceedingly heavy, maturing in 85 to 90 days from the time of planting. It is very even in hybridization and maturity, giving a good grade of corn and the highest price to be realized for it. Very prolific, and has yielded 100 bushels of shelled corn per acre. Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

GODDARD'S KING OF THE EARLIEST—The great hog and cattle feeding corn. This is the earliest yellow Dent corn in cultivation. Stalks grow six to seven feet high, ears seven to when luches long, very deep, soft grain, small red cob. It ripens in eighty days from planting, being a week or ten days earlier than the "Pride of the North," and "Yellow Canada Flint." This corn will mature in any part of the country where it is possible to grow flint varieties, and is a valuable variety for the extreme north and GODDARD'S KING OF THE EARLIEST-

for Nebraska and Kansas. It is especially desirable as it reaches maturity before the hot, blighting winds set in.

Price: Lb. 5c; pk. 35c; bu. \$1.00; 5 bu. \$4.50.

Goddard's King of the Luriest.

GOLDEN WEST The Best Yellow Dent Corn Ever Offered

Golden West is one of the most vigorous growing varieties that we know of. The stalk is of medium height, not as tall as Legal Tender, but very much thicker at the ground, short jointed and has broad leaves which help to mature the large crop of corn which it produces. It is the deepest rooted corn that we know of

and therefore not easily injured by hard wind storms nor are the roots so near the surface as

to be broken off and the vitality of the plant sapped and weakened in cultivating the crop. The ears have usually eighteen to twenty rows a little larger size than Legal Tender in an ordinary season. It is the most attractive

appearing golden yellow corn that we know of, just as the Silver Mine is the most attractive and best white corn. There are many ears which measure eleven inches in length and weigh one and one-half pounds containing 1200 to 1500 grains to the ear. The kernels are of such shape that they wedge in tightly and make a solid ear, not only at the cap but also down near the point or germ end (see cut of ear, section). This is a characteristic which is overlooked by many corn breeders, thus causing ears of ordinary varieties, which appear solid, to be of light weight. The germ contains more nutriment than any other part of the kernel and it should be plump and well filled out to insure good feeding value as well as vigorous plant growth.

The ear is solid, nearly uniform in size throughout its entire length, but gradually tapering off to a blunt oval tip The ear shank is of medium length, strong but not large; cob comparatively small and of such nature that it dries out rapidly thus insuring a well matured crop, even during unfavorable seasons. It matures in about 100 days, thus making it a safe corn to plant and we claim that it will yield a larger crop than any other yellow corn in ex-

istence.

The breeder of this corn has been working on essential principles for many years, and instead of simply crossing two good varieties, he has made his cross from several varieties and selected so as to combine the best characteristics of each with an ideal in his mind which he was or each with an ideal in his mind which he was working towards. Instead of having simply surface roots like other northern varieties, he has bred to obtain a deep rooted sort which would obtain its nutriment from the sub-soil as well as having plenty of surface roots. In this way he has secured a better leaf structure for the plant which enables it to stand long seasons of drouth, hot weather and strong winds. By working with his first cross to obtain plants with unusual heavy leafage and roots, he has been enabled to build this new roots, he has been enabled to build this new variety on a foundation of perfect health and variety on a foundation of periete health and vigor. It is sure to become the leading corn for this latitude and will rapidly win the confidence of all corn growers. Thousands of farmers will make money by buying our Seed Corn 1 lb. 10c; pk. 60c; bu. \$2.00; 5 bu. \$9.00.

Cow Peas -- The Great Soil Improver

Makes poor land rich. Makes good land more productive. Also makes a splendid and nutritious green forage or hay crop, enriching the soil even where the crop is cut off.

Special Notice: The prices on cow peas are in an unsettied condition at this time (January 1), and we request that when you are ready to purchase, write us for special prices.

ready to purchase, write us for special prices.

COW PEAS are not exactly a Pea, but more properly belongs to the Bean family. It is a valuable fodder and fertilizing crop, and can be grown as a second crop after wheat in the north. The pods may be harvested for grain and the plants plowed under to fertilize the soil. The seed or grain is used for cattle feed.

BLACK COW PEAS—This variety, while a little inter than Whippoorwill, produces more growth of foliage and is consequently better for cutting and as a soil improver. It makes large yield of peas and is very popular in the lattitude of Kentucky. Lb. 10c; pk. 50c; bu. \$1.50.

WHIPPOORWILL—A favorite early bunch-growing variety, has brown speckled seed.

This variety is a prime favorite in the North and West on account of its early maturity and habit of growth. Lb. 10c; pk. 50c; bu. \$1.50.

CLAY—This makes as enormous and remarkable growth of viacs, but requires the fall growing see-

son to make its crop. In yield and growth of vines it surpasses any of the varieties of Cow Peas, and it yields very largely of the shelled peas. This variety should be planted in May in order to come to full maturity. Lb. 10c; pk. 50c; bu.

Peas and Oats for Fodder

They make a fodder and hay which in every case doubles the production of milk when fed to cows. The Canada Field Pea, which we sell at \$1.60 per bushel, is the best for this purpose. They should be sown in April, two bushels of Peas and two bushels of Oats to the acre. The Peas should be sown first and plowed under about I'ens should be sown arst and plowed under about four Inches deep; the oats then sowed and harrowed in. They will be ready for cutting about July 1, when the oats are in milk and the pods formed on the Pens.

FIELD PEAS—White Canada Field—Lb. 10c; pk. 50c; bu. \$1.60; 5 bu. \$7.50.

GREEN FIELD—Lb. 10c; pk. 50c; bu. \$1.60; 5

General List of Flower Seeds

SELECTED CHOICE VARIETIES

We do not grow Flower Seeds curselves, but import them direct from England, Germany and France, where they are grown by Flower Seed Specialists. Our list is comprised of the most popular varieties, and greatest care has been taken to have the same fresh, of strong growing vitality and true to name.

The following prices are per packet. Order by number only

Annuals, Biennials and Perennials

ALYSSUM-ROCK MADWORT.

Pretty, useful little

or rook work.

1. ALYSSUM SWEET -Very fragrant, white. Good for edging. Hardy

annual.50. 2. LITTLE GEM-Flowers fragrant; very dwarf compact habit; suitable for borders or pots. Pkt. 5c.

ASTERS.

No family of plants bear such distinct marks of progress as the Aster, and none are more eagerly sought. An almost endless vari-ety, always reliable, it

Alyssum

is not strange that they should become a necessity.

ASTER VICTORIA Undoubtedly the most handsome Aster in cultivation. 1% feet high.
Many colors, fine wixed, 10c.

4. NEW COMET AS-TER — Resembling the Japanese Chrysanthe-mum in shape of flowers, 10 c.

ASTER, CROWNED

5. ANTEM, ORDMIXED—10e.
6. ASTER, GERMAN QUILLED — Many colors, choice mixed, 5c.
7. ASTER—All kinds

mixed, 5c.

8. NEW WHITE BRANCHING—In habit of growth this new Aster resembles the Truffaut Paeony-flowered type, but the plants grow from 10 to 12 inches taller. The flowers are large, very double pure white and of the true "Semple" type. The plants grow about 30 inches high ple" type. The plants grow about 30 inches high and produce from twenty to twenty-five flowers, which are borne on stems from 20 to 24 inches long. Its upright habit admits of close planting and it will attain full growth when set only 15 or 16 inches apart. The growing of many plants in a small space is a decided advantage when room is scarce. Per large pkt. 25c.

BACHELOR'S BUTTON, OR CORN FLOWER. 9. CENTAUREA CYANUS—This is the widely known and ever popular "Corn Flower," or Corn Bottle," which, if the seed is sown just as soon as the ground is fit in spring, will furnish a profusion of white, blue and pink flowers from July until late in autumn. Hardy annual. Two to three feet high. Mixed, pkt. 5c.

BALSAM, OR LADY SLIPPER-The Balsam has been improved so much by cultivation as to be scarcely recognizable. The blossoms are double, though some semi-double and single ones will be pretty certain to appear, and such plants should be removed. 11. CRIMSON-Pkt. 5c.

12. SNOW WHITE-Very double, perfect in form.

Pkt. 5c. DOUBLE 13 CAMELIA-Flowered.

ixed, pkt. 5c.

14. INVINCIBLE—We have no hesitancy in pronouncing this strain one of the finest in cultivation. The flowers are very large, measuring from 2 to 3 inches in diameter, of perfect form, resembling the flower of the Camella, and are as double. Pkt. 10c.

CANDYTUFT.

One of the most ropular annuals. Hardy, almost equally so as Sweet Alyssum and like it, of easiest culture; splendid for bouquets or borders.

CANDYTUFT, WHITE ROCKET-Pure 15.

white, pkt. 5c.
16. CANDYTUFT—Different colors,

16. CANDYTUFT—Different colors, fine mixed, pkt. 5c.
17. EMPRESS—One of the finest varieties in cultivation. It is intermediate in height, between the old Rocket and the newer Tom Thumb sorts. The plant is of very branching habit, and when fully grown and covered with its pure white flowers resembles a floral candelabra. Do not sow too thickly. Pkt. 10c, 3 for 25c; ¼ oz. 20c.

CAPE-MARIGOLD-CALENDULA

Attractive and free-blooming, hardy annuals,

doing well in almost any situation. The Pot Mari-gold, C. Pongel, is much prized as a pot plant.

CAPE MARIGOLD Fine, double mixed. Pkt. 5c.

19. E.L. DO R. A. DO--Immense flowers, 9 to 14 inches around; double primrose, lemon, orange, and golden shades. Pkt. 5c; 1/4 oz. 15c.

20. O A L L I O PS I S— Coreopsis-Showy border plant, producing flowers in every shade of yellow orange, crimson and brown, Finest double brown. Fine mixed. Pkt.5c.

Cape Marigold

SPLENDENS.-One 21. SALVIA. most brilliant of flowers; it thrives in any light, rich soil; often called flowering sage. Free bloomers. A brilliant searlet. Very fine. One of the most satisfactory of all bedding plants. Pkt. 10c.

CARNATION.

An important and beautiful class. None more so are grown. Most of the varieties have a delicious clove fragrance. Half-hardy perennials. 22. CARNATION-Extra choice, mixed pkt. 10c.

NEW DWARF MARGUERITE-Like its parent, the Marguerite, this Carnation blooms in four months from sowing. The flowers are larger, more durable and the variety of colors is infinitely greater. If taken up in the fall the plants bloom all winter. Pkt, 10c; \$ pkts. Sc.

CASTOR BEANS.

24. RICINUS—Tall, majestic plants for lawn, with leaves of glossy green, brown or bronzed metallic hue, and long spikes of scarlet and green prickly fruit. Of very quick growth in rich soil. Tender annual, 6 to 15 feet high.

rich soil. Tender annua,
Mixed, pkt. 5c.

Zanzibariensis—A new form of RiZi. Zanzibarieninted, stout growth and extra-

chus; of short-jointed, stout growth and extra-ordinarily large leaves, which are produced in such abundance that the plant is a perfect pyramid of beautiful foliage. The most tropical and ornamental Castor Bean yet introduced. They are sure to please all. Pkt. 5c; oz. 15c. COSMOS HYDRIDUS.

26. A showy and graceful annual of rapid growth, making large bushes fully five feet high, which are a mass of elegant foliage until they bloom in August. Fine mixed, pkt. 10c.

27. Early Flowering can now be had in bloom from July to November. It is such a strong, vigorous grower and its fine fringe-like foliage is such a pretty background for its lovely spreading flowers of white, pink, crimson or rosy purple that it can hardly be spared from any garden. It is really one of the most satisfactory of annuals. Price, pkt. (100 seeds), 10c; 3 pkts. for 25c.

28. CHRYSANTHEMUM — Superb mixed

28. CHRYSANTHEMUM — Superby mixed double seed from the finest Chinese and Japanese varieties extant, which we offer in mixture. Pkt. 10c.

29. DOUBLE ANNUAL CHRYSANTHE-

29. DOUBLE ANNUAL CHRYSANT.
MUMS-A fine mixture. Pkt. 5c; ¼ oz. 10c.

COXCOMB-CELOSIA

30. Annual plants of tropical origin. One of the most satisfactory and showy for garden decoration. Fine mixed, pkt. 50

CYCLAMEN.

31. Well known and universally admired tuberous rooted plants, producing exceedingly handsome red and white flowers. Tender perennial, one foot high. Persicum-Mixed. Of great beauty and many colors. Pkt. 5c.

DAISY-BELLIS

Charming little plants for hedging and borders. Tender, perennial, six inches high.

32. DAISY - Double mixed, 10c.

DAHLIA

Admirers of this noble plant may confidently depend upon the quality of this seed, it having been saved from the best varieties in cultivation. Half-hardy bulbs.
23. DAHLIA - Double

mixed, 10c.

DAHLIA - Single mixed, 15c.

Daisy.

FLOS JOVIS-AGROSTEMMA.

35. Perfectly hardy plants producing pretty pink-like blossoms on long, tender stems. Agrostemma Coronaria Perennial, mixed. Pkt.

FLOS FLOWER-AGERATUM MADLIN. Profuse blooming plants during summer and autumn in the open ground, in groups or masses, also good for pot culture for winter blooming. Pkt. 5c.

FORGET-ME-NOT-MYOSOTIS.

37. Pretty little favorites with lovely clusters of fine, delicate flowers. Blue, 1/2 foot. Pkt. 10c.

FOUR O'CLOCK-MARVEL OF PERU

Very picturesque plants, with flowers of great variety of color, which contrast finely with their dark green, glossy foliage. Fine mixed, pkt., 5c; oz. 10c.

FOX GLOVE-DIGITALIS.

29. Ornamental plants of much be uty producing dense spikes of flowers on stems 3 to 5 feet high. Splendid mixed. Pkt. 5c.
40. GERANIUM—These well known garden

favorites are as indispensable for indoor as out--of-door decoration and should be extensively

cultivated. Fine single mixed, pkt., 10c.
41. GILIA — Pretty, free-blooming plants, forming clusters of delicate flowers. Will bloom in almost any situation. Hardy annuals. Mixed colors, pkt. 5c.

GILLY FLOWERS-STOCKS, TEN WEEKS.

The Ten-week Stock is the most universally cultivated, and usually blooms 10 to 12 weeks after being sown. Half-hardy annuals.
42. GILLY FLOWER-Dwarf fine mixed, pkt.

43.

GILLY FLOWER-Large flowering, extra fine mixed, pkt. 10c.

GODETIA.

44. Beautiful garden plants, of easy cultiva-tion in any good garden soil. Finest mixed, pkt.

HELIOTROPE.

Well known, deliciously fragrant. Excel-45. lent for bedding purposes or pot culture. Mixed, pkt. 5c.

46. GL.NT FLOWERING—Will bloom as easily from seed as any of the common annuals. Sow the seed in the open ground about the 1st of May and the handsome bushes will furnish cut flowers all summer and fall. Pkt. 10c, 3 for

HOLLYHOCK

Hollyhock.

The seed we offer of this handsome flower has been saved from named varieties of every known shade of color.

Hardy perennials.

HOLLYHOCK-Extra choice mixed saved from exhibition flowers. Pkt. 5c.

47½. ALLEGHANY—Blooms the first year from seed. This grand new flower is an improvement in more than one particular over the oldfashioned variety. Its first point of merit is the fine transparent, fringed

chrysanthemum-shaped flowers, which look as though they were made up of crushed silk. So fine are these flowers in texture that one would never suspect they were related to the old-style hollyhock. Pkt. 10c, 3 for 25c.

LARKSPUR (DELPHINIUM)

48. Very elegant and ornamental plants, producing in great variety of form and color some of the most beautiful flowers in cultivation. Dwarf Rocket, double. Mixed, pkt. 5c.

After the air is pumped in no more labor is required, except opening the valve and directing the spray

THE DOUBLE-TUBE LIGHTNING INSECT EXTERMINATORS

No producer of vegetables or fruit can afford to be without one of these sprayers.

It's returns in one day's operation will be many

times its cost.

Kills, drives away and exterminates every liv-ing thing obnoxious to yourself, your animals or

Every family in city and country are in need of one of these sprayers. No. 2, copper, price, \$1.00; No. 1 tin, price, 56c.

We are State Agents for "PLANET JR." TOOLS

Space will not permit our showing and describing all the "Planet Jr." tools, but we will send fully illustrated catalogue free for the asking to any one who desires it. "Planet Jr." goods a fully illustrated catalogue free for the asking to any one who desires it. "PLANET JR." NO. 1 COMBINED DRILL

WHEEL HOE, CULTIVATOR AND PLOW-It has a complete set of cultivating tools, and all its work is rapid, easy, perfect and delightful.
When used as a drill the seed is sown with
great regularity and at uniform depth, regulated at pleasure. The hopper holds one quart. From a drill it is changed into its other uses by unscrewing but two bolts, when any of the attachments shown in the cut can be quickly attached.

"PLANET JR." NO. 11 DOUBLE WHEEL HOE. CULTIVATOR, WHEEL HOE, CULTIVATOR, RAKE AND PLOW-This tool combines in itself the good points of its predecessors with valuable new ideas. It has 11-inch wheels, which can be set at 4 different distances apart; the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and being attached to the arch, are entirely undisturbed

This new combined machine is intended for a class of gardeners who have a large enough acreage in crops for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy a separate Wheel Hoe. It is large enough for field use, for it holds 2½ quarts (or about 5 lbs, of onlon

seed) and has 11¼-inch wheels—which are just the right size. Price, \$13.50

the arch, are entirely undisturbed in making changes in the height of frame, width of wheels, or in the adjustment of the tools themselves. The arch is of stiff steel, unusually high. The design of the frames is novel, allowing all changes of tools to be made without removal of the nuts from the standards. A pair of model rakes and a pair of new style hoes are added to the usual equipment—seven pairs of tools in all. The whole set shown in the cut goes with the complete tool. All the blades are tempered and polished steel. The variety of work possible with this machine is incredible, covering the whole range of wheel hoe work, both in the garden and on the farm, and has our unqualified endorsement. Price, \$5.00

JUNIOR," NO. 15 SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

11 with 6-inch hoes only, this pair of tools being most generally useful at all seasons. Any or all of the No. 11 tools may be added at any time, and are sure to fit.

Price, \$4.75.

"PLANET JR." NO. 15 SINGLE

WHEEL HOE CULTIVATOR,

AND PLOW-This new RAKE Wheel Hoe has the advantage of high wheel with broad face, of convenient arrangement of the frame and a very full set of tools, most of them being of a new, spe-

cial design, such as have been known to perform wheel hoe work in the very best manner. Price,

"PLANET JR." NO. 16 SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW—This wheel hoe is identical with No. 15, except WHEEL that it has fewer tools, but the price is proportionately lower, and the remaining tools may be added as wanted. Price \$5.85.
"PLANET JR." NO. 17 SINGLE WHEEL HOE CULTIVATOR AND PLOW—This also has

the same frame, handles, etc., as No. 15, but is supplied only with a pair of 6-inch hoes, a set

18 supplied only with a pair of order and, a coof cultivator teeth and a plow. Price \$5.00
"PLANET JR." NO. 18 SINGLE WHEEL HOE-With the same frame and handles as No. 15 It has one pair of 6-inch hoes only. Price,

*8.50
"PLANET JR." FIRE-FLY WHEEL GAR-DEN PLOW-Price, \$2.35.

POULTRY SUPPLIES AND REMEDIES

GROUND BELF SCRAPS.

This is the finest thing we know of to cause hens to lay during the winter. Feed three times a week, at the rate of about a handful to every three birds, in the morning meal of hot food. 25 lbs., \$1.00; 50 lbs., \$1.85; 100 lbs., \$3.50.

DEODORIZED BLOOD MEAL.

Blood Meal is greatly relished by the fowls, promotes growth and strength and keeps the digestive organs healthy. Care must be taken not to feed too much, as it is very highly concentrated. One pound of Blood Meal to 18 or 20 pounds of other food is the proper ratio. 25 lbs., 75c; 50 lbs., \$1.50; 100 lbs., \$2.75.

MEAT MEAL.

This meal is exceedingly rich in protein and albumen, containing the Lecessary food for muscle and egg development. Laying hens need it. 25 lbs., 75c; 50 lbs., \$1.50; 100 lbs., \$2.75.

GRANULATED BONE.

Is about the size of wheat, and can be fed like any other food in grain, about one handful for every five fowls daily, or every other day, at all seasons of the year. 25 lbs., 75c; 50 lbs., \$1.35; 100 lbs., \$2.50.
